NOTICE is hereby given that a By-Law was passed by the Council of the Municipal Corporation of the Township of Sheffield, in the County of Lennox and Addington, on the fourth day of September, A. D., 1911, providing for the issue of Debentures to the amount of \$3500.00 for the purpose of purchasing for Public School Section No. 6, of the said Township of Sheffield, a new school site and erecting thereon a new school house and furnishing the same according to law, and that such By-Law was registered in the Registry Office of the County of Lennox and Addington, on the fifth day of September, A. D., 1911.

Any motion to quash or set aside the same, or any part thereof, must be made within three months after the first publication of this notice and cannot be made thereafter.

Dated the sixth day of September, A. D., 1911, and first published in the Napanee Express newspaper, (published at Napanee) on Friday, 8th September, 1911.

39-c-m

JAS. AYLSWORTH,

Clerk of the said Township of Sheffield.

EXECUTORS' NOTICE TO CREDITORS.

In the estate of Helen E. Robertson, deceased.

Notice is hereby given pursuant to Chapter 123, of the Revised Statutes of Ontario, Section 38, and amending Acts, that all persons having any claims or demands against the estate of Helen E. Robertson, late of the Town of Napanee, in the County of Lennox and Addington, widow, deceased, who died on or about the 8th day of July, A. D., 1911, are required to deliver or send by post prepaid to H. M. Deroche, Napanee, Ontario, solicitor for W. D. Roblin, and Dr. J. P. Froome, executors of the last will and testament of the said Helen E. Robertson, deceased, on or before the 7th day of October, A. D., 1911, their christian and surnames, addresses and descriptions, with full particulars of their claims or demands duly verified, and the nature of the security, if any, held by them.

And further take notice that after the said 7th day of October, A. D., 1911, the said executors will proceed to distribute the assets of the said estate amongst the parties entitled thereto, having regard only to the claims or demands of which they shall then have received notice, and will not be responsible for the said assets, or any part thereof, to any person or persons of whose claims or demands they have not received notice at the time of the distribution thereof.

H. M. DEROCHE.

Solicitor for the Executors.

Dated this 9th day of September, 1911. 40-d

ADMINISTRATOR'S NOTICE TO CREDITORS.

In the estate of Alice Augusta Baxter, deceased.

Notice is hereby given pursuant to Chapter 123, of the Revised Statutes of Ontario, section 38, and amending Acts, that all persons having any claims or demands against the estate of Alice Augusta Baxter, late of the Township of Camden, in the County of Lennox and Addington, widow, deceased, who died on or about the 28th day of July, A. D., 1911, are required to deliver or send by post prepaid to John English, Esq., Napanee, Ontario, Solicitor for the Administrator of the estate of the said Alice Augusta Baxter, deceased, on or before the 16th day of October, A. D., 1911, their christian and surnames, addresses and descriptions, with full particulars of their claims or demands duly verified, and the nature of the security (if any) held by them.

And further take notice that after the said 16th day of October, A. D., 1911, the said Administrator will proceed to distribute the assets of the said estate amongst the parties entitled thereto, having regard only to the claims or demands of which he shall then have received notice, and will not be responsible for the said assets or any part thereof to any person or persons of whose claims or demands he has not received notice at the time of the distribution thereof.

JOHN ENGLISH,

Solicitor for the said Administrator.

Dated the 20th day of September, 1911. 41d

Earl Grey and family have booked passage for England on October 13th.

THE COUNCIL MEETING

Council met in regular session on Monday evening, Mayor, A. S. Kimmerly in the chair.

Present—Reeve Alexander, and Councillors, Meng, Stevens, Dickinson, Steacy and Denison.

The minutes of the last regular session were read and confirmed.

A communication was read from W. S. Herrington, town solicitor, advising the council that the action of Mrs. Withers, against Contractor Litton and the town of Napanee comes up for trial on Monday, October 9th. The communication also stated that he was taking the necessary steps to guard the interests of the town.

Communication filed.

A communication was read from Mr. John Good stating that Police Magistrate Rankin was about to commit Francis Cleveland Bell to the Industrial School where he will become a charge upon this municipality for \$1.25 a week. In order to relieve the municipality of this charge Mr. Good stated he was prepared to deposit a sum of money with the treasurer of this town to be applied towards meeting the bills of this School as they are sent to the town, and asked that the treasurer be instructed to receive such sum as the municipality may direct in trust to be applied for the said purposes and no other.

Referred to the Finance Committee with power to act.

A communication signed "Citizen" was read calling the council's attention to the fact that the sidewalks were being continually used by bicyclists to the great inconvenience of the pedestrian, and asked that the council take some action to remedy this evil.

The communication was referred to the Chief of Police.

Several communications were read from Dr. John McCullough, Chief Health Officer of Ontario, the sum and substance of which was that the plans and specifications of the town's sewer systems and the proposed Sewage Disposal Works were approved by the Provincial Board of Health.

Communications ordered laid on the table.

Moved by Coun. Meng, seconded by Coun. Steacy, that the plans of all sewers in the town be filed in the clerk's office for all future reference, and that said plans be not removed therefrom for any purpose. Carried.

Coun. Dickinson asked for information as to who had allowed the ladders from the fire hall to be loaned to the men putting the new roof on Trinity church.

Coun. Dickinson stated that recently when the firemen had a call they had occasion to use the ladders, but were compelled to borrow other ladders. He was of the opinion that if the representative of the Underwriters Association were to drop in and find these ladders away from the fire hall there would be trouble.

Coun. Meng informed the council that Mr. W. F. Hall and a couple of other gentlemen had asked him for the ladders to be used at Trinity Church, and he had given them permission to use them.

Council adjourned.

COUNTY COURT.

The non-Jury sittings of the County Court were held at the Court House, on Tuesday, His Honor, Judge Price presiding, the following cases were disposed of—Forsythe, vs. Labarge and Lucas, vs. Labarge. These were actions brought by Thos. Forsythe of the Township of Sheffield and Wm. Lucas of the Township of Hungerford against Charles Labarge of the Township of Hungerford, for damages sustained by the plaintiffs by reason of defendant negligently setting out fire on his premises which the plaintiffs claim ran over onto their land and destroyed a quantity of valuable timber. Both cases were adjourned by consent to the December sitting of the County Court. Cost of the day to plaintiffs in any event. But no counsel asked for. Herrington, Warner and Grange for plaintiffs, Wills and Wright, of Belleville, for defendant.

Fretts vs Gordanier—An action brought by Lydia A. Fretts, a widow of Napanee, against J. L. P. Gordanier and Aramintha Gordanier, of North Frederickburgh, to recover possession of her goods and chattels, which the defendants refused to deliver up to her and for \$300 damages. The plaintiff entered into an agreement with the defendants to go and live the rest of her life with them. They were to take proper care of her and at her death to have all her personal property, but in case the plaintiff moved away the defendants were to have pay for her board, etc. After living with the defendants for six weeks and a half the plaintiff moved away and made a demand upon the defendants for her goods and chattels, which the defendants refused to give up, hence this action. The defendants put in a counter claim against the plaintiff for \$677.00. Judgment as follows: "I find that plaintiff understood agreement when she signed it, and it was not void. That plaintiff is entitled to recover a return of the goods, and on refusal to deliver up same she is entitled to recover four hundred dollars value thereof. That defendants are entitled under counterclaim to \$38.00, and that plaintiff is entitled as damages for detention, etc., \$18, and that judgment be entered after thirty days for return of goods, and in default \$400 damages, and for defendants on counter claim \$20, and costs against defendants fixed at \$50.

Hanging lamps, stand lamps, electric table and gas lamps, all new patterns direct from factory. Beautiful goods at

A mission was conducted in the R. G. church at Marysville last week, the services being held twice daily.

We are having a good deal of rain lately. It is apparently trying to make up for the time lost during the summer.

An epoch-making event for this district occurred when a rural mail delivery was inaugurated. Besides being a decided advantage to a number of residents along the route, it will have the effect of considerably increasing the mail matter received at this office, as the new district is considerably larger than the old. While our incoming mail will be delivered about an hour later than formerly, still we now will have an afternoon collection. Already a number of individual boxes are placed along the route, and as time goes on they will be increased. Mr. W. Dacey, of Marysville, holds the distinction of being first carrier under new system. It is understood that this system calls for considerable more care than the old method, and the detailed work is more involved. However, we are sure our postmaster will find his duties little or no more trouble, than in the past. To be successful the cooperation of all concerned is necessary.

His Royal Highness the Duke of Connaught, the new governor-general of Canada, will arrive in Quebec on Friday, Oct. 13th.

Mr. J. Gosslin of Levis has been awarded the contract for the Quebec terminal of the National Transcontinental Railway at \$745,000.

A man calling himself Alex Johnston was arrested at Prince Rupert on suspicion of being concerned in the New Westminster bank robbery.

Robert Larter, a G. T. R. brakeman, living at Belleville, had his right leg cut off below the knee in the freight yards at Tecumseh street, Toronto.

A fine of \$100 was imposed on a Peterboro druggist for selling alcohol without a doctor's certificate from the purchaser, who happened to be a black-listed man.

The Kinrade home at 105 Herkimer street, Hamilton, which will be remembered as the scene of the celebrated Ethel Kinrade murder, has been sold for \$8,000.

The appointment of Mr. Stanley G. Smith as postmaster at St. Catharines has aroused the Conservatives of the riding to opposition. Mr. Smith had served as deputy postmaster for some time.

The retiring Government will require a couple of days more to wind up business, and Mr. Borden's Cabinet is giving him some trouble, so the change of Government is not likely to be made before the end of the week.

The Financial Times, London, Eng., suggests that a splendid outcome of the elections in Canada would be the appointment of Sir Wilfrid Laurier to the higher commissionership in succession to Lord Strathcona.

A total of 212,854 immigrant settlers, one-third of them from the United States, settled in Canada during the first five months, being eighteen per cent increase in immigration figures over the same period last year.

Between Trenton and Belleville the Canadian Northern line is practically finished, and when the company's new bridge at Trenton is completed, the line will be opened up. The superstructure of the bridge over the Trent River is complete now, and there only remains the filling in and open work to be done. At Belleville the C. N. R.'s new station is almost completed. It is situated close to the waterfront, right in the heart of the business district. The company's line from Belleville to Deseronto is now finished, and at Deseronto the C. N. R. will use the Bay of Quinte line connecting them with Sydenham, which is only 40 miles from Ottawa. The remainder of the line will be pushed forward with all speed, and Sir Donald Mann is the authority for the statement that the section will be completed this year.

THE NAPANEE CHEESE BOARD

Cheese Sold at 14 3-16c.

Cheese Board met in Council Chamber on Friday last, president Chas. Anderson presiding. Fourteen factories boarded 1010 cheese, of which 490 were white and 550 colored. Bidding opened at 14c, and closed at 14 3-16 which price 610 cheese were sold.

BOYLE & SON.

DESERONTO.

A quiet wedding was solemnized by Rev. G. H. Copeland, when Ethel Gertrude, eldest daughter of Mr. and Mrs. Carscallen, was united in marriage to Oscar J. Fitchett, of Bay Centre. The bride wore a gown of white embroidered chiffon net with pearl trimming, over white silk, and the groom's gift, a pearl and amethyst brooch. They were unattended. After the wedding the young couple left for an extended wedding tour to western cities. The bride travelled in a black and white stripe serge suit, with white point d'esprit blouse, and black hat with willow plume. They will make their home in Bay Centre.

Clarence Therrien, while gathering hickory nuts, had the misfortune to fall from the tree, spraining both of his ankles and his left wrist. He is getting along nicely but will be confined to his home for few weeks.

A former resident passed away, in Toronto last week, in the person of Mrs. Shane, she having left here about four years ago to reside in Toronto.

J. P. Griffith, superintendent of the chemical company, was in Philadelphia last week, attending the funeral of his mother.

Mrs. J. E. Bisailon, of Montreal, who has been the guest of her aunt, Mrs. James Knox, returned home on Saturday. Mrs. Knox accompanied her.

Wm. Sayers, of Toronto, is spending a few weeks with his parents, Mr. and Mrs. W. Savers.

Mrs. Sidney Groves spent a few days with relatives in Belleville.

Miss Margaret O'Neil, of Napanee, is the guest of her sister, Mrs. F. Bell.

Rev. Dr. Torrance, of Kingston, occupied the pulpit of the Church of the Redeemer on Sunday, the pastor, Rev. F. S. Dowling, being in Toronto.

The schooners Lizzie Metalar and Guido loaded lumber for Oswego last week. The schooner Keewatin is loading lumber for Oswego. Capt. J. Gowan has laid up his schooner, the Theodore Voges, and is making extensive repairs.

The car works is having an addition made to its building, it having received a large order for flat cars.

The census office states that it may be the end of the week before the census figures are ready. The statement that the population is not as large as expected is wholly guess work all the officers being pledged to secrecy.

That the farmers of the prairie provinces will receive \$200,000,000 for their grain crop this year, although the grain as a whole will grade lower than in former years, is the statement made at Calgary, by B. S. Brown, superintendent of the Central western district of the Canadian Bank of Commerce.

Hair Dye.

We have the "old fashioned hair restorer" that restores the hair to its natural color. It is not a mixture of silver dye that shows on the hair so everybody can see that the hair has been dyed, but a "color restorer". It is put up in \$1.00 bottles, and can be procured in Napanee only at Wallace's Drug Store—The Rexall Agency.

FOR SALE—The Willett Arnold farm at Forest Mills, 60 acres, part of lots 13 and 14, in the 8th concession of Richmond. Good building and choice land, and well watered. Will sell right as owner has moved to the North-west. MANLY JONES, Insurance and Real Estate Agent, Box 5/6, Grange Block, Napanee, 17/1.

40 FARMS FOR SALE in Napanee and Belleville districts. Many of these are valuable farms and at right price. Call at once or write for list. We can suit you, and you will save time and money. Also some good town properties. W. G. H. BROWN, Real Estate, Opposite Royal Hotel, Napanee.

FOR SALE OR TO LET—A square 2 1/2 acre farm of first-class clay loam, 130 acres of which is work land and ten acres of timber. This farm is well watered, well fenced, clear of foul weeds, free of stone, and under good cultivation. Good orchard. Post office, blacksmith shop, and general store in corner of farm. Quarter mile from Marysville station, close to school and churches. Good brick house, and three frame barns and drive house. Apply to BEIRNARD MCGUINNIS, Marysville, Ont. 57dp-t-1

CLOSE QUARTERS;

OR, THE HOUSE IN THE
RUE BARBETTE

CHAPTER II.—(Cont'd)

"Did your brother call there as usual on Monday afternoon?" said Brett.

"Yes; he came straight here from Albert Gate, and had tea with uncle and myself. He sat in the very chair and in the very position you now occupy. I can remember him saying: 'By Jove! the hen's egg'—that is what he used to call the big diamond—is turning out in fine style." He even discussed the possibility of bringing us to see the collection when it was finished and before it left this country."

"Did your brother say why the diamonds were brought to this country in the first instance?"

"Yes; the Sultan and his advisers seemed to think the work of cutting them could be performed more safely and expeditiously here than anywhere else. Even the Turk has a high regard for the manner in which law and order are maintained in Britain. Yet the sequel has shown that the diamonds and their guardians were perhaps in greater danger here than they would have been in Constantinople."

"Was that the only reason?" said Brett, who had apparently made up his mind with the reference to the pattern of the carpet and was now gazing into the bright fire which danced merrily in the grate, for the day though fine was chilly.

The girl wrinkled her brows in thought before she answered: "I think I do remember Jack saying that he believed there was some State business mixed up in the affair, but I am quite sure he did not know the exact facts himself."

"Can you recollect any of the special precautions taken to protect the gems? Your brother may have mentioned some details in conversation, you know."

"Oh, I think I know all about them. In the first instance, the house at Albert Gate had previously been tenanted by a rich banker, and it was well defended by all ordinary means against the attacks of ordinary burglars. But, in addition to this, before the diamonds left the safe at the Bank of England, the building was practically torn to pieces inside by workmen acting under the direction of the Commissioner of Police. It was absolutely impossible for any one to enter except through the front door, unless they flew out of the second story window. Servants and workmen, like everybody else, had to use this door alone, as the windows and doors in the basement had all been bricked up. Inside the entrance hall there were always twelve policemen, and an inspector in charge."

"Every one who left the house was searched by the inspector on duty, and Jack used to say that he was very glad he invariably insisted upon this examination, although the police were at first disinclined to meet his wishes in the matter he being so to speak their

with process-serving as a professional means of existence. His face extended into a smile when his eyes fell upon the barrister.

"Ah, Mr. Brett," he cried, "Now we have something to do that is up to your mark. You are on the spot first, as usual, but this time I can honestly say that I am glad to see you."

Sir Hubert Fitzjames glanced in astonishment from his niece to the barrister. He could find nothing better to say than—

"This, my dear, is Mr. Winter, of Scotland Yard."

CHAPTER III.

Brett promptly cleared the situation by explaining to Sir Hubert, in a few words, the reason for his unexpected presence, and when the Major-General learnt the name of the distinguished personage who had sent Lord Fairholme to the barrister he expressed a ready acquiescence in the desire to utilize his services. Nor was the effect of such a notable introduction lost on Mr. Winter, whose earlier knowledge of the barrister's remarkable achievements in unravelling the tangle skein of criminal investigation was now supplemented by a certain amount of awe for a man who commanded the confidence of his Majesty's Government.

"Well," said Sir Hubert Fitzjames, with the brisk animation of one accustomed to utter commands that must be instantly obeyed, "we will now proceed to business."

For a moment no one spoke. The Scotland Yard detective evidently wished his distinguished colleague to take the lead. No sooner did Brett perceive this than he rose, bowed politely to Miss Talbot and her uncle, and said—

"The first thing to do is to trace the whereabouts of Mr. Talbot and this should be a comparatively easy task. The other features of this strange occurrence impress me as highly complex, but it is far too early a stage in the investigation to permit any definite opinion being expressed at this moment."

Every one seemed to be surprised by Brett's attitude.

"Where are you going to, sir?" asked Mr. Winter.

"That depends largely upon you," was the smiling reply. "If you come with me we will go direct to Albert Gate, but if you decide to prosecute further inquiries here, I will await your arrival at my flat."

"That is as much as saying that there are no facts worth inquiring into to be learnt here?"

"Exactly so. Miss Talbot has told me all that is material to our purpose. Her brother was unexpectedly sent for after dinner on Monday night, and left the house hurriedly, without affording any clue to his subsequent proceedings beyond that contained in a brief note sent to him by Mehemet Ali Pasha. Indeed, it was impossible for him to afford any explanation, as he himself was quite unprepared

pear in its bearing upon events, and in any case not to act precipitately. Whatever you do don't arrest anybody."

"But," said the other, somewhat mollified by Brett's earnestness, "half a dozen people may be arrested at any moment."

"Pray tell me how?"

"Descriptions of the stolen diamonds and of the suspected persons are in every police office in Great Britain and in most Continental centres by this time. Passengers by all steamers are most carefully scrutinized. Every pawnbroker and diamond merchant in the country is on the lookout, and, generally speaking, it will be odd if somebody does not drop into the net before many hours have passed."

"It will, indeed," murmured Brett; "and no doubt the somebody in question will experience a certain amount of inconvenience before he proves to you that he had nothing whatever to do with the matter. Now, don't answer me, Winter, but ponder seriously over this question: Do you really think that the intelligence which planned and successfully carried through an operation of such magnitude will be trapped by plain clothes constables watching the gangways of steamships, or by any pawnbroker who has ever lent half the value of a pledge?"

Almost impatiently the barrister waived the subject out of the hands, and the detective had sense enough to leave him alone during the few remaining minutes before the vehicle pulled up near the Albert Gate mansion.

(To be continued.)

A GENTLE LAXATIVE FOR THE BABY

Stomach and bowel troubles is the cause of nine-tenths of the ailments from which little ones suffer. Let the little stomach and bowels be kept right and baby will be happy, healthy and strong. The only sure and safe means of keeping baby's stomach and bowels sweet and regular is to give him an occasional dose of Baby's Own Tablets. These Tablets are a gentle laxative, they sweeten the stomach, regulate the bowels, expel worms, break up colds and prevent or cure the dozens of ailments that afflict the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

SECRET ROYAL LIBRARY.

Buckingham Palace Has Strong Room for Private Papers.

Within the walls of Buckingham Palace, and constructed on the "strong room" principle, is a room known as the "Secret Library," and in this are stored documents and private letters which, were they sent forth to the world, would doubtless set the whole universe talking.

From the very commencement of her reign Queen Victoria assiduously stored away in nice order all family and other important papers, her only assistant in this duty being a secretary, who entered her service within fourteen years of her accession to the throne, and who retained his place until her majesty's death, though he himself

LETTERS OF A SON IN THE MAKING TO HIS DAD.

—BY NEX McEVROY

[Mr. McEvoy will write for this paper a series of letters from the west. They will appear from time to time under the above heading, and will give a picture of the great Canadian west from the standpoint of a young Ontario man going out there to make his way. These letters should be full of interest for every Ontario father.]

No. 4.

Calgary, Sept. 4th, 1911.

My dear Dad:—

You will see I am still in Calgary. It is not that I am particularly taken with the town, but I have been knocking about with Mr. Benwick and finding out something about the country. You know I told you in my first letter that he and his three sons were on their way out to take up some of the C. P. R. irrigated lands. I was out to his place last Friday and stayed overnight with them. It is what is called a ready-made farm. The Canadian Pacific will break, harrow, seed and fence from 50 acres up, will put up buildings, and bore a well, so that you can go right on the farm with the crop growing and move right into your house. Of course they don't do it for nothing, but as you can pay for it in ten annual instalments along with the ten instalments for the land, it is spread over pretty well. Mr. Benwick reckons the farm will carry itself after the first year. He is all enthusiastic over the district. The company has demonstration farms close by, and they have pure bred sires of first rate breeds of live-stock, which are free for settlers' use.

Mr. Benwick knew some people who have located here, and that is why he came out. They say that the irrigation is like insurance against the loss of the crop through lack of moisture at the growing time. In 1908 oats were over 100 bushels to the acre, wheat 60 bushels and barley 91.

Mr. Charleton, who has a place near Strathmore, says that 1910 was the driest season for many years, yet all the people round there had some sort of a crop even without irrigation. With irrigation in the fall they are sure of good crops. People differ as to when the water should be let in from the irrigation canals. P. J. Umbrite, who has a place near Gleichen, says some people don't believe in putting the water on newly sown land, but he never cut finer oats than where he did this. He says that the best time to irrigate is late in the fall when the crops are off, and in the spring.

Quite a few people are going in largely for growing sugar beets in this district. They grow a good quality and can sell all they have at \$5 a ton anywhere in the irrigation block. This block is no small thing. It is forty miles north and south and 150 miles east and west. There are 1,500,000 acres in it. You strike the irrigation canal on the train a couple of hours before you get to Calgary, and it certainly looks a big work. They say it is the largest in the western hemisphere. It cost \$5,000,000, and there are 2,500 miles of ditches—imagine!

the entrance hall there were always twelve policemen, and an inspector in charge.

"Every one who left the house was searched by the inspector on duty, and Jack used to say that he was very glad he invariably insisted upon this examination, although the police were at first disinclined to meet his wishes in the matter, he being, so to speak, their direct superior for the time. Beneath the entrance hall were rooms occupied by several Turkish and other servants. Mehemet Ali himself, in the presence of his secretaries, used to open the door leading to the suite of apartments in which the diamond cutters worked and two of the Turkish gentlemen would remain there all day until the men left in the evening. The envoy and both secretaries used to meet Jack when he visited the place, and for the last three weeks he had nothing to do but see the diamonds, count them, drink an excellent cup of coffee, and smoke a wonderful cigarette, made of some special Turkish tobacco, cultivated and prepared only for the Imperial household."

"Ah!" sighed Brett, with a note of almost unconscious envy in his voice. He knew exactly what that coffee and those cigarettes would be like. "I beg your pardon," he went on, perceiving that Miss Talbot did not understand his exclamation. "Will you tell me as nearly as you can the occurrences of Monday evening?"

"They were simple enough," said the girl. "My brother dined at home. We had one or two guests, and were all in the drawing-room about 10.15, when a note came for him from Mehemet Ali. I know exactly what was in it. I looked over his shoulder whilst he read it. The words were: 'I wish to see you tonight on important business. Come, if possible, at once.' I have to tell you that it was in French, but this is an exact translation."

"Your brother was quite sure that it was from Mehemet Ali himself?" said Brett.

"Quite sure," was the reply. "He knew his handwriting well, having had several communications from him during the progress of the business."

"Did your brother leave the house immediately?" asked Brett.

"That instant. He went downstairs, put on his overcoat and hat, and got into a cab with the messenger who brought the note."

"Do you know who this messenger was?"

"One of the policemen on duty in the house itself."

A slight pause ensued, and Brett was about to take his departure, having no further questions to ask at the moment, when some one was heard hastily ascending the stairs, talking to a companion as he advanced.

"This is my uncle," exclaimed Miss Talbot, rising to go to the door. Before she could reach it an elderly gentleman entered, bearing upon him all those distinguished tokens that stamp a man as a retired major general. He exclaimed impetuously—

"I have brought a gentleman from Scotland Yard, my dear." Then he caught sight of Brett. "Who is this?"

Edith was about to explain, when another man entered—a strongly-built, bullet-headed man, with keen eyes and firm mouth, and a curious suggestion in his appearance of having combined pugilism

and the other is material to our purpose. Her brother was unexpectedly sent for after dinner on Monday night, and left the house hurriedly, without affording any clue to his subsequent proceedings beyond that contained in a brief note sent to him by Mehemet Ali Pasha. Indeed, it was impossible for him to afford any explanation, as he himself was quite unprepared for the summons. Meanwhile, every moment lost in the endeavor to follow up his movements is precious time wasted."

The barrister's manner, no less than his words, impressed Mr. Winter so greatly that he too rose from the seat which he had occupied, with the intention of conducting a long and careful examination of each member of the household.

"Then I will come with you at once," he said.

"Oh," cried the Major-General, "I understood you to say as we came here that there were many questions which required immediate inquiry in this house, on the principle that the movements of the missing man should be minutely traced from the very commencement."

Mr. Winter looked somewhat confused, but Edith Talbot broke in—

"I think, uncle dear, it would be well to defer to Mr. Brett's judgment."

"Do you really believe," she said, turning to the barrister, "that you will soon be able to find my brother?"

"I am quite sure of it," he replied, and the conviction in his tone astonished the professional detective, whilst it carried a message of hope to the others. Even Sir Hubert, for some reason which he could not explain, suddenly experienced a strong sense of confidence in this reserved, distinguished-looking man. He stepped forward eagerly and held out his hand, saying—

"Then we will not detain you, Mr. Brett. Act as you think fit in all things, but do let us have all possible information at the earliest moment."

Brett and Mr. Winter quitted the house; they hailed a hansom and drove rapidly towards Albert Gate.

"Do you know," said the man from Scotland Yard, breaking in on his companion's reverie, "whenver I happen to meet you, Mr. Brett, in the course of an inquiry, I always start by being very angry with you."

"Why?" There was an amused twinkle in Brett's eyes, which might have warned the other of a possible pitfall.

"Because you treat me as if I were a precocious youth. You listen to my theories with a sort of pitying indulgence, yet I have the reputation of being one of the best men in Scotland Yard, or I should not have been put on this job. And I am older than you, too."

"I may surely pity you," said Brett, "even if I don't indulge you too much."

"There you go again," snapped the detective. "Now, what is there silly about my theory of the crime, I should like to know?"

"You shall know, and before you are much older. Bear with me for a little while, I beg you. You may be right, and I may be quite wrong, but I think there is much beneath the surface in the investigations we are now pursuing. My advice to you is to drop all preconceived theories, to note every circumstance, however remote it may ap-

pears to be.

From the very commencement of her reign Queen Victoria assiduously stored away in nice order all family and other important papers, her only assistant in this duty being a secretary, who entered her service within fourteen years of her accession to the throne, and who retained his place until her majesty's death, though he himself had no access to nine-tenths of the papers which are docketed, the late Queen alone retaining the keys of the safes and cabinets in which her "secret library" was contained.

Just before her death her majesty added to the list of her papers a batch of letters of the most private and confidential kind, addressed by the late Prince Consort to his brother, the Duke, Ernest of Coburg, and possibly, she acquired every scrap written by her late consort to his private friends. It is said by those who are qualified to surmise that the "Secret Library" not only tells of royal marriages, births and deaths, but that it is virtually the private history of Europe during the last half of the nineteenth century.

LORD AVEBURY'S PET WASP.

The wasp is becoming a nuisance, and there are few who would choose a wasp as a companion. But Lord Avebury, who was Sir John Lubbock, is among the few, says the London Chronicle. Some years ago he captured a wasp in the Pyrenees and he kept her for nine months. "I had no difficulty," he writes, "in inducing her to feed on my hand; but at first she was shy and nervous. She kept her sting in constant readiness, and once or twice in the train, when the railway officials came for tickets and I was compelled to hurry her back into her bottle, she stung me slightly. I think, however, entirely from fright. Gradually she became quite used to me, and when I took her on my hand apparently expected to be fed. She even allowed me to stroke her without any appearance of fear, and for some months I never saw her sting." The wasp ultimately succumbed to the rigor of an English February, "and she now occupies a place in the British Museum."

Try For Breakfast—

Scramble two eggs. When nearly cooked, mix in about half a cup of

Post Toasties

and serve at once—seasoning to taste.

It's immense!

"The Memory Lingers"

Canadian Postum Cereal Company, Limited,
Windsor, Ontario, Canada.

can sell all they have at \$5 a ton anywhere in the irrigation block. This block is no small thing. It is forty miles north and south and 150 miles east and west. There are 1,600,000 acres in it. You strike the irrigation canal on the train a couple of hours before you get to Calgary, and it certainly looks a big work. They say it is the largest in the western hemisphere. It cost \$5,000,000, and there are 2,900 miles of ditches—imagine! If they were put end to end they would reach from Toronto to Vancouver and stick out into the ocean at that! And it is said that the company intend to spend \$12,000,000 more in extending the irrigation system.

The winters here are quite mild—so mild that they don't go in for any sports at Calgary that require snow. Horses are wintered out. Alberta is still quite a cattle raising place. The cured prairie grass puts on a finish, so they say, almost as good as grain. There is a big trade in cattle with British Columbia and the Yukon, as well as a big export trade.

The country is building up at a tremendous rate. Alberta has a population of 400,000, and when you go through it on the railway you wonder where it is all stowed away. You would think that there would be more houses along the railway than there are. But when you think that Alberta is bigger than either France or Germany, and twice as big as the British Isles with their millions, it is easy to understand that there is plenty of room for 400,000 without overcrowding. But just to show how the country is developing—in 1900 there were not 500 acres in the Province sown to winter wheat, while in 1909 there were 365,000 acres. That's going some. Last year, 20,000 acres were settled every day, in Alberta alone. They say that 200,000 Americans came into Canada in 1910, bringing with them in cash and settlers' effects as much as \$250,000,000. There were about the same number of settlers from Great Britain and Europe. The western provinces keep pace with the growth of population in the matter of schools, and the people here say that the rural schools are in no way behind those in Ontario.

The cities, of course, are growing just as quickly as the country. Why, ten years ago Regina had a population of only 2,000, and now it has 22,500. Regina is the centre of a district of about 60,000 square miles with a population of 400,000. Amongst other things the town is the distributing point for agricultural implements, threshers and engines. Last year the agricultural implements distributed through this town were valued at \$20,000,000. In 1910, two new towns were incorporated in Alberta every week. This city of Calgary, sometimes called the "Sandstone City," because of the amount of building stone that is right here and is largely used in the stores and churches, was only founded in 1882, yet it has grown so rapidly that the C. P. R. has found it necessary to spend a quarter of a million on the new station. The building is a handsome one, and one that every one of the 60,000 population of Calgary and its suburbs can be proud of. In the last ten years the city has increased its population by seven times. It is six miles square, and there is quite a bit of real estate dealing going on in that square, too. You can judge that when you know that there are 200 licensed real estate dealers in town, to say nothing of the hundreds of people who are interested in "deals." There seems to be a real estate fever about. Three doctors who came out this year to practice have caught it and are in real estate instead.

Well, it's getting late now, and I must close up. I shall be going on to Vancouver to-morrow, so that I shall be glad if you would send the paper on to Uncle John's address. Thanks very much for

DISEASES DUE TO ALCOHOL.

They Kill Twice as Many People as Tuberculosis, Says Doctor.

One of the greatest services which physicians of to-day are doing for the public is in acquainting them with the causes of some of our common diseases and showing them how these diseases can be prevented.

Although attention has recently been repeatedly called to the great amount of tuberculosis, cancer, and diseases of infancy in existence, it has recently come to light that there is a common disease or group of diseases which is responsible for a far greater loss of life than any of these.

This is the group known as the degenerative diseases, consisting of heart and Bright's diseases, and arterio-sclerosis, usually occurring in the same person as result more or less of the same cause or causes.

These diseases kill almost twice as many people annually as tuberculosis and have increased since 1880 at the rate of 103 per cent.

In a recent article in Harper's Weekly, Dr. Norman E. Dittman calls attention to the fact that this increase bears a suggestive relationship to the increase in the consumption of liquors—which had increased from ten gallons per capita in 1880 to 22 gallons in 1910—the total consumption of alcoholic beverages having reached the enormous amount of over 1,917,000,000 gallons in 1909.

The economic aspect of disease is constantly becoming a matter of increasing interest. This is brought home to us when, appreciating that an excessive meat diet is one of the causes of the degenerative diseases, and that according to Prof. Chittenden of Yale we consume about twice as much meat as we need, we realize that in our annual expenditure for meat products (1906) of \$2,345,461,000 we are wasting \$1,172,730,500 on our butchers' bills.

EAR CAUSES SEA SICKNESS.

Vienna University Professor Claims the Discovery.

Ye who have hung over the rail, fearful one day lest ye die and fearful the subsequent day ye would not, hearken unto Dr. Julius Auerbach.

When you thought your stomach had rebelled against the evil of spending money in foreign lands and was making you feel the ills of mal-de-mer, you did an injustice to an old friend. For your stomach does not cause sea-sickness at all.

Dr. Auerbach brings the tidings of the discovery made by Prof. Alexander Daliknik, world famous specialist of the University of Vienna, that sea-sickness is due to the irritation of the semi-circular canals of the ear. All medical Europe, he says, is discussing the discovery, but while it is accepted as the solution of the question as to cause, no progress has yet been made toward a remedy.

"The semi-circular canals of the inner ear," says the doctor, "have the function of enabling us to maintain our equilibrium. Irritation of the canals causes nausea, vomiting and loss of balance. The doctors found in their experiments that a

firm impregnates the wood meal with oil before mixing it with the magnesia paste and thereby renders it non-absorbent.

In Germany the cheaper grades of flooring are colored to resemble linoleum or mosaic pavements, and in many instances have given entire satisfaction during a considerable term of years. The emigrant halls of the Hamburg-American Line in Hamburg are paved almost entirely with this composition. Floors thus made are more elastic than cement floors, are much warmer, and preserve a smoother surface. Under the fire test this flooring chars but does not burn and is a poor conductor of heat.

BABY'S TERRIBLE ECZEMA.

Five Doctors Failed to Relieve, but Zam-Buk Worked a Cure.

Mrs. Chas. Levere, of Prescott, North Channel, Ont., tells how Zam-Buk cured her baby. She says:—"My baby's head and face was one complete mass of sores. The itching and irritation were fearful, and the little one's plight was so serious that at one time we feared her ears would be eaten off by the disease.

"We had to keep her hands tied for days to prevent her rubbing and scratching the sores. Doctor after doctor treated her in vain, until we had had five doctors.

"As a last resource we were advised to try Zam-Buk. The first box did so much good that we felt sure we were at last working in the right direction. We persevered with the treatment until we had used thirteen boxes, and at the end of that time I am glad to say Zam-Buk worked a complete cure."

For eczema, eruptions, rashes, tetter, itch, ringworm and similar skin diseases, Zam-Buk is without equal. It also cures cuts, burns, scalds, piles, abscesses, chronic sores, blood poisoning, etc. All druggists and stores at 50 cents a box, or post free for price from Zam-Buk Co., Toronto. Refuse imitations.

No, Maude, dear; crumbs of comfort can scarcely be acquired from eating crackers in bed.

Even the most successful surgeon might be a failure in operating on the stock exchange.

It causes the average young girl less inconvenience to lose her heart than to lose her appetite.

The destruction of the house fly is a public duty. Almost every American State Board of Health is carrying on a crusade against him. His filthy origin and habits, and the fact that his body is generally laden with disease-producing germs, makes him one of the greatest enemies of the human race. If the housekeepers of Canada will use Wilson's Fly Pads persistently, this peril would be tremendously reduced.

None are so blind as those who are visionary.

YOUNGER THAN SON.

An amusing incident happened some time ago in one of the Paris courts of justice. A vain, haughty woman was called as a witness, when the magistrate inquired her age.

"Twenty-five last August," promptly replied the lady.

The next witness was a young man, who at once acknowledged that he was twenty-seven years of age.

"Are you related to the last witness?" queried the magistrate.

"Yes; I'm her son," he replied.

"Ah!" mused the magistrate, "your mother must have married very young."

Father S— was remarkable for his ready wit. On one occasion, while travelling on a steamboat, a well-known sharper, who wished to get into the priest's good graces, said:—"Father, I should like very much to hear one of your sermons." "Well," said the clergyman, "you could have heard me last Sunday if you had been where you should have been." "Where was that, pray?" "In the county jail," answered the bluff priest as he walked away.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Cure, the simplest and best cure offered to the public.

It Testifies for Itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, well know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

MUDDLED.

"Can you tell me (hie) where B-Brown, the sh-schoolmaster, lives, mish?"

"Why, you're Mr. Brown, sir." "Yes, but, hang it all, I don't know where I am."

REST AND HEALTH TO MOTHER AND CHILD.

MRS. WINSLOW'S SOOTHING SYRUP has been used for over SIXTY YEARS BY MILLIONS OF MOTHERS for their CHILDREN WITH TERTHING, with PERFECT SUCCESS. IT SOOTHES THE CHILD, SOFTENS THE GUMS, ALWAYS ALL PAIN, CURES WIND COLIC, and is the best remedy for DIARRHŒA. It is absolutely harmless. Be sure and ask for "Mrs. Winslow's Soothing Syrup" and take no other kind. Twenty-five cents a bottle.

THE LAWYER'S CHARGE.

Defendant's Wife—"Don't worry, dear. The judge's charge was certainly in your favor."

Defendant (moodily)—"I know that. It's the lawyer's charge that I'm thinking about."

case, no progress has yet been made toward a remedy.

"The semi-circular canals of the inner ear," says the doctor, "have the function of enabling us to maintain our equilibrium. Irritation of the canals causes nausea, vomiting and loss of balance. The doctors found in their experiments that a deaf child in whose ears the canals had been destroyed could not be made seasick, and that animals, although whirled in swings and given deep sea treatment, did not get the seasickness."

Then the doctor went on to say that the ancient and accepted idea that one might prepare the system for a voyage by dieting was all a foolish whim. No matter how much the stomach might be treated by a thorough plumbing, refitting, and housecleaning, and no matter how much or how little food be used, the result would not reach seasickness.

A LADY LECTURER Feeds Nerves and Brains Scientifically.

A lady lecturer writes from Philadelphia concerning the use of right food and how she is enabled to without the strain and wear and tear of her arduous occupation. She says:

"Though improper food, imperfectly digested, my health was completely wrecked, and I attribute my recovery entirely to the regular use of Grape-Nuts food. It has, I assure you, proved an inestimable boon to me.

"Almost immediately after beginning the use of Grape-Nuts I found a gratifying change in my condition. The terrible weakness that formerly prostrated me after a few hours of work, was perceptibly lessened and is now only a memory—it never returns.

"Ten days after beginning on Grape-Nuts I experienced a wonderful increase in mental vigor and physical energy, and continued use has entirely freed me from the miserable insomnia and nervousness from which I used to suffer so much.

"I find Grape-Nuts very palatable and would not be without the crisp, delicious food for even a day on any consideration. Indeed, I always carry it with me on my lecture tours."

Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

MARCHIONESS OF DONEGALL

SHE IS A CANADIAN LADY BY BIRTH.

The Late Marquis Was Sadly Lacking in Funds—She is Now in America.

Arriving in New York recently on board the Olympic was the widowed Marchioness of Donegall, who, although of Canadian birth, being a daughter of the late Henry St. George Twining of Halifax, is an American by education having receiving her schooling at the Quincy Mansion School, just outside Boston, Mass., and afterwards at Wellesley College. The marchioness's career is a strange one. When quite a girl she, as Violet Twining, became engaged to an English officer stationed at Halifax. When the war in South Africa broke out, and he was ordered into the field, she and her mother followed him to Capetown, and when, in the early stages of the conflict, he was killed in action, it was found that he had made his will at Capetown just before proceeding to the front, in which he bequeathed to her the whole of his very large fortune.

Two years afterwards Miss Twining, then 22, created amazement by marrying, first before the registrar in London and afterwards in St. George's Church, Hanover Square, the aged Marquis of Donegall; repeatedly bankrupt, as battered in reputation as in physique, and 82 years of age; that is to say, fully three-score years the senior of his bride, who was obliged to assist him to his feet after he had been kneeling at the altar to receive the blessing of the Church to this extraordinary union.

HE HAD ADVERTISED.

It is claimed that the marriage was originally brought about through an advertisement inserted by the marquis in the London newspapers in the summer of 1902, in which he offered the title of marquis and a seat in Westminster Abbey for the Coronation of Edward VII. in return for a marriage settlement of \$100,000. The union, however, did not take place prior to the Coronation, from which Miss Twining was conspicuous by her absence. In fact, the matter could not be negotiated in time, and it was only after the Coronation that the aged marquis with his long white side whiskers, of the Dundreary type, and his mass of white hair, was introduced to Miss Twining at the Isthmian Club in London by a mutual friend, Colonel A. J. Gordon Kane of Brooklyn. Miss Twining is reported to have settled, not \$100,000, but \$40,000, upon the marquis, who did not, however, live very long to enjoy it. For he died some eighteen months later, after being presented with a son and heir, a very fine boy, to whom his Canadian marchioness gave birth barely ten months after her wedding.

Lady Donegall and the marquis were not, however, a very united couple. She left England with her mother eight or nine weeks after her wedding for a prolonged tour in the East, Lord Donegall remaining behind on the ground that his age rendered him unable to put up with the fatigues of travel.

PROFESSIONAL POISONERS

ASSASSINATIONS IN THE 15TH AND 16TH CENTURIES.

Some Famous Criminals of History Who Made Use of Arsenic.

Arsenic as a means of procuring the death of one's enemies has a long history. In the fourteenth century it was a favorite instrument of the professional poisoner. Charles the Wicked recommended it to one of his agents.

"Go thou to Paris," he directed: "do what I tell thee and I will reward thee well. There is a thing which is called sublimed arsenic. If a man eat a bit the size of a pea he will never survive."

"Take it and powder it, and then thou shalt be in the house of the King, of the Count de Valois his brother, the Dukes of Berry, Burgundy and Bourbon, draw near and betake thyself to the kitchen, to the larder, to the cellar, or any other place where thy point can be best gained, and put the powder in the soups, meats or wines, provided thou canst do it secretly; otherwise do it not."

Two great criminal schools arose from the moral chaos of the fifteenth and sixteenth centuries in Venice and in other parts of Italy, when even the State itself sometimes approved of secret assassination by poison. Foremost in the use of drugs thus used arsenic, says American Medicine. There is a mass of data relating to these

ITALIAN POISONERS.

They became famous for their knowledge of poisons as well as by the notoriety which came to them from their associations with the fiendish Tofana. She was the inventor of the most destructive and most subtle poisons of the period, aqua Tofana.

This famous murderess, a Sicilian by birth, in her early years had resided at Palermo, where she was known to have delved into the secrets of poisons. Later she went to live in Naples, and by the exercise of her profession she made such a name for herself that history will never forget it.

This woman's poison, the aqua Tofana, was distributed by her especially to young married women desirous of ridding themselves of their spouses. The better to conceal the nature of her potion she put it up in small vials marked "Manna of St. Nicholas of Bari," which she ornamented with an image of the saint.

Quickly the fame of this drug spread to Rome. The ladies of the imperial city availed themselves of its use to get rid of

OENOXIOUS HUSBANDS

or to make way for others more acceptable. In 1659 so many young husbands died in Rome that an investigation was started by the authorities of the city, which resulted in the discovery of a society of young matrons banded together for the purpose of poisoning their husbands. These women were under the direction of one Hieronyma Spara, a pupil of Tofana. Spara and many of her society were put to death after confessing, under torture, to numerous crimes.

FROM BONNIE SCOTLAND ON

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going On in the Highlands and Lowlands of Auld Scotia.

Montrose coopers are sure of a good winter's work.

Bigger yearly benefit society has now a capital of \$8,910.

A white porpoise has been caught in St. Andrew's Bay.

The prospects of the mining industry at Galston are not bright.

Business is in a fairly prosperous condition at Leith Docks.

Kirkcounell is getting a new drainage scheme, to cost \$15,000.

A syndicate of Glasgow men may erect a promenade pier at Gourrock.

Lord Kitchener has been visiting his aunt, Miss Hutchinson, at Banchory.

Aberdeen Harbor Commissioners report revenue for the past nine months of \$238,535.

A movement has been set on foot in Torryburn to inaugurate a pipe band for the village.

Crief Town Council is faced with a deficit of \$1,000 on the new instruments for the Town Band.

Rutherglen burgh assessments aggregate 11d. per £ on owners and 1s. 10d. per £ on occupiers.

Mr. Wm. Robertson, the Glasgow shipowner, has presented a public park to his native town of Renfrew.

The number of military in Scotland ready for duty on an emergency may be roughly estimated at over 5,000.

Berwick authorities have been given six months to secure a proper supply of water and also sufficient sewers.

Carlisle miners have passed a resolution protesting against the employment of women and girls at pit banks.

Mr. David Fyfe, second engineer, Innerleven, purchased a share in a lottery ticket at Buenos Ayres, and it has yielded him a prize of \$4,250.

While Wm. Houghton (20) mechanic, Blackburn, was escorting a young lady home from a party in Annan the other day, he died suddenly on the roadside.

The opening of the new Girvan Town Hall, erected and endowed at a cost of over \$75,000 by Mr. John McMaster, banker, Canterbury, was made the occasion of a public holiday.

The report of the gold prospectors at Kildonan is disappointing. Suisgill has been a failure, and even the Gold Burn will not pay expenses. So there will be no gold rush in the Highlands.

William Lennie, a Renton school-boy has been presented with a Royal Humane Society certificate for saving life, and also with a silver watch from the Carnegie Hero Fund.

The recent ball at Airth Castle, on the occasion of the coming out of the daughter of Mr. and Mrs. McLaren, was the first gathering of the kind that has been held for over 100 years in the old pile.

A remarkable family gathering has taken place in West Linton village, when three brothers, Melrose, met their sister Jennie. Their united ages make a total of 244

seen large bear skins, in addition to a number of other valuable peltries.

The Triangle ranch of 11,000 acres in the Nicola valley, has been sold for \$200,000. Included in the deal were 50 horses and 1,700 head of cattle.

A party of hunters near Kamloops, B.C., recently saw an immense flock of pelicans, a bird rare in this country. They did not get within gun shot.

A black bear recently visited a ranch near Canyon City and ate three pounds of butter and two jars of preserved berries that he found in a refrigerator.

With a total of \$16,250 the building permits issued in Nelson, B. C., during August showed the tremendous increase of 560 per cent. over the total for the same month last year.

Vancouver Island coal properties lying between Nanaimo and Ladysmith, embracing 2,400 acres and estimated to contain approximately 30,000,000 tons of fuel, have just been consolidated into an operating proposition.

A FLAMING MOUNTAIN.

Was Set on Fire by Lightning Early in August.

The Simmenfluh, a mountain near Spiez, in Switzerland, was set on fire by lightning on August 20, and has been burning ever since. This flaming mountain, or rather range, presents so extraordinary an appearance that people come from all the country round to see it.

In the daytime the mountain is enveloped in smoke, while the valley on one side of it, the Simmental, is overhung with a thick pall. At night the mountain looks just as Vesuvius does in full eruption. Avalanches of fire can be seen at times swiftly descending the couloirs, while huge fiery boulders frequently rattle down, of course setting something fresh alight wherever they settle. One thing which has fed the flames extraordinarily is a thick bed, in some places more than three feet deep, of undisturbed accumulations of pine needles, dead leaves, bits of bark and dried twigs, which covered the ground on the mountain, and is, of course, highly combustible.

The Simmenfluh, the mountain in flames, must have been a favorite resort of chamois. Now that it is on fire the chamois have had to take refuge on a certain alp (mountain pasture) not very far away, but very much lower down than these shy animals generally care to come. About a hundred of them may now be seen peacefully grazing on this alp, just as if they were so many sheep or goats.

The meadow being in a district which strictly prohibits chamois hunting, they are perfectly safe from being shot at. They are, however, eating up all the Autumn feed for the cattle, and the peasants who own the alp, or have cow rights over it, have just sent in a petition to the Government asking for compensation, otherwise they will be obliged to chase the chamois away into another district whose local authorities allow chamois hunting.

As the chamois shooting season has just begun, and as there are not too many chamois in Switzerland, the Government will probably accede to the peasants' request for compensation, rather than risk the loss of a number of these cherished and in many districts protected animals.

were not, however, a very united couple. She left England with her mother eight or nine weeks after her wedding for a prolonged tour in the East, Lord Donegall remaining behind on the ground that his age rendered him unable to put up with the fatigues of travel.

WAS PRESENTED AT COURT.

Lady Donegall was presented at Court prior to her marriage, by Lord Strathcona, and he, by reason of his friendship for the Twining family, also gave her away on the occasion of her marriage. He has been very good to her since, and it is his support, and that of Lady Strathcona, which have enabled her to live down, in a measure, the very pronounced prejudice created against her by her marriage with a peer, not only sixty years her senior, but of so deplorable a reputation as the late Marquis.

Her boy, the present Marquis of Donegall, is now seven years of age, and in spite of his being still in pinafores and knickerbockers, is a British Lord High Admiral. This dignity comes to him by inheritance along with the Earldom of Belfast, the Viscount of Chichester, and the Barony of Fishwick, etc. His naval office is that of Hereditary Lord High Admiral of Lough Neagh, which is the largest lake, not merely of Ireland, but also of the United Kingdom, covering an area of 153 miles, and with a coast line of sixty-five miles. The title dates back to the sixteenth and seventeenth centuries, when the lake was the scene of many important naval battles, the last one fought on its waters having occurred in 1642. Recently a scheme has been under way for the draining of the lake, with the object of rendering the land which it covers available for agricultural purposes. As its depth averages from thirty to forty feet, and as it is about seventy feet above sea level, the more deepening of the River Bann would suffice to drain the lake, the disappearance of which would also tend to dispose of the popular legend as to the existence of an ancient city buried beneath its waters, of which the poet Thomas Moore wrote as follows:

On Lough Neagh's banks as the fisherman strays
When the clear, cold eve's declining,
He sees the round towers of other days

In the wave beneath him shining.

A KIND ENQUIRER.

A little lad was very ill, and his companion living in the same street had been asked not to make any noise. The invalid's mother received a visit from one of these lads.

"How is he to-day?" he enquired in a shy whisper.

"He's better, thank you, my dear. What a thoughtful child you are to come and ask!"

The boy stood for a moment. "I'm orful sorry Jimmy's ill."

The mother was profoundly touched. She could find no further words to say, but simply kissed him. Made still bolder by the caress, the youthful caller began to back down the steps, repeating at intervals his sorrow for his playmate's illness. On the bottom step he halted and looked up.

"If Jimmy should die," he asked, "kin I have his drum?"

No man is truly great unless he is able to convince his neighbors that he is.

the discovery of a society of young matrons banded together for the purpose of poisoning their husbands. These women were under the direction of one Hieronyma Spara, a pupil of Tofana. Spara and many of her society were put to death after confessing, under torture, to numerous crimes.

In a letter to Hoffman, Garelli, the physician to Charles the Sixth of Austria, writes that his sovereign informed him that while Governor of Naples, during the trial of Tofana, he had an opportunity of examining the documents of the case and that he found from them, aqua Tofana to be crystallized arsenic in water. The symptoms of the poisoning by this solution as recorded by Hoffman correspond in detail to symptoms of arsenic poisoning.

From Italy this poison found its way into France, where in 1670 there was another era of secret poisoning by arsenic. This time its perpetrator was not one of the lower class, but an intimate of the court of Louis XIV., Maria Margaret, Marquise de Brinvilliers. An educated daughter of the Captain of the Court Guard, married to an overindulgent husband who would not suspect her fidelity, she fell a ready victim to the wiles of

A VILLAINOUS SOLDIER,

Jean Baptiste de Gauden, Seigneur de St. Croix.

While incarcerated in the Bastille he was taught the preparation of poison by a state prisoner named Eli. After his release from confinement he took to professional poisoning as a means of filling his coffers with gold. He was killed instantly by the fumes of a poison he was preparing. His domination over the Marquise seems to have been absolute, and she became a zealous accomplice and an adept pupil of his wickedness.

Among St. Croix's goods confiscated by the State was found poison enough to kill the entire community, together with many documents incriminating the Marquise, who fled to England to escape arrest. After she had been enticed back to France she was put on trial, was convicted, and on July 16, 1676, was beheaded for her crimes. Among her papers was found one giving a complete confession of her criminal actions.

Not content with killing her entire family to gain funds with which to meet the extravagant tastes of St. Croix she even went so far as to assume the habit and duties of a nun, so that she might, under the protection which that dress afforded her, administer her poisons to the poor and to the afflicted at the Hotel Dieu simply to tell the strength of her concoction. The drug used by her and by St. Croix was arsenic.

EXPERIENCED MABEL.

"John," said the sweet young thing about to get married, "I hope you won't be like all the other married men."

"What do you mean, my dear?"

"Mabel says they're all alike. She was over this afternoon giving me the benefit of her experience. You know she knows all about men."

"She does? And when was Mabel married?"

"Last June."

LIKE FATHER, LIKE SON.

"I won't pay another penny of your debts for you, you disgrace. You must either go bankrupt or get married. I had to do the same."

the daughter of Mr. and Mrs. McLaren, was the first gathering of the kind that has been held for over 100 years in the old pile.

A remarkable family gathering has taken place in West Linton village, when three brothers, Melrose, met their sister Jennie. Their united ages make a total of 344 years; Willie being 81, Jamie 84, Robert 87, and Jennie 92.

LONDON HAS 7,252,963.

Still Far in the Lead as the World's Largest City.

London's latest census returns for the administrative County of London are 4,522,961, and for the outer ring 2,730,002, thus making the total population for Greater London 7,252,963.

The area of the administrative county is 116.8 square miles and the area of Greater London, which includes all parishes within 11 miles of Charing Cross, is 693 square miles.

New York, in all of its five boroughs, boasted of 4,776,883 persons in 1910. The population is now estimated at more than 5,000,000. Walter Laidlow, the statistician, has estimated that his "Greatest New York," comprising a circle 19½ miles as the radius and City Hall as its centre, will, between June 7, 1914, and January 18, 1916, pass the population that London will then have. Such a boundary line for New York would include parts of Westchester and Nassau counties, as well as parts of Hudson, Essex and Bergen counties, New Jersey. It would include 74 suburbs. Its area, exclusive of about 40,000 acres of swamps and lakes, would be 480,000 acres as compared with 443,419 acres in Greater London.

THE DECLINE OF EXERCISE.

Physician Thinks Motors Are Making People Lazy.

Any one who takes an outing, particularly at the seaside, can hardly fail to notice the revolution that has taken place during the last decade in the methods of enjoying a vacation, says the Medical Journal. The automobile whizzes by on the roads and the motorboat sputters noisily within sight of the shore, each bearing its crowd of pleasure seekers, while even the swimmers are supported, a large proportion of them at least, by an artificial contrivance designed to keep them afloat without exertion.

Rowing, walking and swimming are the three ideal exercises, all demanding the open air and all having definite objects apart from their excellent effect on bodily health. But the modern amusements, such as motoring and motor boat racing, have nothing to recommend them save that they too require outdoor space.

Golf seems to be increasing the number of its devotees, even if the latter go to the links in high powered cars. It is not only the rich who become lazy; the omnipresent trolley car embodies the favorite recreation of the poor.

MUCH THE SAME.

A foreman, seeing a workman crossing a scaffold to another along a plank on his hands and knees, shouted out to him:

"Are you afraid of walking on one plant?"

"No," replied the workman, promptly; "I'm afraid of walking off it."

LAND OIL THAT WILL NOT EXPLODE

FROM A CHILD CAN LIGHT IT WITHOUT DANGER.

Invention Which Will Paralyze Oil Trade—Made From Any Mineral Oil.

A London Express representative, sitting in the drawing-room of a South London villa was suddenly startled by the calm statement of his host, "I am going to knock this lamp over."

An ordinary cheap lamp, of the kind that may be safely guaranteed to explode if knocked over, stood on the table, and on the floor were a number of newspapers. In fact, there were all the materials for a thorough going domestic fire tragedy.

But when the lamp was upset there was no explosion, though the oil ran forward, came in contact with the flame, and spread over the table. The man simply picked up the lamp, righted it, and blew out the flame.

BURNS WITH STEADY LIGHT

The lamp was not filled with ordinary paraffin, but with a particular form of that oil which absolutely will not explode. It will do all else that paraffin should do. It looks like paraffin. It smells like it, though the scent is not so strong. It burns with a steady, clear light.

But a child can light a saucerful of it without danger. You can pour more oil from a bottle on the burning liquid in the saucer. If you did this with paraffin the bottle would blow up in a moment.

You can blow out the flame in the saucer quite easily. To try to blow out a paraffin flame is to court disaster.

The discovery of this new oil—Neo Petrol is its name—is a romance of science. A Dutch chemist named Knottenhelt has been doing nothing else for ten years but look for this safety paraffin. He found it recently, but at first had not the remotest prospect of placing it on the market in competition with the ordinary dangerous oils, because of the price at which he would have been obliged to sell it.

TURPENTINE—BY-PRODUCT

One day, however, a friend commented on the fact that the manufacture of Neo Petrol set free two by-products, one of which bore a remarkable likeness to turpentine. It was tested, and found to perform all the functions of turpentine, though it is chemically a different substance.

This by-product can be put on the market at less than half the price of turpentine, which is an expensive material, and even then it leaves a good margin of profit. It is this margin which has enabled the inventor to put his safety oil on the market at the same price as the ordinary oil.

Dutch commercial men were so impressed with Neo Petrol when it was demonstrated in Holland that they subscribed a capital of \$50,000 for the erection of a factory, and both the new oil and the turpentine substitute are now on sale in Holland and Belgium. A large factory is projected in England, and America is keen on it.

Neo Petrol can be made from any mineral oil samples having been

FROM MERRY OLD ENGLAND

NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

Occurrences in the Land That Reigns Supreme in the Commercial World.

The lowest rainfall for London was 16.93 in 1864.

By the end of this month the horse bus will have practically disappeared from the London streets.

Lundy Island, the granite rock off Devon, on which dwell 35 people, is free from all rates and taxes.

The East Ham Town Council have agreed to the request of their tramway men for one day's rest in seven.

Newcastle Guardians have decided upon an expenditure of \$100,000 for increased hospital accommodation.

A five-year-old girl named Elsie Annonson swam a distance of 100 feet at a swimming carnival at Crogdon (Surrey) baths.

Duncan Cunningham, aged 101, was accused at the Stratford Police Court of being intoxicated. The magistrate let him go.

Mrs. Clark, who is in her 89th year, was the winner of the first prize for Buckinghamshire lace at Beaconsfield Flower Show.

Some 900,000 Londoners are at present living more than two in a room; while for six or more in a room the figure is 26,000.

The abolition of the petticoat by the hobble skirt is blamed for an annual falling off of \$1,729,695 in the Nottingham lace industry.

Miss Stancomb Willis, an adopted daughter of the late Lord Winterstoke, has presented \$50,000 to Bristol Grammar School in memory of Lord Winterstoke.

Mr. R. C. Forster, London, has gifted to the University College of London, \$172,500 for the building and equipment of the laboratories of the College.

A woman told a London magistrate that her husband threw her dinner, the dinners of the ten children, and his own dinner on the floor, and the terrier ate them.

A party of Territorials to the Duke of Cornwall's Light Infantry, encamped at Minehead, was bathing in the sea when three of their number were carried away.

It is proposed to establish at Wimbledon a dispensary in which persons suffering from tuberculosis can be seen and advised, and if necessary treated with tuberculin.

Burglar alarms at premises in Percy street, Tottenham Court road, London, were rung by a stray cat, and a large crowd collected while the police searched the place.

Much alarm has been called in North Devon and North-west Cornwall, by a reported outbreak of spotted fever and infantile paralysis. The cause of the epidemic is not known.

Mr. George Hemmings, aged 54, who shot himself at Honor Oak Station, London, left a letter giving minute directions for his burial, and among other things that the family Bible should be placed in his coffin.

Part of the Duke of Bedford's Devonshire property was sold by auction at Tavistock recently, and realized \$75,000. The property comprised 11 hotels and inns, other business premises, and about 8,500 acres in the neighborhood.

TREES THAT GROW IN CUPS

EXAMPLES OF JAPANESE GARDENING SKILL.

Remarkably Clever at Controlling the Growth of Trees and Flowers.

The Japanese are past-masters in the art of landscape gardening. For hundreds of years generations of artists have been busy perfecting it, elaborating and refining over and over again the principles handed down by their predecessors, until it has come to be considered a mystery as well as an art. It is a mystery, too, which is likely to continue, for there are few secrets more jealously guarded than those which the Japanese gardener keeps locked within his breast.

A GARDENING SECRET.

One of the things in which Japanese gardeners excel is the transplanting of large trees. There seems to be practically no limit to their achievements in this direction. Neither the size nor the age of the tree appears to make the slightest difference; the most ancient and massive of forest giants is removed with the same apparent ease as the most youthful of saplings.

Exactly how it is done is known only to the Japanese themselves, but a good deal seems to depend on judicious treatment of the accessory roots. In the case of very large trees this treatment may extend over two or even three years but as a rule from three to eight months appears to be sufficient. Whole forests can be removed in this way and planted somewhere else, so that it is quite possible for a Japanese nouveau riche to raise up any trees he likes—even an ancestral park—on whatever spot he fancies.

GIGANTIC BLOOMS.

Again, Japanese gardeners are remarkably clever at enlarging or exaggerating the trees and flowers of their country. Take, for instance plums and cherries. These are cultivated in Japan, not for the fruit, but for the flower. By a peculiar treatment the gardeners so improve the blossoming qualities that the blooms become as large as roses; indeed, plum blossoms have been seen four times the size of our common cabbage roses. By methods known only by themselves they are also enabled so to train the branches of their trees that in many cases they afford a shade and covering of more than a hundred yards in circumference. Sometimes the branches are led out across ponds and rivers with delightful effect, bamboo props being introduced as supports at suitable points.

HOW IS IT DONE?

It is, however, in the opposite direction, that of stunting or dwarfing the growth of their trees, that the Japanese display their greatest ingenuity. The method of producing these miniature trees is, perhaps, the most carefully guarded of all the secrets known to the gardeners of Japan. It is the result of numberless experiments directed and controlled for hundreds of years by the powerful guilds of florists which from time immemorial have existed in the land of the Mikado. These experiments have enabled the Japanese to produce fully-grown trees, perfect in every part but not more

ROMANCE OF RUBBER SEEDS

ENGLISHMAN SMUGGLED THEM OUT OF BRAZIL.

Seeds Were Used to Start the Great Plantations of the Far East.

H. A. Wickham tells an interesting story of how he smuggled into England from Brazil the first seeds of the hevea tree taken from that country. The hevea is the tree that yields the best kind of Para rubber, and from the seeds Mr. Wickham brought to England in 1863 have sprung all the trees now growing in the Eastern tropical countries.

In 1863 Mr. Wickham was in the high tableland between the Tapajos and the Madeira, two tributaries of the Amazon. Here he found plantations of the hevea trees, and struck by the possibilities they offered for exploitation he returned to England and endeavored to persuade his friends to take the matter up, but they laughed at the idea of cultivating a forest tree growing wild in the jungle. Fortunately, however, Mr. Wickham came across Sir Joseph Hooker, of Kew Gardens.

The scientific botanist was more farsighted than the financiers of Throgmorton Street. Sir Joseph had actually been trying to induce the Government of India to take up the cultivation of rubber, and he gave Wickham a commission to go out and try his luck on behalf of the India Office.

"The Brazilian Government," says Mr. Wickham, "was doing its best to keep the knowledge of the existence of these trees a secret, and was quite certain to forbid the export of any seeds. But I went back to Santarem and

WAITED MY OPPORTUNITY.

"It was a long time in coming. I was trying all sorts of ways to get some of the seeds out of the country, but without success. At last my chance came. One day the few Europeans who lived on the upper Amazon were startled by the apparition of a big ocean liner, which was to bring the upper reaches of the Amazon into connection with Europe.

"Soon after this I was astonished to hear that the supercargos had cleared out all the cargo and left the ship on the captain's hands. I did not hesitate a moment. I chartered the ship on behalf of the Government of India, and then started off up the Tapajos in a canoe to gather the seeds.

"It was ticklish work. My little canoe was often nearly upset on the rushing river. I got together as many of the Tapuyo Indians as I could, and we ranged the forest and gathered all the seeds we could find. I got the Tapuyo Village maids to make openwork baskets of split cane, into which we packed the seeds in layers of wild banana leaf.

"I was the only white man in this primeval forest. It was a scene of wonderful beauty, the abode of strangely plumaged birds and selfish little Ti'ti monkeys which never descend to the ground throughout their lives, but spring and gambol about in the aerial gardens of dainty ferns and sweet smelling orchids, for every tree supports an infinite

pressed with Neo Petrol when it was demonstrated in Holland that they subscribed a capital of \$50,000 for the erection of a factory, and both the new oil and the turpentine substitute are now on sale in Holland and Belgium. A large factory is projected in England, and America is keen on it.

Neo Petrol can be made from any mineral oil, samples having been tested for this purpose from Austria, Roumania, the Russian Baku district, and Burma.

HOT COFFEE WITHOUT FIRE.

Ingenious Hod Carrier Devises Way to Get it Steaming Hot.

Cold coffee is not over-palatable, but it is difficult for those who carry luncheon to work to get it hot without buying it, and many cannot afford that. There is in Brooklyn, N. Y., however, one man always has his coffee hot at noon—a pint of it—and brings it to work with him. He carries no vacuum bottle to keep it hot and probably never heard of a fireless cooker, for he is only a hod carrier, but he has devised a means by which his cold coffee is rapidly heated to the boiling point.

As soon as the whistle blows to quit work at noon this inventive son of sunny Italy goes to the street and makes a small circular hill of sand. In the centre he sets his flask with the screw top loosened sufficiently to let the steam escape. About it he places two or three pieces of unslaked lime, on which a little water is poured. The lime then is covered with sand, which is packed closely around the bottle.

Within a few moments the water begins to take action on the lime and it is not many more minutes before the coffee begins to steam. Then its owner removes it, wiping the lime and sand from it, and pours out his coffee, boiling hot.

He said he had learned the trick one day when he accidentally spilled some lime on his arm. As it burned him, he argued it should be able to heat a kettle.

FATHER OF THE FLEET.

Lord John Hay, G.C.B., Who is 84 Years Old.

The senior Admiral of the Fleet on the retired list is Lord John Hay, G.C.B., who has celebrated his eighty-fourth birthday. A younger brother of the present Marquis of Tweeddale, he was born at Geneva on August 23, 1827, and entered the Navy as a midshipman in 1839. Three years later he was engaged in the Chinese War, and in 1854-5 served in the Crimea before Sebastopol. He was Commodore on the East India Station in 1861-3, and during his command of the Chanuel Squadron in 1877-9 took original possession of and administered the Island of Cyprus. From 1883 to 1886 he was in command of the Mediterranean Station, and afterwards Commander-in-Chief at Devonport. Lord John, who since his retirement has resided at Fulmer Place, Slough, was for brief periods M.P. for Wick, Scotland, and Ripon, and four times a Lord of the Admiralty.

Coal-mining in England and Wales produces a yearly average of about 220,000,000 tons.

Latest figures show that during the last three years pork-eating has considerably increased in Paris.

ing minute directions for his burial, and among other things that the family Bible should be placed in his Coffin.

Part of the Duke of Bedford's Devonshire property was sold by auction at Tavistock recently, and realized \$75,000. The property comprised 11 hotels and inns, other business premises, and about 8,500 acres in the neighborhood.

About 30,000 children took part in the annual parks demonstration of the London United Temperance Council in the principal parks of London. They took part in various competitions, were addressed by well-known temperance advocates, and eventually "marched past."

OLD FALLACY EXPLODED.

The old notion of Sir J. Herschel and others that the full moon clears away clouds is no longer held by meteorologists. The view of the present day is confirmed by W. Ellis, F.R.S., from the Greenwich records, which show that a maximum in the evening is the general rule, so that moonlit evenings, instead of being clearer than others, have their freedom from clouds brought to notice by the moon's brightness.

ROYAL TEETOTALLERS.

Children Being Brought Up Total Abstinents.

The fact that both the late king and King George had given permission for the loyal toasts to be drunk in non-alcoholic beverages was referred to at the Rechabite conference at Southport, England, by the high chief ruler, J. Philipson, of Newcastle.

While in Australia recently, he said, he had an interview with Admiral King Hale, an enthusiastic temperance advocate, who stated it was he who was instrumental in getting King Edward to make public his consent to the loyal toasts being drunk in water, and in getting King George to extend the permission to subjects overseas.

Mr. Philipson added it was fairly well known that Queen Mary was partial to total abstinence principles, and while in Australia he met a gentleman who had sailed with the present king, and was still in touch with the royal family, and this gentleman told him that all the king's children were being brought up as strict abstainers.

WOMEN HORSE SLAUGHTERER

New Occupation For Gentle Sex to Choose.

England has a curiosity in women's occupations. Miss Mary Payne is a feminine woman, but she is a slaughterer of horses for all that, and holds a Government license for the job.

She operates in public whenever an accident cripples a horse so that a quick execution is a merciful action to take. The other day, when a race-horse fell in some races in the Midlands, it was Miss Payne who stepped into the course and dispatched the animal with skill and expedition.

Several modern women of education are now in training as veterinary surgeons, especially in Ireland. Their aim is particularly to practice as specialists in domestic animals, for big fees are available to those who can cure my lady's pets. But Miss Payne remains unchanged as the only professional killer of horses in all the realm of King George.

the most carefully guarded of all the secrets known to the gardeners of Japan. It is the result of numberless experiments directed and controlled for hundreds of years by the powerful guilds of florists which from time immemorial have existed in the land of the Mikado. These experiments have enabled the Japanese to produce fully-grown trees, perfect in every part but not more than a foot or so in height, which in their natural state would grow to at least 40ft. or 50ft.

AMAZING GARDENS.

Some amazing results have been attained in the production of these diminutive trees. A year or two ago, for example, there was sold in a London auction-room a box containing perfect specimens of a fir tree, a bamboo, and a plum tree, the last-mentioned in full blossom. The box was no more than 3in. in length by 1in. in breadth. Another very small box contained miniature specimens of every tree that grows in Japan.

The planning of miniature gardens is a work of marvellous ingenuity and artistic skill. A start is made by planting pigmy trees, a foot or two perhaps in height. Then at a distance of six or seven yards, a background of miniature mountains is built up, after the fashion of a rockery. From the foot of these mountains flows a tiny stream—a mere trickle of water, which, as it nears the foreground, expands into a raging torrent, quite a foot in width. Marble bridges span its course at intervals, while tiny pagodas and Lilliputian temples also find a place in the general scheme.

The whole forms a picture on which the eye delights to dwell, so daintily and yet so faithfully is Nature's handiwork reproduced. What strikes an observer most is the clever way in which the sense of distance is conveyed. This is done by diminishing the size of the river, temples, trees, and other features of the landscape until the proper perspective is obtained.

HUNDREDS OF YEARS OLD.

Though the best and quickest methods of producing these miniature trees are known only to the initiated, there are certain general principles with which every Japanese gardener is more or less familiar. The first of these concerns the planting of the selected seed or cutting. A tiny jar is taken containing exactly one inch, neither more or less, of specially-treated soil; in this, at the depth of half an inch, is placed the seed. In course of time the roots begin to grow, and owing to the shallowness of the soil force their way upwards in search of nourishment. As fast as they appear they are cut or pruned away, either with a knife or, in some cases, with the finger-nails. A similar operation is performed on the branches and upper parts of the tree.

During all this time the growth of the plant is kept under strict control, the rule being to give it no more nourishment than will just suffice to keep it alive. After a while the tree is repotted in earth a little deeper, and this process is repeated until the plant has attained its full growth. With careful treatment such a tree may flourish for hundreds of years.

Eighteen hundred miles is the measurement of the coastline of England and Wales.

leaf.

"I was the only white man in this primeval forest. It was a scene of wonderful beauty, the abode of strangely plumaged birds and selfish little 'Ti Ti' monkeys which never descend to the ground throughout their lives, but spring and gambol about in the aerial gardens of dainty ferns and sweet smelling orchids, for every tree supported an infinite

VARIETY OF PLANT LIFE.

"I was working against time. We all labored with furious energy, and many long days' tramping lay before us until we got back to the banks of the Tapajos with our precious burden of seeds. Then we started off in our canoe and got down to the junction with the Amazon, where we picked up our steamer. She was empty of cargo, so that we could hang up our treasure trove in the vacant forehold, where it had the advantage of plenty of air.

"But another difficulty stared me in the face. We were bound to call at Para in order to obtain a clearance for our ship before she went to sea. I was perfectly certain that if the authorities guessed what sort of cargo we were carrying we should be detained under the plea of waiting for instructions from the Central Government at Rio, even if we were not forbidden to take the seeds away. I knew the difficulties Sir Clements Markham had had to encounter in getting cinchona bark away from Peru.

"Fortunately I had a friend at court in the person of the British Consul. He entered into the spirit of the thing and went with me on a special call on the chief of the Alfandiga and backed me up nobly when I said that I was in charge of a ship which contained delicate botanical specimens specially gathered for her Britannic Majesty's own

ROYAL GARDEN AT KEW.

"An interview, carried on in the most polite manner, full of mutual compliments, paid and received in the best Portuguese manner, enabled me to get under way as soon as the captain had got the dinghy hauled on board. As you may imagine, we did not waste much time. I soon had the hatches off and the openwork crates slung in the open air.

"We had fine weather all the voyage home, and I did not lose much time in getting to Kew when we reached England. Sir Joseph Hooker was delighted. The seeds of the bevea did not fail to respond to the care I had taken with them. plants in the glass-houses all a fortnight later we had 70,000 flourishing. Some of them were despatched to the Eastern Botanic Gardens at Colombo."

The great industry that has resulted from this successful piece of smuggling may be judged from some of the figures of rubber production. British Malaya, for instance, grew 1,036,553 pounds of rubber in 1905. Last year the production was 12,245,864 pounds. In the same four years the output in Ceylon went up from 146 tons to 1,601 tons. Now the cultivation has extended to Southern India, which promises in the near future to supply the world with large quantities of rubber.

Orders for the construction of innumerable new roads throughout Afghanistan have just been issued by the Ameer, who has become a keen enthusiast on motoring.

TREATING THE FOREST AS A CROP.

The progress of the Conservation policy of Canada, as applied to forest resources, depends more upon the Forestry Branch of the Department of the Interior than upon any other organization. Upon the technical knowledge and executive ability of the officers of the Forestry Branch depends the future of the forest on 16,000,000 acres of Dominion Forest Reserves, as well as upon the large area of non-agricultural forest land in Western Canada, which for the good of the country may yet be set aside as permanent forest reserves. In addition looking after Dominion lands the Forestry Branch is now being asked by Eastern land owners to furnish advice as to the best means of securing at the earliest date a profitable crop of timber on waste land or wood-lots. The proper administration of forest lands requires a special knowledge of the trees best adapted to each region, of their uses, and of the markets. Further there is needed knowledge of the habits of all trees, especially of the merchantable species, so that it may be known how rapidly they grow how they produce their seed, when and under what conditions the seed germinates, and in what way the seedlings and young trees are affected by their surroundings. Such knowledge is gained only by long study and experience. In order that the new Rocky Mountain Forest Reserves may be administered according to the latest scientific knowledge and the best experience, the Forestry Branch is now making detailed studies of the habits of the merchantable species of trees on the Eastern slope of the Rockies in Alberta and has sent one of the men in charge of the work to study the systems of forest management practised during the past few years by the highly developed United States Forest Service in the National Forests of Montana. The United States foresters have spent large sums of money and availed themselves of the experience of many men in developing plans of lumbering which do not inconvenience the lumbermen but which ensure the protection and reproduction of the forest and the Canadian Forestry Branch intends to benefit largely by their experience.

Lost and Found.

"The year was covered the bracelet she advertised in my paper as having been lost," inquired the editor of his friend Smiles.
"She has," said Smiles. "But"—
"Where you are?" chuckled the editor.
"That brace what advertising will

PRESS COMMENTS.

St. John N. B., Telegraph and Sun.

Tariff reduction is so sane a policy, and in the calm hours of Canadian politics it has so many staunch adherents in this country, it is bound to come to its own again in the not distant future. Tariff for revenue only is the true Liberal policy.

Charlottetown, Patriot.

The battle of the ballots has been fought and the Government of Sir Wilfrid Laurier has been defeated. It is a tragic yet sublime spectacle to see a great party court defeat in battling for the rights and liberties of the people, fighting in defence of a principle.

Saskatoon Phoenix.

The truest Canadianism demands that this country shall live above the notion of an exclusive little Canada that closes its eyes to the facts of force and militarism as they exist in the world. But just how the Government will deal with the navy problem remains for them to settle. That is up to the loyal Tory party.

Woodstock Sentinel Review.

There seems a possibility of an overdose of politics. There is talk of a Provincial election this fall, and, of course, there is Mr. Borden's referendum on the navy question. In the event of the Whitney Government deciding to go to the country soon, perhaps Mr. Borden could be induced to delay the referendum on the navy for a time.

Ottawa Free Press.

When Joseph Girard, the new M. P. for Chicoutimi, was voting as a Liberal he was the subject of investigation by the Conservatives in the Public Accounts Committee on the charge that he had been financially interested in some contracts. Will he be politically all right, now that he has turned his coat again and become a Conservative once more?

Indian Head Vidette.

He told his twenty-year-old son to milk the cows, feed the horses, slop the pigs, hunt up the eggs, feed the calves, catch the colt and put him in the stable, chop some wood, split the kindlings, stir the cream, pump fresh water in the creamery after supper, and be sure to study his lessons before he went to bed. Then he went to the farmers' club to discuss the question "How to keep the boys on the farm."

Regina Leader.

Laurier has not yet finished his work. And the wish of all Canada is that he may yet be long spared in health and vigor to assist in further advancing the prosperity and happiness of the Canadian people, and further cement them together into a great nation, undivided by petty racial and religious differences, but working together for the upbuilding of their common country and the greatest of all the great Empires, past as well as present.

Winnipeg Tribune.

The men who till the prairies in the three great western Provinces are, even now, the backbone of this Dominion. Very soon we shall hear from their leaders how they regard the verdict. The cities and towns may outvote them, but it is unreasonable to suppose that great consideration is not to be shown to the basic producers

THE BASQUES.

Picturesque Shepherd Race of the Pyrenees Emigrating.

Because the sheep-raising regions of the west need just such persons to care for the millions of animals in their flocks, emigrants from the ancient race of peculiar people, the Basques, are leaving their mountain homes in Europe and coming to America. These long-headed, low-statured men trace their ancestry back to the bronze age. At one time in the dim past they were numerous in the eastern part of Europe, but the stock has dwindled down to half a million or so in number. The territory they inhabit lies partly in France and partly in Spain, being on both sides of the Pyrenees mountains. In this stronghold they have been able to hold their own while nations were made and unmade all about their mountain retreat.

The Basques are a peculiar people. Proud and independent, they count every man a noble. For a long time they virtually governed themselves, but after the Carlist rebellion was stopped there was a slight change. They had clung together by a system of small republics, but lost some of their liberty as a penalty for having foolishly permitted the Carlists to gather revolutionary forces in their country. Despite this, however, they are yet a long way from being as subservient as the ordinary European peasants. Only a few weeks ago 125 of these Spanish Basques landed in New York city on their way west. Nearly half the nation's sheep are cared for on that great mid-mountain plateau extending from Montana on the north to New Mexico and Arizona on the south, and it is in this region that these expert sheep-herders of the old world will find employment.

For untold generations the Basques have been shepherds. They possess most of the virtues and few of the vices of our own civilization. With their pride and independence they combine rugged honesty, thorough reliability and an inherited liking for the work they are to perform. For all we know, their forbears were herding cattle along the Nile or doing great things in north Africa thousands of years before our modern, highly civilized races were dreamed of.

The language of this peculiar race, long a matter of dispute, is of much earlier origin than any of the European or Semitic tongues. Its roots, in fact, are more those of Mongol, North American or African forms. The Basque tongue was once spoken, it is supposed, throughout Spain, as many of the old Iberian words are derived from it.

Gradually the once great race gave way to newer ones, that now rule, and was confined to a few provinces in Spain and France, but it has never lost a tithe of its independent spirit. Traditionally proud as are the Spaniards, the Basques go them one better in haughtiness of bearing. No Pharaoh had more pride of ancestry than this little remnant of prehistoric people.

The men, physically, are superb. They are of bulldog build, strong, hardy and enduring. As for the women, they yield to none in charm in their youth. It's a pretty sight to see the Basque girls tripping down the street to church of a Sunday or fete day morning in their white sandals, halts, their hair gathered into a knot which is hidden from sight by a black or colored silk handkerchief, and dressed, as a rule, in gayly colored blouse and dark skirts. The older women's dress on such occasions is almost unlike in its severity. Heavily hooded black cloaks cover them up from top to toe; one can barely discern their faces even through the loose black veils which fall from the hood. Here and there one may see a girl wearing a mantilla; but that headgear is more peculiar to the señoritas on the other side of the mountains (in Spain), and bare heads are the prevailing fashion among the maids of the French provinces.

With the men, distinguishing fea-

First Title of "Vanity Fair."

Brighton, England, holds memories of Thackeray. It was while staying at the Old Ship that he commenced a novel which was to be called "Pencil Sketches of English Society." One night as he was lying in bed a better title suddenly occurred to him.

"I jumped out of bed," he told Miss Perry afterward, "and ran three times round my room, uttering as I went, 'Vanity Fair, 'Vanity Fair, 'Vanity Fair!'"

Protection.

"I understand that you don't speak to your neighbors."

"Not any more than necessary," replied Mr. Grouner. "Of course they are nice neighbors, but we also have a fine cook, and we don't care to have them get acquainted with her."—Washington Star.

Lost and Found.

"Has your wife recovered the bracelet she advertised in my paper as having been lost?" inquired the editor of his friend Smiles.

"She has," said Smiles. "But"—
"There you are!" chuckled the editor. "That prove what advertising will do."

"I know, but"—
"We have a circulation, my boy, a circulation! Advertise a thing one day and you get it back the next. I tell you."

"Wait a minute! Your paper didn't help us."

"Didn't help you? You say you got the bracelet back?"

"I know; but, you see, my wife lost the bracelet on Monday."

"Yes?"

"On Tuesday she advertised in your paper."

"Yes?"

"And on Wednesday she found the bracelet in our dressing table drawer!"

"I am all right now, thanks to Dr. Miles' Heart Remedy."

The same relief is ready for you. Are you sure you do not need it? If Dr. Miles' Heart Remedy helped Charles Holmes, why won't it help you?

"I was troubled with heart disease, and after reading about Dr. Miles' Heart Remedy, I got a bottle. Before I got the Heart Remedy I had to sit up most of the night, and felt very bad at my stomach. Whatever I would eat made me feel worse, and my heart beat very fast. But thanks to Dr. Miles' Heart Remedy, I am all right now. I eat good, sleep good, and feel like a new man, although I am almost 68 years old. I have been a soldier in the late war of the rebellion, and was badly wounded." CHARLES HOLMES, Private Co. B, 54th N. Y. Infantry Volunteers, Walton, Delaware Co., N. Y.

MILES MEDICAL CO., Toronto, Can.

The men who till the prairies in the three great western Provinces are, even now, the backbone of this Dominion. Very soon we shall hear from their leaders how they regard the verdict. The cities and towns may out-vote them, but it is unreasonable to suppose that great consideration is not to be shown to the basic producers of the wealth of our country. The farmers demand wider markets; they ask for entrance to the nearest and what promises to be our greatest market. Mr. Borden cannot afford to overlook, even in the face of Ontario's vote the demands of the men who are the very life of our Dominion.

Ottawa Journal.

The moral for the manufacturers is that Canadian tariff policy sounds strong because it is moderate, and that in the ultimate interest of the manufacturers themselves it should be kept moderate. The moral for free traders should be that, inasmuch as this country, whether they like it or not, is evidently fairly content with the present style of tariff, the sensible thing for free traders to do is to stop caterwauling about the fallacy and childishness of protection and to bend their energies to getting the tariff out of politics. There should be a Tariff Commission. This was an intention of the Liberal Government which the coming Conservative Government might well adopt.

Pianos.

The place to select your piano is from VanLuvén Bros. stock at Paul's music store, Napanee. We have several makes, including the celebrated Gerhard Heintzman and Newcombe. You can see the different styles, hear the different tones, and take your choice. We trade for anything, we want twenty horses on deal and give very easy terms of payment. We also sell Organs sewing machines, separators, and the celebrated Fairbanks and Harris Gasoline engines. We have two large farms sale. Will be at Mr. Paul's store Saturdays.

VANLUVEN BROS,
Moscow and Yarker.

Life In Persian Oases.

Dr. Sven Hedin, describing his overland journey to India across the Persian desert, gives a graphic account of the oases where his party occasionally camped under palm trees. There the singing birds which twitter during the day are silent at night, but the "song of the desert" is continued during the hours of darkness by the melancholy serenade of the jackals. These oases are infested by three objectionable and dangerous inhabitants—a deadly snake, black and white scorpions and a poisonous tarantula spider, which, although it lives out in the desert, is attracted to the oases by the light of the campfires.

Her Self Sacrifice.

"She's awfully self sacrificing."

"How do you make that out?"

"Well, she stayed at home from church Sunday to sit up with a sick woman."

"Huh! She isn't a regular churchgoer. I don't see anything self sacrificing in that."

"You don't? But, my dear, she had a new gown and a new hat that had just arrived Saturday night."—Cleveland Plain Dealer.

very queer faces even through the loose black veils which fall from the hood. Here and there one may see a girl wearing a mantilla; but that headgear is more peculiar to the señoritas on the other side of the mountains (in Spain), and bare heads are the prevailing fashion among the maids of the French provinces.

With the men, distinguishing features of dress are the dark blue beret, like a "Tammy," the coat thrown over one white-shirted shoulder, and the long stick, or "makilla," used as a weapon in wartimes because of its pointed metal prod.

Gradually, from one cause or another, the original strains are losing their exclusiveness. A couple of hundred thousands emigrated to South America in the last century; and now that the Basques have started to form a Pyrenees in the Rockies, it may be that the ancient race will soon be completely merged into the moderns.

A Regular Sherlock Holmes.

Under the caption "A Triumph of Sense" "Jugend" tells this story: "In the lower court of a small town in Saxony William had served faithfully and well as attendant to the presiding judge for many years without ever having received any reward aside from his legal stipend. On the day of adjournment for the season, when visitors had retired, the judge, who was also about to leave, asked, 'William, do you smoke?' Seeing a square box under the judge's arm, he answered respectfully, 'Yes, your honor.' 'I knew it by the smell of your coat,' said the judge as he walked out."

Chilly.

"Meet any icebergs on your way across?"

"No, but several of us tried to flirt with a Boston girl who was on board."—Louisville Courier-Journal.

A Wonderful Discovery.

An eminent scientist, the other day, gave his opinion that the most wonderful discovery of recent years was the discovery of Zam-Buk. Just think! As soon as a single thin layer of Zam-Buk is applied to a wound or a sore, such injury is insured against blood poison! Not one species of microbe has been found that Zam-Buk does not kill!

Then again. As soon as Zam-Buk is applied to a sore, or a cut, or to skin disease, it stops the smarting. That is why children are such friends of Zam-Buk. They care nothing for the science of the thing. All they know is that Zam-Buk stops their pain. Mothers should never forget this.

Again. As soon as Zam-Buk is applied to a wound or to a diseased part, the cells beneath the skin's surface are so stimulated that new healthy tissue is quickly formed. This forming of fresh healthy tissue from below is Zam-Buk's secret of healing. The tissue thus formed is worked up to the surface and literally casts of the diseased tissue above it. This is why Zam-Buk cures are permanent.

Only the other day Mr. Marsh, of 101 Delorimier Ave. Montreal, called upon the Zam-Buk Company and told them that for over twenty-five years he had been a martyr to eczema. His hands were at one time so covered with sores that he had to sleep in gloves. Four years ago Zam-Buk was introduced to him, and in a few months it cured him. To-day—over three years after his cure of a disease he had for twenty-five years—he is still cured, and has had no trace of any return of the eczema!

All druggists sell Zam-Buk at 50c. box, or we will send free trial box if you send this advertisement and a 1c. stamp (to pay return postage.) Address Zam-Buk Co., Toronto.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. *Charles H. The Kind You Have Always Bought

In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY

ONE MILLION DOLLARS FOR A GOOD STOMACH.

This Offer Should Be a Warning to Every Man and Woman.

The newspapers and medical journals recently have had much to say relative to a famous millionaire's offer of a million dollars for a new stomach.

This great multi-millionaire was too busy to worry about the condition of his stomach. He allowed his dyspepsia to run from bad to worse until in the end it became incurable.

His misfortune serves as a warning to others.

Every one who suffers with dyspepsia for a few years will give everything he owns for a new stomach.

Dyspepsia is commonly caused by an abnormal state of the gastric juices or by lack of tone in the walls of the stomach. The result is that the stomach loses its power to digest food.

We are now able to supply certain missing elements—to help to restore to the gastric juices their digestive power, and to aid in making the stomach strong and well.

We know that Rexall Dyspepsia Tablets are a most dependable remedy for disordered stomachs, indigestion, and dyspepsia.

We want you to try them and will return your money if you are not more than satisfied with the result.

Three sizes, 25 cents, 50 cents, and \$1.00. Remember, you can obtain Rexall Remedies in this community

Wife of Labor Leader.

Like Mrs. Philip Snowden, who has proved such a valuable helpmate to her husband, Mrs. J. Ramsay MacDonald, wife of the Labor leader, is a very clever woman, and is as keenly interested as her husband in questions of social reform. She has served on many district and industrial councils, and when her husband first stood for Leicester, in 1906, she worked hard for his success, spoke at a number of meetings, and won many votes and new friends by her bright and clever personality. She confesses to a fondness for Blue-books, while her children, she says, are very fond of discarded Parliamentary papers. "They shape them into wonderful boats, houses, and animals."

Ancient Greeks Had Trades.

In the days of their greatest prosperity the Greeks probably excelled all other nations in the variety and excellence of their manufactures. Their sons were often the great scientists of their age, for Thales of Miletus, one of the "seven wise men of antiquity," was an oil merchant; Socrates was a stone mason, who, like Hugh Miller, left the quarry and bench to become the teacher of nobles; Aristotle compounded drugs while trying to solve his "problems," apparently proposed by other tradesmen, artists, musicians, architects and engineers; Plato and Solon had callings as well as studies and political activities. So, too, all were soldiers, and few men in Athens failed to take their places in the phalanx.

AN ALBATROSS IN FLIGHT.

The Camera Caught a Motion the Eye Could Not Discern.

An interesting application of photography to settle a disputed point in natural history was made by a naturalist on a voyage from British Columbia to San Francisco.

A large albatross had been following the steamer and keeping pace with it for several hours, and the wonder grew among the watchers on board the ship as to how the bird was able to fly so swiftly while apparently keeping its wings extended without flapping them. As this is a common method of flight with the albatross, the explanation used to be offered that the bird took advantage of slight winds and air currents and was so able to glide upon what might be called atmospheric slopes.

As the albatross sailed alongside the ship, about fifteen feet away, the naturalist snapped his camera at it and obtained a photograph that astonished him and his fellow passengers.

The photograph revealed, what no eye had caught, the wings of the albatross, each some five feet long, raised high above its back, in the act of making a downward stroke. The explanation naturally suggested was that more or less frequently the bird must have made a stroke of this kind with its wings, although the eye could not detect the motion, and that the camera happened to be snapped at just the right moment.—Boston Globe.

An Antidote Handy.

The woman was the author of a cookbook that had been published at her request with wide margins and occasional blank pages for notes and additional recipes. Often she had expressed a wish to see an old copy of the book and find out to what use the blank spaces had been put. One day in a secondhand bookstore her husband unearthed an old volume. Noticing that it had been annotated freely, he bought it. After a day or two he said:

"How about the notes in that cookbook? Were they interesting?"

"No," she said curtly; "they didn't amount to anything."

When he got a chance he looked through the book himself. Every note the book contained was a remedy for dyspepsia and stomach trouble.—New York Times.

Asaya-Neurall

THE NEW REMEDY FOR Nervous Exhaustion

Whipping an exhausted nerve system with alcoholic stimulants only shortens the road to physical collapse. The only remedy is Food, Rest and nerve repair. "ASAYA-NEURALL" is and makes possible this cure. It feeds the nerves, induces sleep, improves the appetite and digestion; and soon full nerve vigor is regained. \$1.50 per bottle. Obtain from the local agent.

CALLED IN THE DOCTOR.

Then He and the Patient Found They Were Two of a Kind.

In the Metropolitan theater the house physician has a seat given him for each performance. He is supposed to be there every evening. Naturally there comes a time when the play begins to pall on him. One evening not long ago the stage manager of a local playhouse rushed down the aisle to the doctor's seat and whispered: "Come back at once. The leading lady has had an attack."

In the lady's dressing room all was confusion. "What is we do, doc?" cried the stage manager.

"Have you poured water on her head?"

"Yes, a whole bucket, out of the one that says 'Not to be used except in case of fire.'"

"Then don't pour any more. I fear you have made a fatal mistake. Run out to the drug store and get this filled."

When they had run out the lady opened her eyes. "Doc," she gasped, "you're a good fellow, ain't you? I know you know there's nothing the matter with me. I want a day off, and I don't want to go on in this act. Can you fix it?"

"I sure can," he answered, wringing her hand sympathetically. "I ain't a doctor. I came in on his ticket. We'll fix it."—Cleveland Plain Dealer.

ARMLESS PAINTERS.

Sarah Biffen, For Instance, Who Made Remarkable Miniatures.

Miss Sarah Biffen was a conspicuous example of the skill which armless people sometimes acquire in spite of their affliction. She was miniature painter to Queen Victoria, and her work was widely known for its beauty and delicacy.

She was born without arms, but as a girl, having a great wish to become an artist, she worked earnestly for years until she could paint by holding the brush in her teeth. In 1821, according to the Raja Yoga Messenger, the judges, without any knowledge of the means she was compelled to use, awarded her the gold medal of the Society of Arts, a prize sought by hundreds of others.

M. de Menthon and Bertram Miles were other artists who were deprived of the use of their arms. The former had only one foot, which he used to paint with.

Mr. Miles lost both his arms in an accident, being run over by a street car when he was only eight years old and when he was just beginning to acquire skill in drawing. He spent two years in patient toil learning to draw by holding the pencil in his teeth, at the end of which time he won a first class certificate from a local art school.

Question For Question.

Gibbs—What an aggravating habit Jones has of answering a question by asking another. Dibbs—Yes; I've noticed that. Last night I asked him if he'd lend me \$5, and he replied by asking me if I took him for a darned fool.—Boston Transcript.

He is the best physician who is the most ingenious inspirer of hope.—Coleridge

the teacher of books, artists, musicians, architects and engineers; Plato and Solon had callings as well as studies and political activities. So, too, all were soldiers, and few men in Athens failed to take their places in the phalanx or galley when Athens called on her sons to battle.—Charles Winslow Hall in National Magazine.

Liberty and Independence.

When the presidential struggle between Clay and Jackson was at its height it is related that a band of emigrants from Kentucky and the then other western states commenced to settle on the north side of the Missouri river and called their county Clay and the county seat Liberty.

At the same time another lot of emigrants from Virginia and other southern states pitched their tents on the south side of the Big Muddy and called their county Jackson and the capital Independence. And so it remains to this day. Clay stood for liberty and Jackson for independence.

The Cautious Tailor.

"Now, look here, Snipperton," pleaded Hackley. "Why can't you be patient with his old bill of yours? I'm going to be married shortly to a girl who's worth her weight in gold."

"That's all right, Mr. Hackley," returned Snipperton. "but is she going to be worth my wait in gold? How much does she weigh?"—Judge.

In the Good Old Days.

Of course the old fashioned belle may have walked barefoot halfway to church to keep from spoiling her Sunday shoes, but she didn't put her coiffure in the bureau drawer when she went to bed.—Galveston News.

Another Discovery.

"Shakespeare was one of the ablest of brokers."

"How do you make that out?"
"By the number of stock quotations he furnished."—New York Times.

I call that man idle who might be better employed.—Socrates.

Women in Japan.

Until Chinese ideas came to be ascendant the Japanese never thought of keeping women in subjection, says the Oriental Review. Feminine chiefs are frequently mentioned in the old histories, and there have been famous Japanese empresses.

For regulating the bowels, invigorating the kidneys and stirring up the lazy liver

MORE PINKHAM CURES

Added to the Long List due to This Famous Remedy.

Glanford Station, Ont.—“I have taken

Lydia E. Pinkham's Vegetable Compound for years and never found any medicine to compare with it. I had ulcers and falling of the uterus, and doctors did me no good. I suffered dreadfully until I began taking your medicine. It has also helped other

women to whom I have recommended it.”—Mrs. HENRY CLARK, Glanford Station, Ontario.

Another Cure

Harvey Bank, N. B.—I can highly recommend Lydia E. Pinkham's Vegetable Compound to any suffering woman. I have taken it for female weakness and painful menstruation and it cured me.—Mrs. DEVERE BARBOUR.

Because your case is a difficult one, doctors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It surely has cured many cases of female ills, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, indigestion, dizziness, and nervous prostration. It costs but a trifle to try it, and the result is worth millions to many suffering women.

If you want special advice write for it to Mrs. Pinkham, Lynn, Mass. It is free and always helpful.

“His Ex.”

So the Earl of Aberdeen, Lord Lieutenant of Ireland, is known in the Emerald Isle, where he is exceedingly popular. He is a man entirely without “side,” and, like the countess, takes the keenest interest in the welfare of the poor. His courtship, by the way, began in the most unconventional manner. He had determined on a life of “single blessedness,” but Fate willed otherwise. He was shooting on a friend's estate, and unconsciously crossed the boundary and shot some partridges belonging to the late Lord Tweedmouth. A party of keepers, hearing the guns, arrived on the scene and arrested him as a poacher. In their custody he was taken before Lord Tweedmouth, who instantly recognized that the supposed poacher's explanation was the truth. Full of apologies, he invited the “poacher” to stay to lunch. And there Lord Aberdeen met Isabel, the daughter of the house, who charmed him with her beauty and her accomplishments, and who is now the Countess of Aberdeen.

In the Evening of His Days.

Sir Edward Grey, the Foreign Secretary, who has had such an anxious time in connection with the Morocco affair, once drew an alluring picture of the old age which he covets in a speech replying to a toast proposed by Mr. Churchill. “It is a time of unlimited leisure that we shall spend with old friends in a library. There is a garden outside the library, and of course a suitable river—not flowing too fast nor at the same time flowing too slow, which is

IN THE STONE AGE.

An Amazing People Who Can Only Count Up to Three.

There is a wealth of material, it would appear, awaiting the famous Punch artist, Mr. E. T. Reed, for another series of his popular prehistoric sketches. According to a correspondent of The London Times, there are in Northern Australia, from the Queensland borders through the northern territory into Western Australia, quite a number of primitive people, wearing no clothes, unable to count beyond three, and to-day making and using the implements and weapons of the Stone Age.

A noteworthy characteristic of these primitive people is that they never express surprise or curiosity by outward physical signs, no matter what is brought to their notice. For this reason they have been characterized as stupid. But The Times' correspondent referred to—Mr. W. E. Roth, commissioner, Pomeroy District, British Guiana—after ten years' intimacy with the North Queensland savages, says that he has learnt to have a very high opinion of their intelligence. Referring to an effort on the part of one traveler to excite their surprise by striking matches in front of them and doing other things which might interest them, but which only caused them to turn their heads away, Mr. Roth says:—

“I also have been guilty of striking matches to excite the curiosity of the untutored Australian black,” and he ceased to perform the match-striking trick for the following reason. “Having struck match after match before a crowd of natives,” he says, “who showed not the slightest signs of surprise, notwithstanding that a lucifer box was an absolute novelty to them. I asked the interpreter to discover what these primitive children of nature thought of the performance. He informed me truly and tersely: ‘He say what for you no gib (give) it he (him)? He say, ‘You fool, throw it away.’”

One Deposits.

Men sometimes dream of enormous wealth stored deep in the earth, below the reach of miners, but experts aver that there is little or no ground to believe that valuable metallic deposits lie very deep in the earth's crust. Such deposits, it is said, are made by underground waters, and owing to the pressure on the rocks at great depths the waters are confined to a shell near the surface. With few exceptions, ore deposits become too lean to repay working below 3,000 feet. Nine mines in ten, taking the world as a whole, are poorer in the second thousand feet than in the first, and poorer yet in the third thousand.

Titles Cost Money.

The curious incident at the House of Lords when the Lord Advocate challenged the eligibility of two of the Law Lords because they had never paid their creation fees reminds one that it is not only trying to be a peer nowadays, but it costs a good deal to become one. The sums mentioned (£6 13s. 4d. for an earl, and so on according to scale) are those payable to the Heritable Usher, but there are other charges imposed by custom which make the cost fairly large. A peer becomes a peer not at the moment when the letters patent is signed or when he pays his fees, but when the seal on the letters patent receives the compress of the Great Seal. The letters patent is a huge parchment sheet elaborately encroscrolled, and the seal affixed is about as big as a muffin.

They Liked Carrots.

A true story of one of the Duchesses of Sutherland's visits to a country school is told. Entering the school-room in a north village, her grace

OPEN SORE BAFFLES DOCTORS.

Morriscy's No. 4 Eczema Ointment Healed Like Magic.

Nauwigewauk, N.B., Oct. 2, 1910

“I can gladly recommend dear Dr. Morriscy's Eczema Ointment because it cured me of a sore which I had on my ear for over 8 years. I did everything to have it cured, and had the most skillful doctors treating it, but it would not heal up. I went under treatment with Father Morriscy's Ointment, and in a short while it was cured. That was 3 years ago, and I am sure the cure is permanent. When I think how quickly No. 4 Eczema Ointment cured me it seems wonderful indeed, because you know I doctored with several skilled physicians who could not help me. You surely must have a big demand for this wonderful Salve. My only regret is that I did not use it at first, as it would have saved me over 8 years of pain, to say nothing of an unsightly ear and expensive doctor bills.”

John Ryan.

The above prescription is not a “Cure-All” or so-called patent medicine. Dr. Morriscy prescribed it for 44 years, and it cured thousands after other doctors failed.

Price, 50c. per box at year dealers, or Father Morriscy Medicine Co., Limited, Montreal. 200

INVENTED BY ACCIDENT.

How the Lamp Chimney and Many Other Things Originated.

If you asked some people where such and such a thing originated they would not know. Many of the things used in every day life were the result of accidents. Take for instance the lamp chimney.

Argand, a poor Swiss, invented a lamp with a wick fitted into a hollow cylinder up which a current of air was allowed to pass, thus giving a supply of oxygen to the interior as well as to the exterior of the circular frame.

At first Argand used the lamp without any chimney. One day he was busy in his workroom and sitting before the burning lamp. His little brother was amusing himself by placing a bottomless oil flask over different articles. Presently he placed it up on the flame of the lamp, which instantly shot up the long, circular neck of the flask with increased brilliancy. It did more, for it flashed into Argand's mind the idea of the lamp chimney, by which his invention was perfected.

One day the children of a Dutch spectacle maker were playing with some of their father's glasses before the door of his shop. Setting two of the largest glasses together they peeped through them and were surprised to see the weather-cock of the opposite church brought close to their eyes. They called their father to see the strange sight. He looked through the glasses and what he saw suggested to him the possibility of constructing a curious toy.

Galileo, hearing of the toy which made distant things appear close at hand, saw at once what a valuable help it would be in studying the heavens. He set to work, and soon made the telescope.

An accident helped Senefelder to invent lithography. He was sort of jack-of-all-trades, a writer of verses and comedies, an actor, a fiddler, a painter, an engraver and a printer.

He worked at etching on copper, but the coppersmith refused to let him have any more plates unless he paid cash for them. He then tried to utilize the old plates by rubbing off the etchings with a soft limestone.

At last the copper became useless through many rubbings, and he tried etching on the stone, a plan that did

TRUE PROPHECIES.

European Scholar Says That Divination Is an Unquestioned Fact.

Dr. Max Kemmerich, who is a famous Munich scholar and scientist, has written a remarkable book entitled Prophecies, in which he proves that the faculty of foreseeing and foretelling history is an indubitable scientific fact, subject to convincing logical demonstration.

Kemmerich is a skeptical, hard-headed savant, and his last preceding book, Curiosities of Culture, even betrays a certain irreverence.

Kemmerich accepts, quite independently of religious dogmatism, the Bible prophecies as historical facts. The prophecy that the Jews would survive in history is one of the most remarkable, in view of the fact that much greater races than the Jews, like the Babylonians, perished utterly. The first of the prophets, Amos, who lived 800 B.C., was convinced of the persistence of the Hebrew race; and, now, nearly 3,000 years later, he still is right. Micah prophesied the destruction of Jerusalem a hundred years beforehand; and he also foresaw that Babylon would be the Jews' lands of exile. Jeremiah so confidently foresaw that Jerusalem would be rebuilt that he bought a plot of land during what seemed the hopeless time of the siege by Nebuchadnezzar. The return from exile, the destruction of Babylon and many other historic events were foretold by Old Testament prophets.

Dr. Kemmerich finds it significant that the Delphic oracles kept their reputation for 1,000 years, and that the Egyptian oracles lasted several thousand years. The murder of Julius Caesar was foreseen by men who had no concern with the plot. The middle ages are full of authenticated prophecies, often coming in the shape of visions. The Kaiser Friedrich III. dreamed that he was being crowned by the simple, obscure Bishop Parentucelli. The dream surprised him. But later Parentucelli became Pope Nicholas V. and it was from his hands that Friedrich received the imperial crown.

The murder of Henri IV. of France by Ravallac was predicted in the most categorical way. Joachim Greulich described in advance the siege of Vienna by the Turks under Kara Mustapha; and likewise the expulsion of the French Bourbons. The latter prediction was made in the reign of Louis XIV., when the Bourbons were at the height of their power and security. In 1300 the Abbe Lenin predicted the greatness of the house of Brandenburg, and even declared that its chief would unite Germany and become Kaiser. As the oldest manuscript record of this prophecy dates from 1690, some critics doubt whether it was really uttered in 1300. But even if the later date is correct, Lenin foresaw German history 200 years ahead. In many other respects his predictions about the house of Brandenburg became true.

JUST A LITTLE GIFT.

The Present an Economical Duchess Made to Her Rich Friend.

Recently when the wealthy Mlle. de R. was to be married one of our good duchesses had to make her a present, just a little present. The duchess thought it would be useless to expend much money for a person so rich. She thought if she would look through her vast mansion she would be able to find something, some trinket, to which the addition of her card would give sufficient glory. She finally found in her writing desk an insignificant cameo that she had once worn.

The following day she received from her young friend a letter of enthusiastic thanks: “Oh, you have been very foolish! This is too, too beautiful.”

Morocco affair, once drew an alluring picture of the old age which he covets in a speech replying to a toast proposed by Mr. Churchill. "It is a time of unlimited leisure that we shall spend with old friends in a library. There is a garden outside the library, and of course a suitable river—not flowing too fast nor at the same time flowing too slow, which is a worse fault. That will be the happiest time of all. I, in those days, shall have no thought of politics except to read the report of the brilliant speeches which Mr. Churchill will still be making in the House of Commons." Sir Edward Grey is not yet fifty.

At one time Sir Edward Grey was a magnificent tennis-player, and there is a story told to the effect that when he was Under-Secretary for Foreign Affairs he was sometimes able to snatch a couple of hours in the afternoon for his favorite game, and he observed when leaving the tennis-court on one occasion that he had nothing to live for through the coming week but to look forward to the next Wednesday afternoon, when he could again take up the racquet.

parchment sheet elaborately encsrolled, and the seal affixed is about as big as a muffin.

They Liked Carrots.

A true story of one of the Duchess of Sutherland's visits to a country school is told. Entering the school-room in a north village, her grace found the children busily engaged in drawing carrots, and a fine specimen of the vegetable lay on the table. The duchess, holding the carrot aloft, asked: "Can any of you children tell me what animal, sagacious, beautiful, useful, and intelligent, is very fond of eating this?" Up went an energetic, ragged little arm, signalling frantically. "Well, my little man, what animal?" "Please, mem, oorselves," was the startling reply.

Dr. de Van's Female Pills

He worked at etching on copper, but the coppersmith refused to let him have any more plates unless he paid cash for them. He then tried to utilize the old plates by rubbing off the etchings with a soft limestone.

At last the copper became useless through many rubbings, and he tried etching on the stone, a plan that did not work very well. One day, while he was polishing off a stone which he intended to etch, his mother asked him to write out a list of the linen which the laundress was waiting to carry off. Not finding a slip of paper or a drop of ink, Senefelder wrote the list on the stone with printing ink prepared from wax, soap and lampblack, intending to copy it at his leisure.

A few days later, when he was about to wipe the writing from the stone, he thought he would learn what would be the effect of writing with the prepared ink on the stone, if it should be bitten in with aquafortis. He bit away to about the hundredth part of an inch, charged the lines with the ink, took several impressions of the writing, and discovered that he had invented the art of lithography.

The bayonet is said to have derived its name from the fact that it was first made at Bayonne, and its origin illustrates the proverb "Necessity is the mother of invention."

A Basque regiment was hard pressed by the enemy on a mountain ridge near Bayonne. One of the soldiers suggested that, as their ammunition was exhausted, they should fix their long knives into the barrels of their muskets. The suggestion was acted upon. The first bayonet charge was made and the victory of the Basques led to the manufacture of the weapon at Bayonne and its adoption into the armies of Europe.

Wagner's Operas.

The solicitude of the heirs of Richard Wagner as the time approaches when his works will be free may well be understood from the great sums that his operas bring in. Munich alone has paid the family \$250,000 in royalties, while Vienna and Berlin have contributed much larger sums. A tentative effort to preserve a certain share of these royalties to the family was made by a committee which wanted a certain percentage paid as so called "honorary royalties." With one exception the musical societies of Germany as well as the opera houses absolutely refused to agree to anything of the kind, while the opera houses, in view of the great wealth of the present Wagner family, even refused to promise not to give "Parsifal." Not only will the Imperial Opera House at Vienna mount "Parsifal," but there are already in preparation various companies which are to travel through Germany performing the work.

something, some ink, some paper, to which the addition of her card would give sufficient glory. She finally found in her writing desk an insignificant cameo that she had once worn.

The following day she received from her young friend a letter of enthusiastic thanks: "Oh, you have been very foolish! This is too, too beautiful," etc.

"She is making sport of my little present," thought the good duchess.

Then came a second letter, this time from the husband who was to be: "How can we thank you? We are delighted! This will spoil us."

"The impertinent fellow!" said the duchess. "He wants me to understand that I have been niggardly."

Nevertheless she went to pay a visit to the R.'s before the marriage. There, in the midst of her presents, exposed in a most prominent place, she saw the little cameo placed upon her card. An old gentleman approached her. He is a member of the Academy of Inscriptions and Belles Lettres.

"What a wonderful present you have given these children, Mme. la Duchesse," he said. "For forty years we have been seeking for this very cameo. It is of the era of Trajan, and this trinket is valued at 200,000 francs."

Ah, the poor duchess!—Col de Paris

A Blow Arrested.

An organist who on the eve of a festival was taken suddenly ill secured a deputy to take his place. The deputy was a gentleman who played a very full organ, playing full chords where his principal played only single notes and consequently used a much larger quantity of wind.

When about three parts through with the "Hallelujah Chorus" the wind suddenly gave out. Going round to the back of the organ to ascertain the reason, the deputy found the blower in the act of putting on his coat preparatory to going home.

"What do you mean by such behavior?" the deputy angrily expostulated.

"Look ere, sir," the blower returned with warmth; "if you think I don't know 'ow many puffs it takes to blow the 'Alleluiah Chorus' you make a big mistake."—St. James' Budget.

THE FAVORITE LAXATIVE.

One at Night makes the Next Day
Bright; no charge if it doesn't.

Because of its extremely gentle and effective action, Rexall orderlies have become the most popular Remedy for Constipation.

We are so positive that Rexall Orderlies will do all that is claimed for them that we positively guarantee to hand back the money you paid us for them upon your mere request, if you are not entirely satisfied.

Rexall Orderlies are eaten like candy are very pleasant to the taste, do not gripe, cause nausea, or any other annoyance usually experienced when ordinary cathartics are used.

Rexall Orderlies have a positive regulative effect upon the bowels and tend to provide permanent relief from Constipation and the myriad of associated ailments. Besides, they help to overcome the necessity of the constant use of laxatives to keep the bowels in normal condition.

We honestly believe there is no similar medicine so good as Rexall Orderlies, especially for children, aged, or delicate people. They are prepared in convenient tablet form in three sizes of packages. Prices, 10c., 25c., and 50c. Why not try them at our risk on our guarantee?

Remember, Rexall Remedies can be obtained in this community only at our store—The Rexall Store. T. B. Wallace, Napanee.

AMHERST ISLAND FAIR.

The Fair was held at Stella, on Tuesday, the 26th inst., and turned out a success in every way. Mr. Ferguson, the expert judge on horses, performed his work most satisfactorily. He had a number to judge from, but his practiced eye soon discovered those most worthy of merit and got over his work in short order and all were perfectly satisfied with his decision. The weather was perfect for the occasion and brought out a large number of people.

There was a very small exhibit of sheep and pigs and not very large in the cattle either, but the horse department made up for the others and some excellent animals were shown, especially in the Agricultural Heavy Draft and some of the colts could scarcely be surpassed. One of the 2 year old colts was said to weigh 1500 lbs. The roots and vegetables were good considering the year. The ladies showed art in the culinary work and also in their handy work. The members of the English church provided for the wants of the inner man and had ample provision for all. In the afternoon the Directors entertained the crowd with foot races and a running race with horses.

Following is the Prize List:

- Stallion, heavy draft—A. E. Howard.
- Sucking colt, agricultural—A. E. Howard, Henry Filson, Allen Howard.
- Mare and colt, agricultural—S. K. Tagwell, A. E. Howard, Allen Hitchins.
- 1-year-old, agricultural—W. A. Hitchins, Allen Hitchins, P. W. Tagwell.
- 2-year-old, agricultural—Allen Hitchins, W. H. Preston, John McCallum.
- 3-year-old, agricultural—Sam Miller, Mrs. Bray.
- Sucking colt, heavy draft—H. Howard, W. A. Scott, W. H. Preston.
- Mare and colt, heavy draft—W. H. Preston, W. A. Scott, Harry Howard.
- 2-year-old colt, heavy draft—Harry Howard, Mrs. Strain, W. H. Preston.
- 3-year-old, heavy draft—John Richards, Wm. Glen, jr.
- Heavy draft team—A. E. Howard, R. A. Fowler, W. H. Preston.
- General purpose team—W. A. Scott, Thos. Hill, Wm. Cochrane.
- Team of roadsters—Ray McMaster.
- Roadster, single, in harness—Wm. Glen, jr., Mrs. Bray, W. H. Preston.
- Carriage horse in harness—Ed. Fleming, James Gibson, Ben Wemp.
- Roadster, 1-year-old colt—Alfred Filson, John Richards.
- Roadster, sucking colt—Ed. Fleming.
- Mare and colt, roadster—Ed. Fleming.
- 3-year old roadster—John Richards, Ed. Fleming, Fred Richards.
- 3-year-old roadster—Robt. Filson, Ben Wemp, A. E. Howard.
- The horses were judged by W. W. Ferguson, expert judge sent by J. Lockie Wilson.
- Cattle judges—David Alsworth, Harry Hunter, Col. Clyde.
- Heifer calf of 1911—Wm. Cochrane, A. E. Howard.
- 1-year-old heifer—Robt. Marshall, W. H. Preston.
- 2-year-old heifer—Robt. Marshall, W. H. Preston, Wm. Cochrane.
- Milch cow—Robt. Marshall, John McMullen, Henry Filson.
- 3-year-old Durham bull—A. E. Howard.
- 2-year-old Durham heifer—Sam Miller.
- Jersey cow—R. Cumberland.
- Judges on sheep, pigs and poultry—Leicester Aylsworth, Hazel Buck, J. R. McPherson.

LONG WOOLED SHEEP.

- Lamb of 1911—Ben Wemp.
- 1-year old ewe—Ben Wemp.
- Ewe, two shears and over—Ben Wemp.

SHORT WOOLED SHEEP.

- Yearling ram—Henry Filson.
 - Ram, 2 shears and over—Ben Wemp.
 - Ewe lamb of 1911—Ben Wemp, Henry Filson.
 - Yearling ewe—Ben Wemp, Henry Filson.
 - Ewe, 2 shears and over—Henry Filson.
- ## PIGS.
- Old boar—A. E. Howard, W. H. Preston, R. A. Fowler.
 - Brood sow—Henry Filson, A. E. Howard, W. A. Scott.
 - Sow pig of 1911—W. A. Scott, Wm. Cochrane.

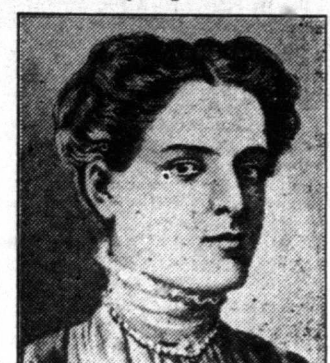

POULTRY.

- Pair Turkeys—W. H. Mowbray, R. Filson, R. Kilpatrick.
- Pair geese—Mrs. Fleming.

DOCTORS HAD GIVEN UP ALL HOPE

"Fruit-a-tives" saved my Life

RIVIERE A PIERRE, Q., May 9, 1910.
"I look upon my recovery as nothing short of a miracle. I was for eleven years, constantly suffering from Chronic Dyspepsia and Indigestion. I was treated by several doctors and they simply did me no good. During the latter part of my illness, I was so thin that I weighed only 90 pounds, and I vomited everything I ate."

The doctors gave me up to die as the stomach trouble produced heart weakness and I was frequently unconscious. I received the Last Rites of The Church. At this time, a lady strongly urged me to try 'Fruit-a-tives'. When I had taken one box, I was much better and after three boxes, I was practically well again, and had gained 20 pounds. I have taken 13 boxes in all and now weigh 150 pounds and am well."
Madame ARTHUR TOURANGEAU.
"Fruit-a-tives" is the only medicine in the world made of intensified fruit juices and always cures Indigestion. 50c. a box, 6 for \$2.50, or trial size, 25c. At all dealers, or from Fruit-a-tives Limited, Ottawa.

LADIES WORK.

- Judges—Miss Sutherland, Mrs. McTeer, Mrs. Stewart.
- 10 lbs. butter in crock—D. Finnegan.
- 5 lbs. butter in prints—Harry Howard, Wm. Cochrane, D. Finnegan.
- Loaf homemade bread—Mrs. Finnegan, D. Finnegan, Mrs. Fleming.
- Twelve plain homemade buns—W. H. Moutray, D. Finnegan, Robt. Marshall.
- Dozen sweet homemade buns—R. A. Fowler, W. H. Moutray, R. Marshall.
- Laver cake—D. Caughey, W. H. Moutray, Sam Miller.
- Quart canned berries—D. Finnegan, A. Burleigh, R. Kilpatrick.
- Quart canned peaches—W. H. Moutray, Rev Porter, Robt Glen.
- Quart canned plums—D. Finnegan, R. Kilpatrick, Ed Fleming.
- Boquet of flowers—A. Burleigh, Rev. Porter, Harry Howard.
- Specimen machine sewing—W. H. Moutray, Percy Tagwell, S. Miller.
- Specimen hand sewing—S. K. Tagwell, Mrs. Finnegan, D. Finnegan.
- Hooked foot mat—D. Finnegan.
- Coarse knitted woollen mitts—A. Burleigh, D. Finnegan, Wm. Glen, jr.
- Floor mat—Allen Hitchins.
- Knitted woollen socks—A. Burleigh, Mrs. Finnegan, Percy Tagwell.
- Knitted woollen stockings—Robt Glen, D. Finnegan, Wm. Glen, jr.
- Fine knitted mitts—D. Caughey, Robt Glen, Wm. Glen, jr.
- Patchwork quilt—Herman Willard, Rev Porter, Robt Marshall.
- Eyelt embroidery—W. A. Hitchins, W. H. Moutray, Rev Porter.
- Quilt, white, any variety—D. Finnegan.
- Water color painting—Rev Porter, R. C. Cumberland, Ed Fleming.
- Free hand pencil drawing—S. Miller, Ed Fleming, A. Burleigh.
- Crochet work in cotton—Rev Porter, Wm. Glen, jr., A. Burleigh.

STELLA.

The fair was held at Stella on Tuesday, September 26th, and turned out a success in every way. Mr. Ferguson, the expert judge of horses, performed his work most satisfactorily. He had quite a large number to judge, but with his practiced eye soon discovered the most worthy of merit, and got over his work in short order, and everyone was perfectly satisfied with his decision. The weather was perfect for the occasion, and as a result, a large number of people were in attendance. There was a very small exhibit of sheep and pigs, and rather small cattle exhibit, as well, but there was a good exhibit of horses. Some of the colts could scarcely be surpassed. The roots and vegetables were good, and there was also a good exhibit of ladies' fancy work and handy work. The members of the Anglican church provided for the wants of the inner man, and had ample provisions for all. In the afternoon, the directors entertained the spectators with foot races and a running race for horses.

Cash was received from Napanee, Bath, Kingston, Stella and Amherst Island, for the sports, and Kingston merchants also contributed to the prizes offered for the exhibits.

The fair was well managed in every respect, and the members having all the arrangements in charge, are deserving of great credit for the way in which they were carried out.

Oil heaters for fall and spring. Spare rooms where extra heat is wanted for evenings. Just what you need at

BOYLE & SON'S.

DENBIGH.

(For last week)

Mr. R. Meyer, of Philadelphia, his daughter Ruth, and his niece, Miss Eva Behrens, of Breslau, Germany, who have been guests of the Denbigh House for a couple of weeks, have returned to the city again greatly pleased with their visit here.

Rev. J. R. Butler, who also again favored his relatives and numerous friends here with a visit, also returned to his field of labor near Peterboro. Mrs. Martha Quillan, now residing near Seattle, Wash., with her two sons, paid a visit to her birthplace and was for a couple of week the guest of her brother, Mr. Adolph Fritsch, whom she had not met for many years.

Mrs. Jas. Mackay, of Reid, enjoyed a very pleasant visit at her old home with her parents, Mr. and Mrs. E. Marquardt.

Miss Ella Berger, of Toronto, spent a few days visiting her mother and other relatives here and returned to the city again accompanied by her sister, Martha, who wishes to try city life for a while.

The Misses Mary Falk and Louise Bartsch have left for Kingston, where they have secured situations.

Quite a number of young men from this village and vicinity left again last week for New Ontario to engage in lumbering during the winter.

Messrs. John Hentschel and Otto Kliem and Miss Emma Kliem started on Monday last for Germany. Mr. Hentschel does not intend to return to Canada but Mr. Kliem expects to be back again about the latter part of December, while Miss Kliem intends to spend at least a year in the old country before she returns home.

Our village will be favored with the presence of a number of clergymen next week as the fall sessions of the Eastern Conference of the Lutheran Synod of Canada will be held here this year. The opening service will be held in the Lutheran church on the forenoon of Wednesday, Oct. 4th.

QUEEN OF ACTRESSES PRAISES PE-RU-NA.

Miss Julia Markowe

"I am glad to write my endorsement of the great remedy, Peru-na. I do so most heartily."—Julia Markowe.
Any remedy that benefits digestion strengthens the nerves. The nerve centers require nutrition. If the digestion is impaired, the nerve centers become anemic, and nervous debility is the result.

COLEBROOK.

George Curl, of Verona, has bought Norman Boyce's farm and intends moving in November.

The Sunday School rally was a success.

Robert Galbraith and daughter, Laura, left Saturday, for Cupar, Sask., where his daughter will be married to John Davidson, of that place.

Miss Anna Gray, is improving the front of her store and putting in two large windows.

Charles Lee, has bought the house and lot formerly occupied by the late Mrs. John Shangraw.

The C. N. R. is being pushed ahead rapidly in this vicinity.

George Shangraw and daughter, Blanche Dobbins and her young son, William, all of Alexandria Bay, N. Y. are spending a few days with friends here.

Heavy frost finished up all the garden stuff.

The annual meeting an election of officers of the W. C. T. U. will be held in Trinity Church parlor on Tuesday, October 3rd at three o'clock in the afternoon.

Sec'y.

THE SALVATION ARMY.

The 29th Annual Congress of the Salvation Army in Canada will be held in Toronto, on October 11th to the 16th, inclusive. This Congress will be of special significance to the officers and members of The Army, as General Booth has arranged for his daughter-in-law, Mrs. Bramwell Booth wife of the Chief of the Staff, to conduct the entire series of meetings. Mrs. Booth will be accompanied by Colonel Mildred Duff, also from London, England.

Mrs. Booth is head of the Women's Social Work in all lands and is a recognized authority on the treatment of those unfortunate women who are cared for in connection with this beneficial work.

The Welcome Meeting to Mrs. Booth will take place in the Massey Hall on Wednesday, October 11th. This will without doubt be the most impressive spectacular and interesting demonstration of The Army work ever held in Canada. It will be in the nature of a pageant, over three hundred persons taking part in the same. On Sunday afternoon, Mrs. Booth will give a Special Social address in the Massey Hall. The chair will be occupied by His Hon. Lieutenant-Governor Gibson. This will be followed by a special evangelistic service in the Massey Hall in the evening.

The programme of meetings, public and private, prepared by Commissioner David M. Rees, leader of The Salvation Army in Canada, will be as follows:

Old boar—A. E. Howard, W. H. Preston, R. A. Fowler.
 Brood sow—Henry Filson, A. E. Howard, W. A. Scott.
 Sow pig of 1911—W. A. Scott, Wm. Cochrane.

POULTRY.
 Pair Turkeys—W. H. Mowbray, R. Filson, R. Kilpatrick.
 Pair geese—Mrs. Fleming.
 Pair ducks—S. Miller, Mrs. Fleming, Herman Willard.
 Pair Plymouth Rocks—S. K. Tugwell, Percy Tugwell, Wm. Glen, jr.
 Pair Plymouth Rock chickens—Wm. Glen, jr., S. K. Tugwell, Percy Tugwell.
 Pair common fowl—R. Filson, W. A. Scott, R. C. Cumberland, Henry Sanders.

GRAINS AND SEEDS.
 Judges—Anthony Rankin, Geo. Fleming, Bushel of barley—Alfred Filson, W. A. Scott, Henry Filson.
 Bushel spring wheat—Jon McClelland, R. Kilpatrick, A. E. Howard.
 Bushel white oats—John McClelland, R. Kilpatrick, Henry Filson.
 Bushel black oats—Mrs. Fleming, Geo. Balch.
 Bushel of rye—R. Marshall, Ben Wemp, J. Reid.
 Bushel large peas—Wm. Glen, jr., Robt. Marshall.
 Bushel field peas—D. Finnegan, Robt. Marshall, Wm. Cochrane.
 Half bushel Timothy seed—Mrs. Fleming, R. Kilpatrick, W. A. Scott.
 Peas—White beans—Wm. Glen, jr., D. Caughey, Mrs. Finnegan.
 Peas colored beans—Mrs. Finnegan, J. Reid, D. Finnegan.
 Dozen ears of corn—Mrs. Fleming, John Reid, Ray McMaster.

ROOTS, HOED CROPS, FRUITS AND VEGETABLES.
 Judges—Samuel Spears, Jas. Fleming, 12 stalks silo corn—Henry Filson, A. Filson.
 Half bushel white potatoes—Sam Miller, John Reid, John McClelland.
 Half bushel colored potatoes—David Caughey.
 Dozen field carrots—Mrs. Fleming, Mrs. Strain.
 Two squashes—R. A. Fowler, R. C. Cumberland, Mrs. Fleming.
 Six Mangolds—Ray McMaster, W. A. Scott, Harry Howard.
 Six white turnips—Mrs. Fleming.
 Six yellow turnips—Harry Howard, Mrs. Strain.
 Two pumpkins—Henry Filson, Ray McMaster, Mrs. Fleming.
 Six yellow globe mangolds—Mrs. Fleming.
 Ten tomatoes—Mrs. Fleming, Ray McMaster, Wm. Glen, jr.
 Dozen fall apples—Mrs. Finnegan, Mrs. Strain, D. Finnegan.
 Dozen winter apples—Mrs. Finnegan, R. Kilpatrick, David Caughey.
 Six long beets—Wm. Glen, jr., Mrs. Fleming.
 Six turnip beets—John Reid, Henry Sanders, Wm. Glen, jr.
 Two heads white cabbage—Mrs. Fleming, Wm. Glen, jr., Ben Wemp.
 Dozen onions—Mrs. Fleming, Ben Wemp, Wm. Glen, jr.
 Ten pears—R. A. Fowler, D. Caughey, R. C. Cumberland.
 Dozen parsnips—Mrs. Fleming, R. C. Cumberland.
 Dozen red garden carrots—Mrs. Fleming, Henry Sanders, John Reid.
 Honey in comb—Henry Sanders, Ray McMaster, R. C. Cumberland.
 Bottle homemade wine—Mrs. Strain, Wm. Glen, jr., Wm. Cochrane.

A Genuine Triumph
 in the medical line is that made by a Canadian chemist, and called Merrill's System Tonic. It embodies a discovery long desired but only recently made by this eminent chemist. When System Tonic is taken the old blood is purified, new rich blood is made, while all the principal organs of the body are toned and strengthened and new tissue constructed. The result is a permanent cure of Dyspepsia, Rheumatism, Catarrh, Blood and Skin Diseases and Kidney Affections with their accompanying nervous symptoms. Get Merrill's System Tonic from your Druggist, 50c per box, 6 boxes \$2.50, or postpaid from The Merrill Medical Co., Merrill Building, Toronto.

Sold and recommended by T. B. Wallace, Druggist.

Glen, Wm. Glen, jr.
 Patchwork quilt—Herman Willard, Rev Porter, Robt Marshall.
 Eylet embroidery—W A Hitchins, W H Moutray, Rev Porter.
 Quilt, white, any variety—D Finnegan.
 Water color painting—Rev Porter, R C Cumberland, Ed Fleming.
 Free hand pencil drawing—S Miller, Ed Fleming, A Burleigh.
 Crochet work in cotton—Rev Porter, Wm Glen, jr., A Burleigh.
 Crochet work in wool—Rev Porter, Wm Glen, jr.
 Sofa pillow—W A Hitchins, Wm Glen, jr., Percy Tagwell.
 Drawn work—Rev Porter, A Hitchins.
 Table centre piece—R Marshall, R A Fowler, Wm Glen, jr.
 Stencelling—Rev Porter, W H Moutray.
 Pin cushion—Rev Porter, R. A. Fowler, Percy Tagwell.
 Knitted lace in cotton—Robt Glen, Rev Porter, W A Hitchins.
 Assortment of work, six articles—R A Fowler, Rev Porter, W A Hitchins.
 Brass work—W H Moutray, J S Neilson.
 Children under 15 years, pencil drawing—Wm Cochrane, Wm Glen, jr., S Miller.
 Penmanship—Wm Glen, jr., S Miller, Wm Cochrane.

The following contributed articles of kind and money to the Fair and disposed of as follows:
 Mr Bunt, Kingston, to the winner of the best heavy draft 2-year-old colt, Blue Nickle tea kettle.
 Mr Fralick, best single carriage horse, \$1.00.
 Jas Reid, Kingston, best roadster mare and colt, an armchair.
 Mr Boyes, Napanee, sucking colt, roadster, \$2.00 hat.
 Mr Bibby, Kingston, for best 2-year-old grade heifer, woollen jacket.
 Mr Robinson, Bath, for best pen long woolled sheep, box of cigars.
 Mr Radden, Kingston, best pen short woolled sheep, 3 lbs of tea.
 Maclean and Son, Kingston, best brood sow and litter, barrel of salt.
 Mr Coates, Kingston, for best Plymouth pullets, to be given to donor a prize of \$2.00.
 Mr Abernethy, Kingston, best half bushel potatoes, pair \$2.00 shoes.
 Miss Sutherland, Kingston, for best assortment of work, six different articles, a prize of \$3.00.
 Mr Richardson, Kingston, best bushel spring wheat, \$5.00.
 Mr Richardson, Kingston, best bushel of barley, \$5.00.
 Mr Smith, jeweller, Napanee, for 10 lbs butter in crock, fruit spoon.
 Mr Mitchell, Kingston, best loaf homemade bread, Universal meat chopper.
 Mr Lorraine Lockett, Kingston, best dozen sweet homemade buns, shoe to value of \$2.50.
 Mr Geo Mahood, for best layer cke, toilet set.
 Polson and Son, bottle homemade wine, ladies handbag or purse.
 W F Nickle, M P elect, for dozen egg, cash, \$2.00.
 Smith Bros, jewellers, Kingston, best canned peaches, fruit spoon.
 The Crothers Co, best eylet embroidery, 5 lbs chocolates.
 Mr Corbett, Kingston, for best crochet in cotton, case of scissors.
 Mr Best, Kingston, for best grade milch cow, package of stock food.
 Messrs Preston and Howard, a prize of \$1.25 each for best Percheron sucking colt, 3-year-old, 2 and 3 year-old, \$5.00.
 Mr Toye, Kingston, for penmanship, package of chocolates.
 The following paid in cash left to the discretion of the directors for sports, etc.
 R Institute, Amherst Island, \$2.00.
 Mr Rees, Kingston, \$1.00.
 Dr Northmore, Bath, \$1.00.
 Mr Rikley, Bath, \$1.00.
 Mr Mott, 50c.
 Mr McCormick, Napanee, \$2.00.
 Mr Harry Hunter, Napanee, \$2.00.
 Mr Uriah Wilson, Napanee, \$2.00.
 Mr S Wilson, \$1.00.
 Mr Chas Hamby, Bath, \$2.00.
 Mr Evans, Stella, \$2.00.
 Dr Benson, Napanee, \$1.00.
 Mr Mitchell, Napanee, \$1.00.

\$100 Reward \$100.
 The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and aiding nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for testimonials.

Hennequin's Infant Tablets
 Save Babies' Lives. For Babies and Small Children. (Made in France.)
 Dr. Hennequin's Infant Tablets saved our little girl's life. Three doctors said she could not live. The Tablets cured her.—Mr. E. R. McBride, Napanee, Ont.
 My baby was so weak from sickness that he could hardly walk. We thought he would die. We could find nothing to help him. I was given a sample package of three Hennequin Tablets; we used them; I saw a change at once. We secured the Tablets and our baby improved every day, and is now a bright, fat, good natured boy; you could not believe he was the same child. They certainly cured my baby and saved his life. I believe them to be the best medicine ever sold for babies. Mothers if your babies are not well take my advice and try these Tablets.—Mrs. JAMES RIDDLE, Barrydale, Ont.
 We have hundreds of such letters. If the Tablets were not what you need you would not offer to give them away and prepay them. If your baby is not well send for trial package. Hennequin Tablets have the letter "H" stamped upon them—this is your guarantee. All dealers, 25c per package, or 5 for \$1.00 sent postpaid to any address.

 Then don't neglect calling and examining our Steel and Metal Ranges and Heaters. They are as good as the best; and as cheap as the cheapest.

ERF POTTER & BLANCHARD.

According to official statistics just published in Berlin, Germany has, in the last decade, increased her exports 125 per cent. and her imports 115 per cent. She now ranks next to England as an international trader, and is steadily overtaking her rivals. The industrial and commercial advance of Germany since unification has been one of the wonders of our age. This advance is attributed by Germans as well as by foreigners of authority to moral rather than physical causes—to education, efficiency, science, strenuous cultivation of every opening or opportunity and successful diplomacy. The thoroughness and "method" of German manufacturers and traders are proverbial.

The figures and percentage to which Germans point with so much pride—and legitimate pride—constitute the most convincing of all possible peace or anti-war arguments. Germany has prospered and grown under a regime of industry and peace, in spite, not because, of war talk, jingo and militarist aggressiveness—on paper. The kaiser, called "a war lord," has been an advocate of industry and labor, not of strife and vainglory. There is no reason to believe that "Morocco" or any similar question will cause Germany to forget her need of peace and to drift into a disastrous war. War would destroy Germany's foreign commerce and put crushing burdens on her middle and working classes. War would probably destroy the German navy. There is nothing more absurd than the wholesale destruction of life, national health, wealth, opportunity and prospects in the name of a little additional wealth and opportunity.

Sober-minded Germans cannot study their trade statistics without becoming earnest friends of peace and good will toward France, England and other great powers that do not interfere with Germany's development and her acquisition of foreign markets and investment channels under "open door" principles.

One of the most interesting results of recent experiments with the aeroplane as applied to problems of naval warfare is the discovery that at a height of 600 feet a submarine boat can invariably be seen to a depth of thirty feet under the water surface. Since communication may be carried on easily between an aeroplane and vessels on the surface, it is possible to give warning of the approach of a submarine to a torpedo boat destroyer that can attack the submarine, or to a war ship that can avoid it.

These experiments, made at Cherbourg, France, seem to show that

THE FARM

Useful Hints for the Tiller of the Soil

THE FORMATION OF THE SOIL.

Vegetation begins with the very simplest forms of plants, such as lichens and mosses, and is, of course, very scanty at first. These plants on dying become a part of the soil, all of the plant nutrients used by them being thus returned, writes Mr. Alfred Vivian.

Food that has once been used by plants is very readily made available to succeeding crops through the process of decay. The soil is now able to produce a larger crop, as it contains the plant food in the previous growth in addition to that added through the agencies detailed above.

In this way the growth gradually becomes more abundant. The plants upon decaying give rise to humus, and this increases the fertility of the land both by being a source of plant food and by increasing the water-retaining power. Humus is a very important factor in fertility. During the decomposition of the plants, acid substances are formed which act upon the rocks in such a way as to make more of the plant food available.

One of the products of decay or fermentation is carbonic acid, and this is dissolved in the soil water, and this gas-containing water is an important help in disintegrating the rocks.

As the nutritive materials increase from these various causes the lower simpler forms of plant life are gradually replaced by those which are more highly organized.

With the advent of plants, like our common crops, which bear roots, other factors in the formation of soils are introduced. The roots secrete an acid substance that has a solvent effect on the mineral matter of the soil, and the roots themselves also assist mechanically in breaking down the rocks.

All are familiar with the tremendous force exerted by plants in breaking apart rocks and stones if once their tender rootlets obtain a foothold in a crevice.

The roots penetrate the soil sometimes to great depths, and as they decay after the death of the plant, they leave little channels in the soil which serve to carry down water laden with carbonic acid, as well as to introduce the oxygen of the air, that, in its turn, is a factor in bringing about chemical changes in the soil, which assist in making plant food available.

Sooner or later in the process of soil formation, plants of the pulse family, (leguminous plants), such as clover, vetches, lupines, etc., are introduced.

If you dig up some of these plants you will find little nodules or tubercles on their roots. These nodules are the homes of numerous bacteria, which enable the plants to derive part of their food

from the nitrogen of the atmosphere.

This peculiar property of leguminous plants is of great importance, for it is undoubtedly nature's principal method of increasing the supply of nitrogen in the ground.

The nitrogen compounds accumulated by these plants eventually become a part of the soil through their decay, thus adding to its fertility.

It will readily be understood that the various agencies concerned in the formation of the soil do not act separately nor necessarily in any such order as that in which they have been discussed.

As a matter of fact all the processes described take place simultaneously. The lower plants do not wait for the rocks to be pulverized, for we see such organisms as the lichens growing on rocks from which one would think it impossible to obtain food.

If the lichen is removed, grooves or furrows will be found on the surface of the stone, due to the action of the plant.

Nor are all soils formed directly from the original rocks, for one of the effects of weathering, etc., is to separate such rocks as the granite into simpler substances, with the result, for example, that huge deposits of limestone are formed in one place, and in another whole hills of sandstone.

The soil is almost constantly moving, for some of the same agencies which form soils are continually carrying them away. Running water grinds the rocks, but at the same time transports the fine particles to lower levels. It cuts deep valleys in the surface of the earth and carries away the debris, depositing it at various distances from its source.

This study of the formation of the soil then suggests two things that the farmer can do to prevent the exhaustion of the fertility.

The first is to treat the soil as to assist and hasten nature in the process of converting the plant food into available forms by means of good tillage.

The second is to return to the soil by means of manure and fertilizers an amount of plant food equivalent to that removed by the crop.

FARMYARD SIGNS.

If sheep or goats fight more than they usually do, or jump about the fields, you may look for a bad change of weather. Also when cattle stop feeding and chase each other, when the dogs are dull and sleepy, or howl or bark to an unusual degree.

In the farmyard before bad weather cocks crow earlier and more than usual, peacocks and guineafowls scream, turkeys gobble, and the fowls generally are noisy and restless.

a potion of healing for the wounds and sorrows of the world.

Neither shall the fruit thereof fail.—There is a seasonable fruitfulness, as well as an undying freshness about the good man's life. The end of the good man's life, its purpose, is fruit. The freshness and beauty are a form full of promise. But the tree must ever reach forth to the bearing of fruit, as it will always under the enrichment of the divine life.

WHEN NATIONS BACK DOWN.

Sometimes Forced to Apologise to Individuals.

Some few years ago, an Austrian officer, Major Kristuseck, went out to Buenos Ayres to wind up the affairs of a dead brother. When he got there he found that the whole amount—a matter of \$3,000,000—had been seized by a distant relative, who was not the heir at all.

Very naturally, the major took steps to recover the stolen money. But the next thing that happened was that he was arrested, and imprisoned without trial. The thief, it appears, had cunningly spread it about that Kristuseck was a spy in the pay of another South American Power. After a few weeks, Kristuseck managed to get word to the Austrian Minister, and was soon released. Then he communicated with the home Government, and Austria wasted no time in demanding an apology, which was personally delivered to the officer by a high official of the Argentine Republic.

At one time Turkey was constantly putting her foot in it, and having to apologise in consequence. About nine years ago six British warships, under Prince Louis of Battenburg, visited Asia Minor. Four officers went ashore on a shooting expedition. The local Bashaw at once arrested them, and locked them up in the filthy town prison, where they were kept all night. The row that followed started even the cunning old Sultan himself, and he sent word that the official responsible for the outrage was to beg the pardon of the offended officers.

France had occasion to apologise to two Englishmen a few years ago. The latter were paying a visit to the French settlement of Chandarnagar when they were set on by French soldiers, who clubbed them with their rifles, and then dragged them away to the guard-room. The British Resident came to their rescue, and they were released; but British opinion in India was so roused that the French Government voluntarily made an official apology to the two sufferers, and paid compensation.

A blackguardly trick was played by the Belgian officials of the Congo Free State upon two English missionaries in the year 1904. A missionary having died at the Upper River Station, two of his colleagues—a lady of over fifty and a younger man—went to a state post to report the death. The official, who professed to be unable to speak any language but Flemish, made them repeat after him what they believed to be a declaration of the cause of death, swear to it, and sign it.

A week later they discovered, to their horror, that what they had signed was a marriage certificate, and that they were legally married.

When the affair was reported to our Foreign Office, there was a tremendous row, so much so that the Congo Administration was for once thoroughly frightened, and

an aeroplane and vessels on the surface, it is possible to give warning of the approach of a submarine to a torpedo boat destroyer that can attack the submarine, or to a war ship that can avoid it.

These experiments, made at Cherbourg, France, seem to show that the submarine will not have the large field of usefulness for either attack or defense that has been expected of it. The aeroplane probably will make it possible to discover mines or torpedoes wherever they might be dangerous to war ships. Every one who has looked into water from a high place knows how clearly all objects are visible to a considerable depth.

Thus the great game of war receives another element of complexity. Bigger ships, more powerful cannon, improved submarines, extended use of wireless telegraphy and aeroplanes would make a naval battle of to-day different in important respects from any ever yet fought. What a pity that our sense of justice and our appreciation of the folly as well as of the wickedness of war do not develop so rapidly as our application of scientific knowledge to the art of killing! Yet the newest arbitration treaties promise much for the peaceful settlement of international disputes.

SENTENCE SERMONS.

Deceive nobody, not ever thyself.

God is a discovery, not an invention.

The keynote of Christianity is power not words.

Do the best you know, that you may know better.

You may not make a living, but you can make a life.

Friendship is the flower of a moment, and the fruit of time.

Would you count your true friends? Fall into misfortune.

The mountain is composed of atoms, and friendship of trifles.

There are advantages in growing old. It settles many questions.

Whoever complains of not having found a true friend accuses himself.

In all your work watch some master workman; it is a great help and incentive.

Teach your children to create. Don't always give them finished products to enjoy.

What is your life? It is even a vapor. Steam is a vapor, but, harnessed it moves the world.

The extraordinary rests on the ordinary and presupposes it. He who is not ordinary cannot be extraordinary.

We are cups to quench God's thirst, and God takes pleasure in a man when he fulfills the purpose of his being.

It is a common saying that a friend is kept by three things: by honoring him in his presence, by praising him in his absence, and by aiding him in his need.

PLEASANT TO HAVE AROUND.

"That Jones boy who used to work for you wants to hire out to me. Is he steady?"

"Steady? If he was any steadier he'd be motionless."

Most people want to learn a thing by setting out to teach it to others.

as clover, vetches, lupines, etc., are introduced.

If you dig up some of these plants you will find little nodules or tubercles on their roots. These nodules are the homes of numerous bacteria, which enable the plants to derive part of their food

THE SUNDAY SCHOOL LESSON

INTERNATIONAL LESSON, OCTOBER 8.

Lesson II. The life-giving stream,
Ezek. 47. 1-12. Golden
Text, Rev. 22. 17.

Chapter 47.—This chapter belongs to the third and last great section of the latter half of the book—chapters 40-48—which set forth a vision of the final glory and peace of the redeemed people of Israel. The preceding chapters of the section give an account of the temple buildings, and of the ordinances of the temple. The two closing chapters, including the lesson, deal with the life-giving stream issuing from the temple, the boundaries of the holy land, and the disposition of the tribes.

Verse 1. Brought me back — He had been in the outer court of the house of the Lord. There the people were accustomed to worship. Now he is conducted into the temple proper again. Ezekiel, belonging to the priestly class, was minutely familiar with everything that pertained to the temple, as an examination of previous chapters will quickly show. It must be borne in mind, of course, that he is still in the land of captivity. What he describes is part of a vision.

Waters issued out—This figure evidently had its basis in the fact that there existed a fountain, in connection with the temple hill, from which the waters flowed into the valley east of the city and so made their way toward the sea. This stream had, before Ezekiel's time, supplied a beautiful figure to the prophets (compare Isa. 8. 6). The Orientals enlarged upon the blessings brought them by such streams of water. This passage was the basis of Rev. 22. 1-2.

Right side of the house — This would be the south. The stream pursued its course eastward, passing the altar on the south side, and coming forth into the open on the right hand of the outer east gate.

2. He brought me out—As both the inner and outer east gates were closed (Ezek. 44 and 46), the prophet was led from the inner court by way of the north gate, round to the outer east gate, where, from the outside, he saw the stream emerge into the open at the south side of the gate.

3. The man—He is not to be identified with Jehovah, but is an imaginary being, a symbol of the revelation of God. He has the attributes of God, being bright like brass (Ezek. 1. 7), and speaking with authority (Ezek. 40. 3-4). The line in his hand was of flax, and was used for measuring greater distances, as the reed was used for shorter. With it he proceeded a thousand cubits (about a third of a mile) from the point where the water emerged from the gate. At the beginning the stream barely "trickled forth" (margin to verse

2), but already it has become ankle deep.

4-5.—The water rapidly deepens until, a mile from the temple, it has become deep enough to reach a man's loins, and, with another thousand cubits, it becomes an impassable river, one that a man cannot pass through unless he swim. So God's blessings grow more and more abounding as they flow on from life to life. This is the first fact about the river of life—its fullness. It is a picture of the new era of restored hope and felicity in Israel. God is enthroned in the temple, so the waters are represented as issuing from the sanctuary. Whatever blessings are enjoyed in the better day will be from God, and there will be an abundance about them that will leave nothing to be desired.

7. On the one side and on the other—The river flowed down through a gorge, or valley, and, as was usual, there were trees on either side. This suggests freshness and fruitfulness. The Paradise on the first page of Scripture, as well as that on the last page, had trees on the banks of the living streams. The righteous man is like a tree planted by the river. There he is perpetually nourished. The palm tree of the East attains its full perfection only as it is planted by the water.

8. Into the Arabah—This is the depression of the Dead Sea, and southward as far as the gulf of Akabah, a distance of 165 miles. All this country, besides the eastern region, or wilderness of Judaea, and the Dead Sea, is to come within the range of this onflowing river. And whatever is touched is healed. The desert place shall blossom like the rose, the bitter waters of the sea shall be made sweet, and everything shall minister to man's good, both material and spiritual. This is the Jewish conception of the kingdom of God on earth, but it is also a picture of the life-giving properties of the unending grace of God in the human heart.

9. Every living creature which swarmeth—Referring to the smaller animals, especially the fish of smaller size. Even in the waters of the Dead Sea, which are destitute of moving life, there shall be a multitude of fish. Where the life of God comes to abound there can abide no death.

10. Engedi—The modern Ain Jidy ("kid's well"), situated on the west shore of the Dead Sea, about half way farther on to the north, in all probability although it has not been actually identified, lay Englain. The great sea is the Mediterranean.

11. The miry places—These are the marshes about the Dead Sea. They are to be left as salt beds. The saltiness of the sea is due to the strata of salt rocks surrounding it.

12. Whose leaf shall not wither.—Compare Psalm 1, and Rev. 22.

2. The leaf is a thing of the spring-time. But, with the godly man, it has a perennial freshness. The storms and frosts of the year cannot blight it, for it draws stores of hope and promise eternally from God. Moreover, it is for healing. The sympathy of the godly man is

death, swear to it, and sign it.

A week later they discovered, to their horror, that what they had signed was a marriage certificate, and that they were legally married.

When the affair was reported to our Foreign Office, there was a tremendous row, so much so that the Congo Administration was for once thoroughly frightened, and humble apologies were offered, while the official who had played this heartless joke got the "sack."

WHAT HE THOUGHT.

"What do you call a person that reads heads?"

"A phrenologist, my boy."

"Gee! Then ma must be one of those things. She felt on my head this afternoon and said right away, 'You've been swimming.'"

DON'T PULL IT OFF.

"And you really think, doctor, that you must perform the operation to-day?"

"Oh, yes. There may be no necessity for it to-morrow."

VALUE OF SENSE

The Best Quality, for In
the Saint, is its Inb

"Who can reply to a sneer?" asked a theologian. The answer is plain; who ever cannot resist a sneer had better look to his position. For the most searching, merciless, and effective thing in the world is humor.

"The tragic poet rolls the thunder that frightens," says Landor, "the comic wields the lightning that kills."

There seems to be something in laughter that is directly opposed to the reverence and awe of religion. But for that reason wit has all along been far piety a most necessary, if bitter, physic.

The higher moods of the soul have always a tendency to grow unhealthy. It is but a step from the sweet ripe to rotten; and spiritual ecstasy has more than once, in the world's sad history, run into refined sensuousness, also into the worst of tyrannies and cruelties. And what an argument or a scripture text could never reach has been transfixed by a smile. The walls of many a spiritual Jericho-folly that have withstood laws, arms, and reasons, have tumbled at

THE SOUND OF LAUGHTER.

People deep in love do not laugh much because they are quite crazy. Egocism, in its overdevelopment, when it becomes a besetting sense of dignity, when it makes one feel he is a great and misunderstood man, laughs little because that also is a form of insanity. The religious bigot is, most monstrously serious, for the same reason.

When we say a sense of humor has religious value we do not imply that it is a divine or heavenly thing, for it is not. But it is something fully as necessary; it is most human. And what religion needs as much as heaviness is humanness. I do not know if there be such a word, but there ought to be.

UNCLE ZEBE'S CEMETERY

Den you-all doin' want me to work fo' you no mo'?" Uncle Zebe, one hand upon a tombstone, the other resting heavily on his rake, tremulously put the question to Mrs. Warren. As chairman of the cemetery committee she had come to inform Uncle Zebe that at the end of the month his services would be no longer required; and her task was a more difficult one than she had anticipated.

For a long term of years the old man had been sexton; but of late numerous sick spells and a "miz'ry" in the side had interfered seriously with his duties, and neglect had wrought havoc in the cemetery—usually so well kept and the source of much pride to the Aid Society.

"It isn't that we have any hard feelings against you, Uncle Zebe," said Mrs. Warren in as kindly a manner as possible. "You've done your work splendidly as long as you were well." She paused for a moment, hesitating to hurt him more than necessary. "You're not quite so strong as you used to be; and the work, especially since the spring rains, is more than you can manage."

"Who, me? Why, Mis' Mary, I's s'prised at you!" Uncle Zebe straightened up. "I has mighty nigh got de place back into shape agin, honey—'cep'in' de walks an' de driveway an' some o' de trees what was blowed down by de storm yistiddy. You see I's done got my strenth back, all right; but I can't use all of hit at oncet jes yet, Mis' Susie!" It was Uncle Zebe's habit to address his hearer by various names. "An' as fo' bein' able to ten' to de place all alone, why, I has been doin' hit all dese years an' you-all's been sa'fised. An' now, all of a sudden, Mis' Annie, you's tuck a notion in yo' haid dat Uncle Zebe ain't fitten fo' to do de work."

Mrs. Warran bit her lip and the desire to temporize possessed her. She regretted that this disagreeable errand had fallen to her lot and wondered if, now that the summer months were at hand and the chances of illness lessened, the society could not be made to reconsider its original intention and retain its old sexton for a while longer.

As she cogitated the matter, her question, "How old are you, Uncle Zebe?" was put somewhat absent-mindedly.

"I'll be eigthy-fo' yeahs ol' nex' November ef I lives an' nothin' happens," said Uncle Zebe proudly. "When I tol' Cunnel Slocom how ol' I is, de udder day, he say: 'Well Uncle Zebe, you's a octogeranium sho' nuff, now—dat's what you am!' An' ef de cunnel say I is all o' dat, I reckon I kin stan' up under de cim'tery work yet a while. I has fo' chillens an' seventeen gran'-chillens—an' dey ain't none of 'em as spry fo' dey age as I is. One er my gran'sons is down at de Tuxedo school, what Booker Wash'n on runs; an' he's de onlies' one what bezimbles his gran'daddy in smahtness."

There was a moment of silence. Suddenly Uncle Zebe brought himself up with a jerk.

"Who is you gwine to put in my

mustn't talk like that!" said Mrs. Warren as soothingly as possible. "It isn't absolutely certain that a change will have to be made—for the present, at least." She was in hopes that something might intervene at the meeting that would turn the tide in his favor; and, with the desire to end the interview and think the matter over, she left Uncle Zebe to his work.

For a long time after her departure he stood motionless by the tombstone. Then, turning to a small cedar tree near by, he said: "You's a ol' no-count hoss—dat's what you is; an' de buzzards has begun circlin' roun' an' waitin' fo' de chanct to git yo' carcass!" Slowly he bent to his task of raking the gravel, muttering as he worked.

It was three o'clock of the following afternoon and the Aid Society was in full session. The report of the cemetery committee had just been read. The president rose. "Ladies," she said, "you have heard the report of the committee recommending that a new and efficient sexton be appointed. What is your pleasure concerning it?" Mrs. Warren rustled uneasily in her seat, then made a movement as though to rise.

At this juncture the door of the vestry room opened and Uncle Zebe, a shapeless object in his hand battered out of all resemblance to a hat, stood upon the threshold. In honor of the occasion he had increased his girth considerably by the addition of his entire wardrobe, put on over his usual workday clothes, the whole surmounted by an old frock coat which seemed in danger of bursting from the extra strain put upon its seams. With a courtly bow he advanced to the center of the room.

"Ladies, 'scuse me," he began. "I wouldn't acome up heah to you-all's meetin', 'cause I knows I ain't got no business at such; but hit was de onlies' 'petunity I's gwine to git to talk to you when you's all togedder; so I tuck hit." He cleared his throat. "Ladies, I un'stan's you-all thinks I's too ol' an' puny to ten' to de cim'tery fo' you an' dat you is aimin' to get a man what's mo' spry to take my job."

"Now, ladies, jes 'cause I has been little polly dis winter, hit ain't no sign dat I ain't as good as I ever was. No, suh. You-all knows dat yo' helf gives out now an' den, an' yo' sorter has to set back a spell an' ketch yo' breff. Dese ol' ahms"—and he held up two bony specimens—"is as strong as dey evah was; an' I'm as peart."

"Hit'll be thirty-five yeahs dis very monf dat yo' ma, Mis' Fanny," and he turned to the chair, "got me dat cim'tery; an' I has been workin' at hit faithful evah sence."

"Dey ain't a blade o' grass, er a flower sca'cely, dat on' nod 'Howdy?' to ol' Uncle Zebe when I comes in de gate. Dey ain't a tree on dat groun' dat I ain't tend-ed to lak hit was a baby. I knows dem graves lak I knows myself. Dey ain't one o' dem folks what's been laid away dat I ain't he'ped to put 'em in dey las' home. You-all knows I has looked after 'em lak dey was my own chillens. Hit jes seems lak dat place an' dem folkses is a part o' my ol' body."

"Why, when I walks in de gate of a mawnin' an' stahts fo' to ten' to things"—a far-away look came into Uncle Zebe's eyes and he seemed to forget his audience—"hit's 'Howdy, ev'ybody! How is you comin', dis mawnin'? Looks lak

Notes of Particular Interest to Women Folks

FAVORITE RECIPES.

Pie Crust.—Three tablespoonfuls of flour to one of lard (heaping); this makes one crust. Salt and a little baking powder. Mix with fork. Use cold water and not too much. Roll out the top crust, spread lard on thinly, sift flour over it, pat down with hands thoroughly. Before putting in oven dash cold water over the pie. You will be well repaid when you see your flaky pie.

Doughnuts.—Cup granulated sugar, level teaspoon butter; cream sugar and butter. One well beaten egg, one cup sweet milk, two teaspoons baking powder sifted in flour (do not get too stiff), salt, and nutmeg. Handle as little as possible. Have lard smoking before putting in cakes. Use knitting needle to turn them. Turn as soon as they come to the top; keep turning until done; will be an even color then.

To Cook Peas.—This is an excellent way to cook peas when they are a little old: One quart of peas, four ounces of pork, one tablespoon of butter, one-half cup of water, two white onions, and one-eighth teaspoon of pepper. Cut the pork into small bits. Put butter in stewpan; when it melts, add the pork and cook gently until a light brown, then add the water, peas, onions, and pepper.

Schmere Kase.—The Germans use drained buttermilk as a cheese and add salt, pepper, also, if liked, a little green onion top. This is an economical supper dish and delicious.

Tea Cakes.—One cup of sugar, two-thirds cup of butter, two eggs, one cup of raisins, one cup chopped walnuts, two cups of flour, one small teaspoon soda, one-third cup of hot water, one small teaspoon of cinnamon, one small teaspoon of cloves, pinch of salt. Drop by teaspoonfuls on buttered tins, being sure they do not touch, and bake in quick oven.

Veal Steak.—Select a good, meaty piece of veal from the leg in one piece, about two inches thick. Fry about eight or ten slices of bacon in a deep steel or iron frying pan; do not fry too crisp, and when done remove them and pour off the fat, leaving just enough on pan to fry the veal. Brown the veal well, on both sides. When well browned lay on top the bacon slices and pour on enough boiling water to barely cover all; salt to taste and add to water sliced three medium sized onions. Cover tightly (use a cover with an iron on top) and let simmer slowly for about two hours, according to thickness of meat. About ten minutes before it is done rub to a smooth paste in water a heaping tablespoonful of flour to thicken gravy. A little left over meat gravy or soup adds richness to gravy.

red smooth in a little cold water. Cook until clear, take from the fire, and add a half teaspoonful of orange extract.

Radish and Olive Salad.—Slice the radishes on a fluted vegetable slicer and cut the olives in strips. Mix, add a French dressing made with four tablespoonfuls of olive oil, a half teaspoonful of vinegar, and garnish with lettuce cress, of the radish crowns.

TOMATOES.

Tomato Relish.—A nice relish can be made by cutting a piece from the stem ends of ripe tomatoes; remove the pulp and mix with an equal quantity of chopped cucumber; replace in the tomatoes, and serve on a lettuce leaf with mayonnaise dressing.

Ripe Tomato Salad.—One peck of solid ripe tomatoes, two cupfuls of brown sugar, one-half cupful of salt, one cupful of chopped celery, one cupful of chopped horse radish, one cupful of chopped onion, one-half cupful of celery seed, one-half cupful of mustard seed, and vinegar enough to more than cover. Slice tomatoes in a stone jar and mix sugar, salt, celery, radish, onions and seed with the vinegar, and pour over and cover all with a heavy cloth; no cooking, and they will keep a year. These pickles are good with cold meats.

A dainty and inexpensive trimming for lingerie ruffles may be made by alternate rows of hemstitched tucks and rows of round eyelets or embroidered dots.

Aprons that are worn thin in front may be made quite good again. Rip off the belt, bib or yoke, cut the apron down the front; hem these edges, sew the other edges together, and put on belt again.

Fashion Hints

SUIT COATS AND "TAMS."

Suit coats are longer, twenty-eight inches against twenty-four last season, and long coats are shorter, forty-five inches this season against fifty to fifty-two the last. The smartest trotteur models are almost painfully plain. Hardly ever before has there been so distinct a demarcation between the plain tailored and the elaborate costume. Almost all the tailored designs show serviceable buttons in horn, etc., and the worked-through buttonholes. Some of the more elaborate costumes still show frogs and braid loops, but the worked-through buttonhole is considered

less—'an' dey ain't none of 'em as spry fo' dey age as I is. One er my gran'fons is down at de Tuxedo school, what Booker Wash'n'on runs; an' he's de onlies' one what bezimble his gran'daddy in smahtness."

There was a moment of silence. Suddenly Uncle Zebe brought himself up with a jerk.

"Who is you gwine to put in my place?" he asked, peering sharply at Mrs. Warren from under his bushy gray brows.

"It hasn't been quite decided," she answered. "The matter is to be settled at to-morrow's meeting."

"Hit's dat no-count Ike Moulton dat you's fixin' to give my job to, Mis' Sadie—now, ain't hit?" questioned Uncle Zebe. "Cause now hit comes to my min' how he's been mosyin' roun' heah axin' me questions 'bout dis an' dat, an' talkin' 'bout de work—an' all de time me not bein' a bit supstitious dat he was figgerin' to git me turned loose. Dat's de way hit is," he went on bitterly; "when you gits ol' you ain't fitten to hol' a job no mo', an' dey hustle you outen de way ez quick ez dey kin."

"Now—now, Uncle Zebe, you

SENSE OF HUMOR

7, for Individual Use by
its Inherent Sanity

When one looks abroad in this comfortable world and sees the infinite amount of play and unmixed fun which its Creator has written into it he can hardly resist the logical conclusion that God is not so utterly sober as we have been led to believe. "Who," asks Dr. Holmes, "taught the kitten to play with its tail, and the canary to perk its head from side to side while singing?" It can hardly be irrelevant to conceive of Him who planted such capering instincts in all young things, in romping poodles and leaping lambs, in birds and insects and children, it cannot be a sin to think of Him who ordered this, and made the blithe morning and all morning feelings, as being jocund, and having somewhere in His mighty mind

A STRAIN OF MIRTH.

Humor, of course, is not always right. Everything human has its perversions. There is a devil's glee, there is the snicker of the gross and fleshy, and there is that goatlike inanity that would caper on its mother's grave to raise a grin. But let such things have their day. Our deepest reverences do not hear them, our real purity cannot see them.

The humor of a kindly heart, the friendly wit that is the babbling over of a full humanity, the surgical smile that lances our too sickly sentiments, the sunny laugh that with its genial broadness rebukes our narrow thought, the disinfectant railery that purges our egotisms, these are all friends of man and true him to life and destiny.

If it be as Carlyle says, that in the center of worship is sorrow, it is no less true that all about its edges is a fringe of humor.

He is our friend who makes us weep for our sins, and he is not our enemy who makes our follies ridiculous.

DR. FRANK CRANE.

lak dey was my own chillens. Hit jes seems lak dat place an' dem folkses is a part o' my ol' body.

"Why, when I walks in de gate of a mawnin' an' stahts fo' to ten' to things"—a far-away look came into Uncle Zebe's eyes and he seemed to forget his audience—"hit's 'Howdy, ev'body! How is you comin', dis mawnin'? Looks lak we's agwine to have some 'rain to-day, don't hit? Good mawnin,' Mis' Clara. Lawd, how sweet dem v'lets round you do smell! Howdy, Majah Brown? I hopes you's well to-day, suh. I reckon I'll have to put a piece o' sod ovah dat bal' p'ace by yo' ha'd—de grass am so thin whar de shade is. Heigho! li'l' Mis' Bessie! Well, bless m' soul! Ef dat syc'mo' tree den jes love to kiver you up wid a blanket o' leaves ovah night. An' de tea rose on you's gittin' ready to bloom too! Hit jes beats my time how peart dat rose is 'bout bein' de fustes' one to say 'Howdy?' to June ev'y yeah!"

"I stops at Mis' Martha's grave, what died endurin' de yell'er fever nussin' de sick, an' I gives hit a lovin' pat. Den I stops to pick off a daid leaf fum de ivory vine on Judge Wilson's grave, what I raised fum a slip. 'Cross de way is Mis' Ev'lyn an' Mistah Will, what was drowned in de rivah; an' 'tween de two graves is de moss rose what come outen Mis' Evlyn's yahd. I 'members how she use' to love dat rosebush—an' dat's how come me to plant hit.

"I has put flowers on ol' Mis' Allen evah sence her daughter had to go 'way off to Taxes, 'cause I knows how she use' to come out heah on de university of her ma's death an' lay a bunch down ev'y yeah.

"I keeps Mis' Barbry's grave-stone washed as clean as ef hit was her own kitchen flo', 'cause I knows she kin res' happier—she was dat clean on dis heah sinful earf.

"An' dat's de way hit goes—waterin' a flower heah, fixin' a grave dere; twel by-an-by de sun commences drappin' down an' de shadders o' de tombstones gits longer and longer; and I takes my shovel an' rake an' hoe, an' stops fo' a minute to look all roun'.

"'Good night, chillens,' I says. 'Good night, ev'body. Yo'u Uncle Zebe's agwine to see you in de mawnin'.' An' den I goes on home."

He paused for a moment and looked about, as though just realizing the presence of an audience. The room was quite still. There was scarcely one present whom he had not known almost from infancy or whose history was not intimately bound up with that of the little town.

"White folks," said Uncle Zebe, "don't you see how hit is? Why, you-all jes nachully can't take dem cim'tery away fum me. Why, dem folks an' de flowers an' trees is so plumb use' to ol' Uncle Zebe's han' dat hit 'ud be lak givin' 'em a stepdaddy to 'low anudder nigger roun' 'em. What's a no-count young coon, wid gals on de brain an' yell'er shoes on his feets, gwine to keer 'bout dat place ez long ez he draws his pay? Co'se he mought keep hit middlin' clean, but what's he gwine to keep 'bout dem graves er de peoples what's in 'em?"

"Ladies, I ain't wo' out yit, no-how. An' ef I does git a li'l' miz'ry in de side off an' on, why, some er my gran'chillens, er dey mammy, 'll come ovah an' look arter de place—'cause, nex' to me, dey knows hit an' loves hit better'n any any one." He bowed once more. "Dat's all I got to say, ladies; an' I hopes you'll scuse me

simmer slowly for about two hours, according to thickness of meat. About ten minutes before it is done rub to a smooth paste in water a heaping tablespoonful of flour to thicken gravy. A little left over meat gravy or soup adds richness to gravy.

LUNCHEON DISHES.

Beef Olives.—Take three-fourths pound of tender beefsteak, one tablespoonful of bread crumbs, one tablespoonful of chopped suet, three anchovies, one hard boiled egg, one teaspoon of chopped parsley, and one teaspoonful of grated lemon rind. Cut the beef into thin, even-sized slices. Put the anchovies, chopped egg, parsley, suet, lemon rind, and bread crumbs into a basin, season with salt and pepper to taste, and add enough beaten egg to bind them together. Put a little of this forcemeat into each slice of beef, then roll it up and tie loosely with string. Put these "olives" into a saucepan and add enough stock to cover them, then let them stew gently for three-quarters of an hour. Serve them with gravy and baked tomatoes.

Florida Salad.—Cut slices from stem ends of six green peppers and remove the seeds. Refill with grapefruit cut into cubes, the tenderest stalks of celery cut into small pieces, and shredded almond meats, allowing twice as much grapefruit as celery, and one-third as many nut meats as grapefruit. Arrange in nests of endive or lettuce leaves, and serve with mayonnaise dressing.

Mexican Salad.—Take equal quantities of cucumbers, celery, and tomatoes; chop each vegetable separately until fine, mix, add a pepper cut into tiny slices (the scissors should be used for this) and an onion scraped to a pulp. Season with a tablespoonful of vinegar, the juice of one lemon, salt and pepper. Line the salad bowl with lettuce leaves or parsley and turn the salad into it.

Banana Croquettes.—Peel six bananas, cut a slice from each end, then cut into crosswise sections. Dredge well with powdered sugar and marinate one hour in the juice of two oranges, turning the sections over now and then. Roll in beaten egg, then in grated crumbs, and fry in deep hot fat. For the sauce, strain the syrup after the bananas have been taken out, bring just to boiling point, then thicken with one tablespoonful cornstarch stir-

fo' breakin' into de meetin'. Thanky."

He stepped back, closing the door after him.

A long sigh swept over his audience. Then a sudden hum of excited whispering rose and disorder held sway for a moment, until the rapping of the president's gavel. Once more the voices subsided to quiet as she rose.

"Ladies," said Mrs. Slocum, striving to make her tones as official as possible and not succeeding in the least, "you have heard Uncle Zebe's appeal. What is your pleasure concerning his retention?"

Mrs. Warren was the first one on her feet.

"Madam President," she said, "I move that we indefinitely postpone his removal."

"I second that motion," said another member excitedly.

And the re-election of Uncle Zebe was made unanimous.—Blanche Goodman in Saturday Evening Post.

ly ever before has there been so distinct a demarcation between the plain tailored and the elaborate costume. Almost all the tailored designs show serviceable buttons in horn, etc., and the worked-through buttonholes. Some of the more elaborate costumes still snow frogs and braid loops, but the worked-through buttonhole is considered the smartest.

The craze for the beret or Tam o' Shanter hat is at its height. One example has a large, full crown of draped black velvet, mounted over a brim or band of skunk fur, the brim being quite broad at the left side and at the back, and vanishing altogether at the right side. A full black aigrette is erected at the center front, headed with a cabochon of gold braid from which gold fringe is suspended.

The one-piece dress has the advantage as a golfing outfit that skirt, belt and waist are held together. The hat should be well pinned on the hair securely arranged, as it is most disastrous to the game to feel a hairpin slip and a hat slide when rushing for a ball. White buckskin or canvas tennis shoes, either high or low, are correct, and one may wear black or white stockings.

If a separate skirt and waist should be preferred, there are many materials to choose from, such as flannel, pique, repp, etc. Flannel looks attractive when new, but generally turns yellow after the first washing and is therefore not advised, as half the charm of tennis garments lies in their spotlessness. Nothing looks worse than colored linens that have become faded and streaked.

You cannot neglect a shoe and expect it to look its best. Each kind of shoes requires individual treatment.

Patent leather is uncertain and dealers will not guarantee it, but coddle it and cracks are indefinitely postponed. Never put on a patent leather shoe when it is cold. Rub it slightly with the hand or a bit of flannel. This keeps the skin soft and supple.

It is important to keep patent leather shoes on trees when not in use. If these are wanting, stuff firmly with tissue paper. In cold weather do not wear them out-doors if it can be avoided, and never wear them under rubbers.

Wiping patent leather with a cloth dipped in milk, then polishing with dry flannel, will restore the luster.

Tan leather spots readily and should be polished before the shoes are worn.

White shoes, like white gloves, are more serviceable than colors. There are various good pastes for cleaning them, and when too soiled the canvas ones can be scrubbed with soap and water and put in the sun to dry. Drying in the sun prevents their yellowing.

Suede shoes soon get shiny, but they last better if they are brushed with a soft brush before and after wearing. Black suede can have the spots touched up with charcoal or ink or the polish that comes for the purpose.

The girl about to throw away suede slippers was advised by a shoemaker to rub them with a stick of nitrate of silver. She did so, taking care not to let the stick rest on one spot, and the suede turned into a smooth leather with soft dull finish.

In using this treatment protect the hands or they may be badly burnt, and do the work quickly or the shoes may be eaten through with the acid. Remember, it is dangerous work.

For tea you can't beat LIPTON'S TEA

OVER 2 MILLION PACKAGES SOLD WEEKLY

ITALY DECLARES WAR ON TURKEY

Italian Cruisers Destroy Turkish Torpedo Boats at Prevesa and Land a Force.

A despatch from Rome says: Italy declared war on Turkey beginning at 2.30 on Friday afternoon, following a session of the Cabinet, at which the Turkish reply to Italy's ultimatum was read. An official statement from the Foreign Office says that Turkey's reply to Italy's ultimatum is not peremptory as was demanded, but is evasive and dilatory. In consequence of that fact the Government declared war against Turkey. After the reception of the Turkish reply there was a conference between the Premier and the Foreign Minister and the Cabinet. It was decided to occupy Tripoli without delay. The Turkish Charge d'Affaires has received his passports to the frontier and started for home on Friday evening.

REFUSED TO SURRENDER.

A despatch from Tripoli says: The Italian destroyer that entered the port under the white flag this afternoon brought a summons for the surrender of the Turkish garrison. The Turkish authorities refused. All Europeans have taken refuge in the Italian Consulate, and are awaiting the first shot. The Italian colony is preparing for defence. As soon as the ultimatum was delivered to the Turkish Government the Italian fleet established a blockade off the coast of Tripoli, and no Turkish steamer is now able to enter.

The present mission of the fleet is to prepare everything for landing the Army Corps, which is commanded by General Caneva. If the Italian subjects are molested by Turkey the fleet will extend its area of operations. If the Turkish warships attempt action a strong Italian squadron will be sent to deal with it immediately. No disembarkation of sailors and marines at Tripoli is to be expected, as the force would not be sufficient to sustain an attack by the garrison of Tripoli.

The Turkish fortifications are armed only with small calibre Krupp guns, and cannot injure the Italian warships, which will be able to destroy the forts without difficulty. The cruisers Marco Polo and

assumed command of the forces at Tripoli, stating that the Italians sinking the first two barges. It is rumored also that Italian forces have landed both at Tripoli and began to disembark Friday afternoon, but the Turks succeeded in Benghazi.

INSULTED ITALIAN FLAG.

A despatch from Salonica says: Immense crowds gathered before the Italian Consulate here on Saturday night. The Governor of the town and the Director of Police tore down the flagstaff and the Italian arms, which they trampled under foot to the accompaniment of angry howls and the vilest epithets. The Italian Consul and Vice-Consul surveyed the scene from the steps of the Consulate, courageously running the risk of at any moment falling victims to the bullets of some fanatical Mussulman. The Italian postoffice and other establishments afterwards received similar treatment. Grave news has been received from Albania, where the authorities are apprehensive of untoward developments.

BOMBARDED RESHADIE.

A despatch from Constantinople says: It is announced from Janina that two Italian warships on Saturday bombarded the port of Reshadie and torpedo boats lying in that harbor, one of which was damaged and landed its crew. The Italian ships entered the port and shelled the town, several houses being struck. After taking soundings they left and later entered Port Musto, taking the Captain of the port and three boatmen prisoners.

WAR MAY END SOON.

A despatch from London says: The war between Italy and Turkey is still one of rather potential than of actual happenings. Most of the news from the actual seat of war is either negative or contradictory. It may be summed up by saying that the confirmed facts as to what happened since the state of war was declared are that there was a fight off Prevesa in which one Turkish gunboat and one torpedo

PRICES OF FARM PRODUCTS

REPORTS FROM THE LEADING TRADE CENTRES OF AMERICA.

Prices of Cattle, Grain, Cheese and Other Produce at Home and Abroad.

BREADSTUFFS.

Toronto, Oct. 3.—Flour—Winter wheat, 90 per cent. patents, unchanged at \$3.50, Montreal freight. Manitoba flours—First patents, \$5.30; second patents, \$4.80, and strong bakers', \$4.60, on track, Toronto.

Manitoba Wheat—New No. 1 Northern, \$1.05, Bay ports; No. 2 Northern, \$1.04; and No. 3, \$1.02, Bay ports.

Ontario Wheat—No. 2 white, red or mixed, new, 85 to 86c, outside.

Peas—Good milling peas, 92 to 95c outside.

Oats—Ontario oats quiet and steady, with No. 2 quoted at 41 to 42c, outside, and No. 3 at 40c. No. 2 Western Canada, 45c, and No. 3, 44c, Bay ports.

Barley—No. 2 is probably worth 75c, outside.

Corn—No. 2 American yellow quoted at 70 1/2c, Bay ports.

Rye—Car lots outside, 75c west, and 77c east.

Buckwheat—No. 2 at 54 to 55c, outside. Bran—Manitoba bran is quoted at \$23 to \$23.50, in bags, Toronto freight. Shorts, \$25.

COUNTRY PRODUCE.

Beans—Small lots of hand-picked quoted at \$2.30 per bushel.

Honey—Extracted, in tins, 10 to 11c per lb. Combs, \$2.25 to \$2.50.

Baled Hay—No. 1 at \$13 to \$14, on track, and No. 2 at \$10 to \$11.

Baled Straw—\$6 to \$6.50, on track, Toronto.

Potatoes—Car lots, in bags, at 90c.

Poultry—Prices of dressed poultry in quantities.—Chickens, 14c per lb.; fowl, 11 to 12c; ducks, 13c; turkeys, 20c. Live poultry, about 2c lower than the above.

BUTTER, EGGS, CHEESE.

Butter—Dairy prints, 21 to 23c; inferior, 16 to 17c. Creamery quoted at 26 to 27c per lb. for rolls, and at 23 to 24c for solids.

Eggs—Strictly new-laid quoted at 23 to 24c, and fresh at 20 to 21c per dozen, in case lots.

Cheese—Large quoted at 15c per lb., and twins at 15 1/4c.

HOG PRODUCTS.

Bacon—Long clear, 12 to 12 1/2c per lb in case lots. Pork, short cut, \$23; do. mess, \$20 to \$21. Hams, medium to light, 17 to 17 1/2c; do., heavy, 15 to 15 1/2c; rolls 11 to 11 1/2c; breakfast bacon, 17 to 18c; backs, 19 1/2 to 20c.

Lard—Tierces, 10 1/2c; tubs, 10 3/4c; pails 11c.

BUSINESS AT MONTREAL.

Montreal, Oct. 3.—Oats—Canadian Western, No. 2, 47c, car lots ex store; extra No. 1 feed, 46 1/2c; No. 3 C. W., 46c; No. 2 local white, 45 1/2c; No. 3 local white, 45c; No. 4 local white, 44 1/2c. Flour—Manitoba Spring wheat patents, firsts, \$5.40; do., seconds, \$4.90; Winter wheat patents, \$4.75 to \$5; strong bakers', \$4.70; straight rollers, \$4.25 to \$4.40; do., in bags, \$1.90 to \$2. Rolled oats—Per barrel, \$5.25; bag of 90 lbs., \$2.50. Corn—American No. 3 yellow, 74 to 74 1/2c. Millfeed—Bran, Ontario, \$23 to \$24; Manitoba, \$23; middlings, Ontario, \$27 to \$28; shorts, Manitoba, \$25; middlings, \$26 to \$32. Eggs—Selected, 24 to 26c; No. 1 stock, 20 to

BANKS AND BONDS

¶ Bonds have the preference as safe and profitable investments.

¶ Formerly Banks, Insurance Companies and other financial concerns invested their cash surpluses largely in Real Estate Mortgages, to-day they are purchasing the Bond issues of established and prosperous corporations considering that they offer the greatest security and best interest returns.

¶ There is no reasonable argument to offset the fact that what is the best investment for the Bank surplus is the best investment for the individual investor.

¶ Write to-day for our booklet on Bonds, and Bond issues we recommend.

THE NEWS IN A PARAGRAPH

HAPPENINGS FROM ALL OVER THE GLOBE IN A NUTSHELL.

Canada, the Empire and the World in General Before Your Eyes.

CANADA.

October 30 will be Thanksgiving Day.

The railways are applying for increased remuneration for carrying the mails.

Berlin, Ont., has over 15,000 population, and will soon be incorporated as a city.

Louis Karouski, an insane prisoner, hanged himself in Sault Ste. Marie jail.

The immigration arrivals in Canada for the five months ending September 1 last numbered 212,854.

Wholesale robberies of Grand Trunk and Wabash freight cars in Western Ontario are giving the detectives a lot of trouble.

Mr. J. Gosselin of Lewis has been awarded the contract for the Quebec terminal of the National Transcontinental Railway at \$745,000.

The launch Merry Widow was rammed and sunk by the steamer E. A. Shores, off Cedar Point, Lake Erie, and August Beamer, jun., was drowned.

A man calling himself Alex. Johnston was arrested at Prince Rupert on suspicion of being concerned in the New Westminster bank robbery.

Lieut.-Governor Sir Daniel and Lady McMillan were banqueted by Winnipeg citizens and given a handsome present. Sir Daniel is retiring.

Eight thousand dollars was stolen from the safe of the Canadian Express Company at Hamilton, and

the force would not be sufficient to sustain an attack by the garrison of Tripoli.

The Turkish fortifications are armed only with small calibre Krupp guns, and cannot injure the Italian warships, which will be able to destroy the forts without difficulty. The cruisers Marco Polo and Vetter Pisani left Taranto with the squadron of torpedo boats and destroyers under the command of the Duke of Abruzzi. General Caneva, with the expeditionary forces, will be accompanied by General Bricola and the Count Giraldo. The first force is made up of 25,000 men. There will be 40,000 men altogether when the entire force is landed. Regiments are departing daily from the chief Italian towns for Palermo, Naples, Brindisi, Syracuse, Catania, Taranto, Genoa, Acona and Venice, where they will embark aboard transports. The force will be established at Tripoli by Oct. 10.

Old ships, with ammunition, guns, and telegraphic apparatus, will follow the transports. Aeroplanes and probably other airships will be despatched later.

The warships blockading Tripoli are the Pisa, Amalfi, Sardegna, Napoli, and Marese. In addition there are six destroyers.

TURKISH SHIPS DAMAGED.

A despatch from Paris says: The Matin's Athens correspondent, says the telegraph official at Vozitza, Greece, wires to the Government that a naval battle occurred off Prevesa at 2 o'clock on Friday afternoon. Italian warships belonging to the Ionian squadron encountered a flotilla of Turkish destroyers cruising off the coast of Epirus. The Italians promptly attacked the flotilla, and two Turkish ships were badly damaged by shells. They have gone ashore in the Gulf of Arta.

Prevesa is the southernmost point of Albania. The object of Italy is evidently to encourage the revolt of Albania, which is smarting under the recent cruelties practised by the Turkish General during the rising.

FIGHTING AT TRIPOLI.

A despatch from Constantinople says: The Turkish War Ministry, according to the reports current here on Friday night, has received a despatch from the late Turkish Military Attache at Paris, who has

of actual happenings. Most of the news from the actual seat of war is either negative or contradictory. It may be summed up by saying that the confirmed facts as to what happened since the state of war was declared are that there was a fight off Prevesa in which one Turkish gunboat and one torpedo boat were sunk, that two Turkish transports and a yacht have been captured, that the Turkish Ministry has fallen, and that Turkey has appealed to the powers for intervention.

Tripoli has not been bombarded, as stated in the despatches on Saturday, and is not likely to be, if the Turks do not oppose the Italian landing. The warlike operations are confined to a blockade and the capture on either side of a few small vessels.

MONTREAL ASSESSMENT.

Remarkable Advance Shown in Property Valuation.

A despatch from Montreal says: For some weeks past clerks at the City Hall have been working upon a report which will show the increase in the property valuation of the city for the current year. The report shows that the increase in the gross valuation of property amounts to forty-five millions of dollars. Nineteen millions of the amount is attributed to the assessment, for the first time in the history of the city, of the harbor property. Up to the current year this property was shown on the exempted list of the city. The total assessment valuation of all the real estate and land in the city now reaches a sum of almost five hundred million dollars. Last year the total valuation was four hundred and thirty-seven millions.

EARL'S NIECE GOES ON STAGE

Has Become Tired of Rounds of House Parties and Dances.

A despatch from London says: The latest society recruit to the Gaiety Theatre Company is Eleanor Montgomery, daughter of Lady Sophia Constance Montgomery, and niece of the Earl of Eglinton. She gives her own reason for going on the stage. She has become tired, she says, of rounds of house parties and dances, and an idle life generally.

REINDEER FOR FAR NORTH

Shipment From Newfoundland to Fort Smith Arrives at Edmonton.

A despatch from Edmonton says: Three carloads of reindeer from northern Newfoundland arrived in Edmonton on Wednesday on the Canadian Northern Railway from the east. There were 43 reindeer in three cars, and a fourth car was stocked with reindeer food, moss and grass. The Department of the Interior has planned to stock the district of Mackenzie, and the animals are to be used for carrying purposes in long reaches of the north in place of dogs. The consignment of reindeer left Newfoundland Sept. 8, and passed through

Quebec on Sept. 18 to reach Edmonton a week later. The reindeer will be taken by rail as far as Stony Creek, sixty miles north of Edmonton, and from that point they will be taken overland to Athabasca Landing. Some that have been well broken will be led and the others will be conveyed in waggons. At Athabasca Landing the animals will be placed in scows and floated down the Athabasca River to Fort Smith, which is their destination. They will have travelled fully five thousand miles by the time their journey is at an end.

patents, \$4.75 to \$5; strong bakers', \$4.70; straight rollers, \$4.25 to \$4.40; do. in bags, \$1.90 to \$2. Rolled oats—Per barrel, \$5.25; bag of 90 lbs., \$2.50. Corn—American No. 3 yellow, 74 to 74.1-2c. Millfeed—Bran, Ontario, \$23 to \$24; Manitoba, \$23; middlings, Ontario, \$27 to \$28; shorts, Manitoba, \$25; moullie, \$26 to \$32. Eggs—Selected, 24 to 26c; No. 1 stock, 20 to 22c. Cheese—Westerns, 14.1-2 to 14.3-4c; easterns, 14 to 14.1-4c. Butter—Choicest, 24.3-4 to 25c; seconds, 24.1-4 to 24.1-2c.

UNITED STATES MARKETS.

Buffalo, Oct. 3.—Spring wheat—No. 1 Northern, carloads, store \$1.12 1-2; Winter, No. 2 red, 97c; No. 3 red, 95c; No. 2 white, 95c. Corn—No. 3 yellow, 73.3-4c; No. 4 yellow, 73.1-2c; No. 3 corn, 71.3-4c, all on track, through billed. Oats—No. 2 white, 50.3-4c; No. 3 white, 50c; No. 4 white, 49c. Barley—Malting, \$1.16 to \$1.25.

Minneapolis, Oct. 3.—Wheat—September, \$1.05 1-2; December, \$1.07 3-4; May, \$1.11 3-4; No. 1 hard, \$1.08 3-4; No. 1 Northern, \$1.07 1-4 to \$1.08 1-4; No. 2 Northern, \$1.03 3-4 to \$1.06 1-4; No. 3 wheat, 98.3-4c to \$1.01 3-4. Corn—No. 3 yellow, 67 to 67.1-2c. Oats—No. 3 white, 45 to 45.1-2c. Rye—No. 2, 90.1-2 to 91c. Bran—\$21.50 to \$22. Flour—First patents, \$5.30 to \$5.60; second patents, \$4.90 to \$5.20; first clears, \$3.50 to \$4.70; second clears, \$2.70 to \$3.10.

LIVE STOCK MARKETS.

Montreal, Oct. 3.—North-West cattle, \$5.50 to \$5.70; no choice Eastern steers; good steers, one lot sold at \$5.25 to \$5.50; fair, \$4.75 to \$5. Bulls are of slightly better quality, and for heavy bulls \$3.50 was asked, but only \$3 to \$3.25 bid; light bulls, \$2.50 to \$2.75; cows, no good cows on offer; demand poor; poor to medium, \$4.50 to \$4.75; canners, \$2.50 to \$3.25. One load of heifers sold by one shipper for \$5. Milksters, \$25 to \$70; Springers, \$40 to \$60 each. Select hogs, \$6.75; underweights (under 140 pounds), \$6.50; sows \$5.25; stags, \$3.75 per cwt., off cars.

Toronto, Oct. 3.—The general run of medium butcher steady at \$5.50 to \$5.80, and common mixed at \$3.75 to \$4.50. Cows, easier at \$4.25 to \$4.80; extra choice, \$5; bulls, \$3.50 to \$5; canners, \$1.50 to \$2.75. Feeders, choice steers, 850 to 1,050 pounds, \$5 to \$5.25; good heifers, \$4.50 to \$4.85; bulls, \$3.50 to \$4. Sheep market easier; light ewes, \$3.50 to \$4; heavy, \$3 to \$3.35; bucks, \$3. Lambs: market easier at \$5 to \$5.50. Calves, \$3.50 to \$8. Hogs, market weak, with prospects lower, letters of a son

DEATH REVEALS DUAL LIFE.

St. Louis Lawyer Fled From Canada Twenty Years Ago.

A despatch from St. Louis, Mo., says: The remarkable story of the hidden life of James M. Sutherland for twenty years a lawyer in St. Louis, has been revealed through a visit to this city of his son, J. Sinclair Sutherland, of Charlotte-town, Prince Edward Island. Sutherland was buried several days ago in St. Peter's Cemetery beside the beautiful woman who for more than fifteen years had held a high place in St. Louis as his wife. She died three years ago. She was the daughter of a clergyman and the wife of Sutherland's law partner when he was a Queen's Counselor in Canada. She came to the United States after her husband had died suddenly and Sutherland followed her. Sutherland's widow and four children are in Canada.

Canada's foreign trade in August increased by over eighteen millions. Lord Southcona will continue in office as High Commissioner in London.

bank robbery.

Lieut.-Governor Sir Daniel and Lady McMillan were banqueted by Winnipeg citizens and given a handsome present. Sir Daniel is retiring.

Eight thousand dollars was stolen from the safe of the Canadian Express Company at Hamilton, and George Kennaugh, the night clerk, and another man are under arrest.

Owing to the rush of settlers into Peace River district, Mounted Police officials have issued a warning that there is no surplus food supply, and newcomers are advised to bring plenty of provisions with them.

GREAT BRITAIN.

The Duke and Duchess of Connaught will sail for Canada on the 6th of October.

There is much anxiety in Britain as to possible complications in Greece and the Balkans.

The British Government has decided to appoint a Board of Trade Commission to arbitrate on labor disputes.

Rev. Dr. William Patrick, Principal of Manitoba Presbyterian College, died on Thursday at Kirkintilloch, Scotland.

The Irish railway strike has not yet been settled owing to the refusal of the companies to reinstate all the men who went out.

The grandson and heir of the late Mr. W. E. Gladstone has been elected for the Kilmarnock Burghs division in the Imperial Parliament.

GENERAL.

Greece may take advantage of Turkey's trouble to strike.

Over one thousand anti-militarists have been arrested in Italy.

Orders for the construction of innumerable new roads throughout Afghanistan have just been issued by the Ameer, who has become a keen enthusiast on motoring.

FOR RUSSIA'S NAVY.

Estimates for 1912 Call for an Expenditure of \$82,108,078.

A despatch from St. Petersburg says: The naval estimates for 1912, which were submitted to the Douma on Thursday, provide for an expenditure of \$82,108,078, an increase of \$27,979,778 over 1911.

MAKING SAFE INVESTMENTS

HOW THE PRICE OF MONEY AFFECTS
PRICE OF SECURITIES.

In Good Times and in Bad Times—How
the Future of the Investment Market
Is Tending—Offset by Easy Money Con-
ditions in London.

The articles contributed by "Investor" are for the sole purpose of guiding prospective investors, and, if possible of saving them from losing money through placing it in "wildcat" enterprises. The impartial and reliable character of the information may be relied upon. The writer of these articles and the publisher of this paper have no interests to serve in connection with this matter other than those of the reader.

The other day an investor asked the writer if the present was a good time to buy securities. This was a very simple question to ask, but rather a large order to answer. It involved carefully scrutinizing the influences controlling the price movements of securities, comparing them with conditions in the past and forecasting the future. This is a most important question in connection with the investing of money, and almost absolutely essential to successful speculation.

Of course in investment a man need not estimate the future of general conditions in order to insure a steady income and safety. But by so doing he can occasionally quite easily choose a time when he can get a better rate of income with equal security, or even the same security at a lower cost than at some other not remote time, and so it is quite worth while to attempt this, for while failure to do so correctly involves the speculator in difficulties it merely affects the investor by causing him some disgust at not waiting longer, or at not purchasing sooner. Of course, the true investor need not worry over this feature, but even if you should intend never to sell your investment, it is always a source of satisfaction to realize that you bought it at a lower price than it would bring at present.

There are two things that affect the market for negotiable securities that are securities which are readily bought and sold. One is the loaning price of money, and the other is the general condition of business. Sometimes these work together, sometimes in opposition. When working together their power is irresistible. Usually, however, they are in opposition; money generally being low when business is bad and high when business is good.

The effect of these conditions is this. When money rates are low and business bad and likely to get worse, high-grade bonds such as good municipal debentures will advance. The reason is, of course, that municipal bonds are practically unaffected by adverse business conditions and, therefore, their price is influenced almost entirely by the money market. When money is cheap, that is loaning at 3-1/2 and four per cent. on good security in Canada—it has been many years since this occurred, and will probably be many more before we see it again—bonds yielding 4-1/2 and 5 per cent. are eagerly sought by banks and insurance companies, as they present a return—some run to 1-1/2 points above what could be obtained in loaning on the market—and at the same time the safety of which is not affected by conditions of general business. This fact causes the price of the bonds to advance and the yield to fall until the loaning price of money and the return on bonds are approximately equal. But middle grade bonds will remain stationary for bad business conditions, tending to decrease prices of all but best bonds.

THE KING TO HUNT TIGERS

FEROCIOUS BEASTS SWARM IN
THE JUNGLE.

Maharajah Will Use 500 Elephants
When George V. Visits
India.

Already the announcement is made from Poona, British India, that the maharajah of Nepal is to use 500 elephants for the King of England's tiger hunt in his highness' dominions next December.

While King George is in Nepal Queen Mary will be sight-seeing in Rajpootana. When the king and queen visited India six years ago as Prince and Princess of Wales the maharajah invited his royal highness to Nepal and made vast preparation to provide a royal hunt in his jungle preserves, but the plan was upset by a virulent outbreak of cholera in the region where the hunt was to be. The disappointment was keen to the English prince, but not less to the maharajah.

HUNT ON MAMMOTH SCALE.

Next December the same royal personage will come to India in the exalted rank of king-emperor and his entertainment will be on a corresponding scale of grandeur.

No other jungles in Asia are as extensive as those of the southern foothills and marshy taral of the central and eastern Himalays Mountains. They swarm with wild beasts, which seldom are disturbed, because foreign sportsmen are excluded except when they come at his highness' invitation. The shooting done by the maharajah and his nobles is not enough to make an impression on the game, which includes wild elephants and rhinoceroses, with many species of tigers, bears, leopards, deer and pigs.

In preparation for the king's visit a tract of this jungle, perhaps fifteen miles long and half as broad, will be selected, and all the beasts in a much wider area will be slowly and patiently driven into it by men mounted on elephants, making just noise enough to induce the game to move on without alarm.

By this means, in the course of weeks, twenty or thirty tigers, with other beasts in proportion, will be gathered into the selected area, which then will be surrounded by a ring of watchmen, with the addition of fires by night. The space being so large and well supplied with the tigers' natural prey, the beasts will not seek to escape, nor even to approach the circle of watchmen's huts and fires. This state of things will be kept up until the time for the great hunt arrives.

SHOOT FROM ELEPHANTS.

The shooting will be done from the backs of elephants. These stately pachyderms move through tangled brushwood and shrubbery as an ox walks through grass. Only a person who has seen them can credit the quickness with which they obey any word or sign of the driver seated on their neck, and he has to be on the alert to guide his beast so that the overhanging branches of trees will not sweep the sportsman to the ground.

BEAVERS BUSY WITH DAMS

Have Shut Off the Water From Power
Company at North Bay.

A despatch from North Bay says: North Bay was in darkness on Wednesday night, no electric current being available for illumination. The power for the local plant is generated on South River, twenty miles away, by the Nipissing Power Company, and low water is given as the reason for the failure of the power, caused, the company officials state, by beaver dams in Algonquin Park, where the head waters and reserve storage of South River are located. It is claimed that beavers are holding back water which should supply the power company, with the result that not enough water is available to supply the demand. Low water is general this season, and the busy beavers, with their dams, make a bad situation worse. As the law forbids interference with the beavers the company are helpless, and is applying to the Ontario Government for special permission to destroy the beaver dams and allow the water to reach the power plant. Unless something is speedily done, North Bay, Callendar, and Powassan will not only have to return to candles,

but industries will be severely affected by the power being cut off.

COUNTING THE DEAD.

Twenty-four known dead, eighty-six missing and believed to be buried beneath the debris, is the official census on Monday night of Austin's loss of life in the flood of Saturday. It is conceded, however, that several, if not indeed many visitors and strangers were in town that day, and undoubtedly perished. Including them, and allowing for inevitable errors in compilation, the total of dead will probably reach 130. Twenty-one of the bodies recovered from the ruins have been identified, and of the missing hope is entertained that some may yet be accounted for.

The problem of the hour in Austin is to recover her dead from the thousands of tons of debris choking the narrow valley. To do so before it becomes necessary to burn the ruins and save the living from an epidemic an army of labor must reach the town within the next thirty-six hours, officials say. Otherwise the torch may transform the wreckage into the pyre of most of those who have perished.

HEALTH

"BLEEDERS."

There is no accident of practice more dreaded by the physician than to see a patient upon whom he has performed some trivial operation, such as lancing a boil or removing adenoids, bleed and bleed and keep on bleeding, perhaps until he dies. All the usual remedies, such as pressure, cold, and the application of styptics, and all the unusual ones, such as tying a ligature round the bleeding part or searing it with the cautery, are tried, and tried in vain.

Fortunately, this accident happens rarely, and can happen at all

are in health, for the trouble is purely a chemical one—a deficiency of lime salts, the presence of which is essential if clots are to be formed.

In these cases, it does not always require a surgeon to inflict a fatal wound; a blow on the nose, an accidental cut or a mere pin-scratch may open a sufficient number of tiny blood-vessels to drain away the vital fluid. A man who knows himself to be a bleeder does not dare to shave; he will suffer any pain from an aching tooth rather than allow it to be pulled, and he is most careful not to let his hands or lips chap in winter, lest an accidental crack open the way to an uncontrollable outpouring of blood.

Why the blood is deficient in lime salts is not known. The condition is hereditary, and oddly enough, although it affects men and boys almost exclusively, it is transmitted through the female line. There

CUTTING DOWN YUKON MAIL.

Only Lighter Forms Forwarded and Other Restrictions Imposed.

A despatch from Ottawa says: After the first of October restrictions were placed on the kind of mail to the Yukon to be sent onward from White Horse. This is owing to the closing of navigation. All letters, postcards, single-wrapped newspapers, periodicals, etc., will be forwarded; but newspapers and periodicals sent to newsdealers for trade in bulk, books and merchandise, circulars, patterns, and samples are excluded. The parcels may be sent to White Horse by mail to be transferred there to the express companies, and the department will transfer them to these forwarding agencies there, but assumes no responsibility.

THE ORION'S BIG GUNS.

Simultaneous Discharge Broke Glass Ten Miles Away.

A despatch from London says: The battleship Orion's 13.5-inch guns have been tried with remarkable effect. So tremendous was the concussion that windows were shaken in Southsea, ten miles away. The structure of the ship well withstood the test and showed no damage. All those engaged in the firing operation wore wool-padded earlapps. Hardened glass skylights and port-holes were badly fractured, and the coverings of canned goods in the ship's stores burst and much crockery was smashed. The decks were not buckled by the blast, thanks to the manner in which they were specially strengthened, but the bottom of one of the ship's boats fell clean out.

EMBARGO REIMPOSED.

Another Outbreak of Foot and Mouth Disease in England.

A despatch from Ottawa says: Owing to another serious outbreak of the foot and mouth disease in Somersetshire, England, the restriction, which was removed last week on the importation of cattle, sheep and swine from the United Kingdom into Canada, have been reimposed. This order will affect a number of Canadian importers, some of whom have been for some time holding animals purchased in Great Britain, in the hope of being able to bring them to Canada before the close of the present season.

PORTUGAL INVADED.

4,000 Royalists With Guns Have Crossed Spanish Frontier.

A despatch from Santiago de Compostela, Spain, says: The newspaper Eco says that the Royalist leader, Captain Couciere, and the chief Portuguese Monarchist conspirators entered Portugal on Sunday at the head of four thousand men with several guns and quick-firers and one hundred and fifty mules.

The designs for the new gold coinage to be issued shortly have been announced.

on bleeding, perhaps until he dies. All the usual remedies, such as pressure, cold, and the application of styptics, and all the unusual ones, such as tying a ligature round the bleeding part or searing it with the cautery, are tried, and tried in vain.

Fortunately, this accident happens rarely, and can happen at all only in the case of a new patient, with whose constitution the doctor is unfamiliar; but when it does happen, it seems worse and more terrible than death from any other cause following operation; for it is so unlooked-for that it comes like a bolt from the blue.

The constitutional state to which this accident is due is what is known as hemophilia; those subject to it are called "bleeders." The disease is one of the blood, solely. It consists in a reduced coagulability; that is, the clots which ordinarily close the open mouths of the minute blood-vessels, and thus stop the blood from oozing from a small wound, do not form; consequently, the blood continues to escape. The globules of the blood and the coloring matter are usually as they

know it, and he is most careful not to let his hands or lips chaf in winter, lest an accidental crack open the way to an uncontrollable outpouring of blood.

Why the blood is deficient in lime salts is not known. The condition is hereditary, and oddly enough, although it affects men and boys almost exclusively, it is transmitted through the female line. Thus, a man may be a bleeder; his children will escape, but the male children of his daughter will almost surely, one or all, suffer.

Most bleeders die in infancy, but not a few live to boyhood, and some even to adult life, before meeting with the accident that leads to the fatal hemorrhage. Some few grow out of the condition.

Treatment consists in the daily administration of lime salts, such as the lactate of calcium, through long periods of time. Gelatin has also been used, apparently with benefit.—Youth's Companion.

"Did he write his essay with acumen?" "No, sir; with a type-writer."

HUNDREDS MEET DEATH

Dam Bursts at Austin, Penn., and Practically Destroys the Town.

A despatch from Austin, Penn., says: Three hundred or more persons met their death through the bursting of a dam above this town on Saturday. Fire followed and completed the work of destruction. The curtain of night, which was rung down on the flood scarcely before its victims had all been claimed, and its surviving spectators fully realized how great a tragedy the elements of water and fire had enacted in the natural amphitheatre of the Allegheny Mountains here, was lifted by dawn on Sunday, revealing a ghastly scene of death and devastation.

Austin itself, on Saturday a busy mill town of 3,000 people, many of whom were enjoying a fine autumn afternoon as a Saturday half holiday, is now only a ghost of a town. Torn to pieces by water

and eaten by fire, the wet and charred remnants of its buildings, believed to hold the remains of 300 or more persons, were strewn along the valley edge, piled in winrows where the Main street business section was, or swept in scattered masses far down the ravine.

The greatest loss of life by fire occurred at a sharp turn of the valley just below Main street, where the debris was caught and compressed with terrific power by the circling sweep of the flood. The wreckage of the busiest portion of the town was carried to that point and from upset stoves and lamps, caught fire. It is believed that scores of persons are buried under from ten to twenty feet of wreckage there, and the task of recovering them will necessarily be a difficult one.

The present tendency is this. Money is dear and business very good, indeed, in Canada. Therefore high-grade bonds should ease off. They will not do so to any appreciable extent because high-grade municipal bonds are not handled on the Canadian markets, but are dealt in wholly by private sale. But you will notice that the prices which good municipalities get for their bonds are less this year than last. In fact, from all appearances, the prices are getting down to a level where they yield a return approaching that on free money. Excellent business conditions, however, are causing securities of a lower grade to advance, because their safety is improving and because, yielding a higher rate, the money market is not yet too high to influence them seriously.

CHOLERA IN TUNIS.

Thirty-Six Deaths Reported Among Arabs in One Day.

A despatch from Paris says: Cholera is epidemic in Tunis, a regency and French protectorate of northern Africa, and the colonial office has decided to enforce strict sanitary measures. The French resident-general in Tunis, G. F. Alapetite, has cut shore his holiday in France and will return to Tunis to direct the health measures. Thirty-six deaths are reported to have occurred on Tuesday in the Arab quarter of the capital, and 82 new cases.

MOTHER AND SON DIE.

Because Latter Was Charged With Crime, Causing Heart Break.

A despatch from East Brookfield, Mass., says: Bound together by straps about their wrists, the bodies of Mrs. Mary Lacey and her son, J. B. Lacey of Fitchburg, were found in Lake Lashway on Wednesday. Grief over a charge on which the son had been arrested is supposed to have led them to suicide. Mrs. Lacey was 53 years old and her son 30.

RESTRICTIONS REMOVED.

British Live Stock May Now be Imported Into Canada.

A despatch from Ottawa says: The British Government has notified Canada that the restrictions prohibiting the importation of cattle, sheep and other ruminants and swine from the United Kingdom to Canada, on account of the prevalence of the foot and mouth disease in the former, have been removed. The restrictions have been in force since July 6.

Arrival of Ktly.

This well-known attraction will appear at the Brisco opera house on Tuesday, October 10th. Some new features are promised in connection with the production this season. Numerous songs, specially written, are introduced and there is a thorough revision of the play improving it in many ways. "The Squaw Man," will also appear at the opera house on Tuesday, October 17th.

Contractor Lytton this week completed the Dundas street sewer. The job has occupied a gang of men about a year.

The Western Methodist Sunday School was the winner in the free Library contest. The Sunday School won by about 3000 votes.

The smoke-stack on the Dominion Rock Drill Co's. boiler room burned out on Thursday evening and gave the firemen a run. No damage was done.

BOYLE & SON.

Templeton—Furnival

In St. Mary Magdalene Church, on Wednesday evening, at eight thirty o'clock, Edith Marjorie, younger daughter of Mr. and Mrs. J. C. Furnival, was married to William Allan Templeton. The ceremony was conducted by the Rev. W. E. Kidd, in the presence of the immediate relatives of the contracting parties. The bride, wearing a gown of white satin trimmed with silver and carrying a shower bouquet of white roses and lily of the valley, was given away by her brother, James C. Furnival, of Portland, Maine. The bride was attended by Miss Mary Vrooman, wearing a dainty gown of white satin veiled in blue and embroidered in crystals. She carried an armful of pale pink roses. Mr. James E. Madden assisted the groom, and little Janet McIntosh, in frock of white lace with touches of blue acted as flower-girl, carrying a basket of pale blue flowers. Mr. F. S. Boyes and Mr. J. B. Allison were ushers. After the ceremony the guests adjourned to the home of Mr. and Mrs. Furnival to congratulate the bride and groom. Mr. and Mrs. Templeton will spend their honeymoon in New York.

Williams' Pink Pills, 35c, or 3 for \$1.00 at Wallace's Drug Store.

Court of Assize.

For the County of Lennox and Addington will open at the Court House on Monday next before His Lordship, Mr. Justice Clute. The following cases have been entered for trial:

Slater vs Slater. An action for alimony brought by Hannah Amelia Slater against her husband, Walter John Slater, all of the Township of Denbigh, Herrington, Warner and Grange for plaintiff, T. W. McGarry, Renfrew, for defendant.

Withers vs Town of Napanee. An action brought by F. Edith Withers against the corporation of the town of Napanee and John W. Lytton, contractor for Dundas street sewer, for \$1000 damages sustained by the plaintiff by tripping over an iron pipe placed lengthwise along Dundas street but across and some distance above the crossing on Dundas street on the east side of Centre Street. John English for plaintiff, W. S. Herrington, K. C., for Napanee and J. L. Whiting, K. C., Kingston, for defendant Lytton.

Freeman vs Bank of Montreal. An action brought by John W. Freeman, of the City of Toronto, to recover from the bank the sum of \$1,000 and interest thereon. W. G. Wilson for plaintiff, Northrup and Porter, of Belleville, for defendants.

The criminal case of King vs Peter Sherman Wagar, for rape will be tried at this court.

Don't suffer pain. Take Merrill's Wizard Lightning. Clean and stainless to apply, and pleasant to take. Price 25c.

Lennox and Addington Historical Society.

The regular meeting of the Society will be held in Historical Hall, Library Building, on Friday evening, Oct. 27th, at 8 o'clock. The lecture for this meeting has not been definitely decided upon but will be announced later. The society has made excellent progress during the summer months and some interesting announcements will be made at this meeting. The meeting will be open for the public, entrance free and everyone welcome.

P. 11113.

The place to select your piano is from VanLuvén Bros. stock at Paul's music store, Napanee. We have several makes, including the celebrated Gerhard Heintzman and Newcombe. You can see the different styles, hear the different tones, and take your choice. We trade for anything, we want twenty horses on deal and give very easy terms of payment. We also sell Organs sewing machines, separators, and the celebrated Fairbanks and Harris gasoline engines. We have two large farms sale. Will be at Mr. Paul's store Saturdays.

VANLUVÉN BROS.
Moscow and Yarker.

For the latest thing in ladies' hand bags, purses, ask for the "Julian Sale" make, at The Medical Hall—Fred L. Hooper.

JAMES WALTERS,

Merchant Tailoring, Napanee.

Real Ingratitude.

"Republics are ungrateful," said the ready made philosopher.

"Perhaps," replied Mr. Chuggins, "but if you want a taste of real ingratitude take a party of friends out for an automobile ride and listen to their sarcastic remarks if you happen to break down."—Washington Star.

At the Literary Club.

"Maria, what was done at the meeting of your literary club last night?"

"We fined Mrs. Chilleon-Kearney \$5 for accusing Mrs. Highmuns of cheating at bridge."—Chicago Tribune.

One Cell Animals.

Only one cell animals which have no differentiation are immortal and never grow old. Physical immortality, deathless youth, is possible, but you must be an infusorian or a yeast plant to attain it, and one wouldn't even be a clam or a jellyfish for the price. The process has no limits any more than it has beginnings. Life is just that, one-third dying that two-thirds may live, whether it be the single cell or the body.—Dr. Woods Hutchinson in Hampton's.

T. T. T. T. Four T's, Tar, Tamarac, Tolu and Treacle. The only medicine in the world that cures a cough in one day and the worst cold in 48 hours. Price 25c.

Sold and recommended by T. B. Wallace, Druggist.

Children Cry FOR FLETCHER'S CASTORIA

**Why don't some flours behave?
Why don't they keep good?**

Because they contain too much of the branny particles, too much of the inferior portions of the wheat—may be little pieces of the oily germ.

Which act on one another—that's why some flours "work" in the sack.

FIVE ROSES is the purest extract of Manitoba spring wheat berries.

Free from branny particles and such like, Twill keep sound, and sweet longer than necessary.

Keep it in a dry place, and when needed you find it even healthier, sounder, fresher, drier than the day you bought it.

Buy lots of **FIVE ROSES**.

It keeps.

Five Roses Flour
